What's Up 2006: 365 Days of Skywatching presents the highlights you can see in the night sky for every day in 2006. With a small telescope, binoculars, and sometimes just your eyes, you'll track down features on the Moon, planets, meteor showers, bright and double stars, open and globular clusters, and distant galaxies. Astronomers Tammy Plotner and Jeff Barbour are your guides to the wonders of the night sky. This book brings the challenge and fun back to a hobby that goes stale far too quickly for many budding amateur astronomers. The book begins with teaching astronomers to use their most important astronomy tool, their eyes. It discusses how to select the right telescope, and subsequent chapters take the readers on a tour of the solar system as they have never viewed it before... through their own eyes. Each chapter includes a series of observing challenges that will entertain and push the reader to continually higher levels of achievement. From global trends to national events... outer space to cyberspace... the past to the present... all the comprehensive up-to-the-minute facts, statistics, dates and information you'll ever need or want. J.D. Power and Associates automotive journal.
