"Report of the Dominion fishery commission on the fisheries of the province of Ontario, 1893", issued as vol. 26, no. 7, supplement. During the period 1964-1972, Stephen L Adler wrote seminal papers on high energy neutrino processes, current algebras, soft pion theorems, sum rules, and perturbation theory anomalies that helped lay the foundations for our current standard model of elementary particle physics. These papers are reprinted here together with detailed historical commentaries describing how they evolved, their relation to other work in the field, and their connection to recent literature. Later important work by Dr Adler on a wide range of topics in fundamental theory, phenomenology, and numerical methods, and their related historical background, is also covered in the commentaries and reprints. This book will be a valuable resource for graduate students and researchers in the fields in which Dr Adler has worked, and for historians of science studying physics in the final third of the twentieth century, a period in which an enduring synthesis was achieved. Monthly. Papers presented at recent meeting held all over the world by scientific, technical, engineering and medical groups. From microbiology to nuclear physics and chemistry to software engineering, scientific and technical translation is a complex activity that involves communicating specialized information on a variety of subjects across multiple languages. It requires expert linguistic knowledge and writing skills, combined with the ability to research and understand complex concepts and present them to a range of different audiences. Using a combination of interdisciplinary research, real-world examples drawn from professional practice and numerous learning activities, this introductory textbook equips the student with the knowledge and skills needed to get started in this exciting and challenging field. It examines the origins and history of scientific and technical translation, and the people, tools and processes involved in translating scientific and technical texts. Scientific and Technical Translation Explained provides an overview of the main features of scientific and technical discourse as well as the different types of documents produced. A series of detailed case studies highlight various translation challenges and introduce a range of strategies for dealing with them. A variety of resources and exercises are included to make learning effective and enjoyable. Additional resources and activities are available on Facebook. "On Account of Sex is required reading for historians, political scientists, legislators and citizens who wish to influence the shaping of feminist public policy."—Linda Kerber, author of Women of the Republic "Cynthia Harrison has written a splendid book—a fine combination of balanced historical narrative, penetrating social analysis, and provocative "nose-under-the-tentflap" political conclusions. It must be added to the list of indispensable works on women's politics and issues."—James MacGregor Burns, Williams College Americans have long held fast to a rigid definition of womanhood, revolving around husband, home, and children. Women who rebelled against this definition and carved out independent lives for themselves have often been rendered invisible in U.S. history. In this unusual comparative study, Trisha Franzen brings to light the remarkable lives of two generations of autonomous women: Progressive Era spinsters and mid-twentieth century lesbians. While both groups of women followed similar paths to independence—separating from their families, pursuing education, finding work, and creating woman-centered communities—they faced different material and cultural challenge and came to claim very different identities. Many of the turn-of-the-century women were prominent during their time, from internationally recognized classicist Edith Hamilton through two early Directors of the Women's Bureau, Mary Anderson and Freida Miller. Maturing during the time of a broad and powerful women's movement, they were among that era's new women, the often-single women who were viewed as in the vanguard of women's struggle for equality. In contrast, never-married women after World War II, especially lesbians, were considered beyond the pale of real womanhood. Before the women's and gay/lesbian liberation movements, they had no positive contemporary images of alternative lives for women. Highlighting the similarities and differences between women-oriented women confronting changing gender and sexuality systems, Spinsters and Lesbians thus traces a continuum among women who constructed lives outside institutionalized heterosexuality. The 23rd EUROCALL conference was organised by the Cyprus University of Technology Language Centre. The theme of the conference was "CALL communities and Culture". Between the 24th and 27th August 2016, over 135 presentations were delivered and 27 posters were presented; 84 of these presentations appear in this volume of selected peer-reviewed short papers. A history of US involvement in late twentieth-century campaigns against global poverty and how they came to focus on women A War on Global Poverty provides a fresh account of US involvement in campaigns to end global poverty in the 1970s and 1980s. From the decline of modernization programs to the rise of microcredit, Joanne Meyerowitz looks beyond familiar histories of development and explains why antipoverty programs increasingly focused on women as the deserving poor. When the United States joined the war on global poverty, economists, policymakers, and activists asked how to change a world in which millions lived in need. Moved to the left by socialists, social democrats, and religious humanists, they rejected the notion that economic growth would trickle down to the poor, and they proposed programs to redress inequities between and within nations. In an emerging "women in development" movement, they positioned women as economic actors who could help lift families and nations out of destitution. In the more conservative 1980s, the war on global poverty turned decisively toward market-based projects in the private sector. Development experts and antipoverty advocates recast women as entrepreneurs and imagined microcredit—with its tiny loans—as a grassroots solution. Meyerowitz shows that at the very moment when the overextension of credit left poorer nations bankrupt, loans to impoverished women came to replace more ambitious proposals that aimed at redistribution. Based on a wealth of sources, A War on Global Poverty looks at a critical transformation in antipoverty efforts in the late twentieth century and points to its legacies today. Gaokao essays are an important component of the National College Entrance Examination (Gaokao) for Chinese high school students. They serve as a comprehensive assessment of students' language proficiency, thinking abilities, and overall literacy. Gaokao essays and the IB Chinese exam can learn from and reference each other in certain aspects, but they also have

some differences. Despite the differences, both Gaokao essays and the IB Chinese exam emphasize the development of candidates' writing and thinking abilities. By preparing for and referencing Gaokao essays, candidates can cultivate good writing habits, logical thinking, and expression skills, which are also helpful for tackling writing tasks in the IB Chinese exam. Furthermore, candidates can enhance their writing abilities and test-taking skills by familiarizing themselves with the writing requirements and evaluation criteria of the IB Chinese exam. It is important to note that during the preparation process, candidates should engage in targeted practice and preparation based on the requirements of the IB Chinese exam. Understanding the specific format and evaluation criteria of the exam and making corresponding learning and improvements are essential.
