recommendations to improve the likelihood of the Partnership meeting its goals Key recommendations of the book include that the 21CTP should be continued but the future program should be revised and better balanced A clearer goal setting strategy should be developed and the goals should be clearly stated in measurable engineering terms and reviewed periodically so as to be based on the available funds *Nominations of Peter John Bertoglio and Ray A. transportation fuel used in the U S The miles per gallon measure used to regulate the fuel economy of passenger cars is not appropriate for medium and heavy duty vehicles which are designed above all to carry loads efficiently Instead any regulation of medium and heavy duty vehicles should use a metric that reflects the efficiency with which a vehicle moves goods or passengers such as gallons per ton mile a unit that reflects the amount of fuel a vehicle would use to carry a ton of goods one mile This is called load specific fuel consumption LSFC The book estimates the improvements that various technologies could achieve over the next decade in seven vehicle types For example using advanced diesel engines in tractor trailers could lower their fuel consumption by up to 20 percent by 2020 and improved aerodynamics could yield an 11 percent reduction Hybrid powertrains could lower the fuel consumption of vehicles that stop frequently such as garbage trucks and transit buses by as much 35 percent in the same time frame **Cars & Parts** ,1993 **Guidelines for the Measurement of Interstate Motor Carrier Noise Emissions** Michigan Acoustical Consultants,1977 The objectives of this manual is to provide for a basic understanding of the elements of the measurement of sound from motor vehicles in particular and the provisions and requirements of the Federal interstate motor carrier noise regulations so that the reader is prepared to determine compliance with the regulations in a confident manner
