Morphologies of Asia and Africa Alan S. Kaye,2007-06-23 In 1997 Eisenbrauns published the highly regarded two volume Phonologies of Asia and Africa edited by Alan Kaye with the assistance of Peter T Daniels and the book rapidly became the standard reference for the phonologies of the Afro Asiatic languages Now the concept has been extended and Kaye has assembled nearly 50 scholars to write essays on the morphologies of the same language group The coverage is complete copious and again will likely become the standard work in the field Contributors are an international Who's Who of Afro Asiatic linguistics from Appleyard to Leslau to Voigt It is with great sadness that we report the death of Alan Kaye on May 31 2007 while these volumes were in the final stages of preparation for the press Alan was diagnosed with bone cancer on May 1 while on research leave in the United Arab Emirates and was brought home to Fullerton by his son on May 22

Tajik Linguistics Shinji Ido,Behrooz Mahmoodi-Bakhtiari,2023-01-30 It is hardly an overstatement to say that Soviet linguists had a monopoly over Tajik linguistics before the dissolution of the Soviet Union when most studies on the language were accessible exclusively through Russian and Tajik Today however linguists dealing with Tajik are diverse not only in terms of their location but also in terms of their disciplinary orientation within linguistics making it difficult for the general linguist to work out the state of the art of the linguistic study of Tajik This volume aims to address this difficulty by collecting in a handbook format recent post Soviet developments in the study of Tajik that now lie scattered in different subdisciplines of linguistics The volume thus showcases the state of the art of post Soviet Tajik linguistics and can be used as a guide for linguists interested in the language

Frontier Fictions Firoozeh Kashani-Sabet, 2014-08-07 In *Frontier Fictions* Firoozeh Kashani Sabet looks at the efforts of Iranians to defend if not expand their borders in the nineteenth and early twentieth centuries and explores how their conceptions of national geography influenced cultural and political change The frontier fictions or the ways in which the

Iranians viewed their often fluctuating borders and the conflicts surrounding them played a dominant role in defining the nation. On these borderlands, new ideas of citizenship and nationality were unleashed, refining older ideas of ethnicity. Kashani Sabet maintains that land-based conceptions of countries existed before the advent of the modern nation-state. Her focus on geography enables her to explore and document fully a wide range of aspects of modern citizenship in Iran, including love of homeland, the hegemony of the Persian language, and widespread interest in archaeology, travel, and map-making. While many historians have focused on the concept of the imagined community in their explanations of the rise of nationalism, Kashani Sabet is able to complement this perspective with a very tangible explanation of what connects people to a specific place. Her approach is intended to enrich our understanding not only of Iranian nationalism but also of nationalism everywhere.

An Emerging Approach for Education and Care Susana Castro, Olympia Palikara, 2017-08-07

An Emerging Approach for Education and Care provides a synthesis of the extensive research that has been conducted worldwide about the International Classification of Functioning, Disability and Health for Children and Youth in education and care. The main purpose of the ICF is to provide a classification of functioning for adults and children with difficulties, considering their everyday lives, all the activities they perform, and the environments they are embedded in, in addition to their health condition, which has been the traditional focus of Special Education provision in many countries. Each chapter presents an evidence-based study describing how the ICF has been used to improve the provision of services for children and young people with Special Educational Needs around the world. Moreover, each chapter is written by an expert on the ICF from a different country, thus providing an overview of how the ICF can be applied in international educational contexts with different educational and health systems and cultural backgrounds. This synthesis of world-leading research focuses on the ICF as a framework to approach assessment, intervention, and classification for children and young people with SEN, whilst also providing practical examples of how it can be implemented. *An Emerging Approach for Education and Care* will be essential reading for academics, researchers, and practitioners working on Special Educational Needs provision and rehabilitation. It should also be of great interest to those involved in the study of early childhood education and for postgraduate students aspiring to work in these settings.
