How to Write and Publish a Scientific Paper Robert A. Day, 1989-03-01

Scientific Babel Michael D. Gordin, 2015-04-13 English is the language of science today No matter which languages you know if you want your work seen studied and cited you need to publish in English But that hasn't always been the case Though there was a time when Latin dominated the field for centuries science has been a polyglot enterprise conducted in a number of languages whose importance waxed and waned over time until the rise of English in the twentieth century So how did we get from there to here How did French German Latin Russian and even Esperanto give way to English And what can we reconstruct of the experience of doing science in the polyglot past With *Scientific Babel* Michael D Gordin resurrects that lost world in part through an ingenious mechanism the pages of his highly readable narrative account teem with footnotes not offering background information but presenting quoted material in its original language The result is stunning as we read about the rise and fall of languages driven by politics war economics and institutions we actually see it happen in the ever changing web of multilingual examples The history of science and of English as its dominant language comes to life and brings with it a new understanding not only of the frictions generated by a scientific community that spoke in many often mutually unintelligible voices but also of the possibilities of the polyglot and the losses that the dominance of English entails Few historians of science write as well as Gordin and *Scientific Babel* reveals his incredible command of the literature language and intellectual essence of science past and present No reader who takes this linguistic journey with him will be disappointed

The Constitution of Algorithms Florian Jatton,2021-04-27 A laboratory study that investigates how algorithms come into existence Algorithms often associated with the terms big data machine learning or artificial intelligence underlie the technologies we use every day and disputes over the consequences actual or potential of new algorithms arise regularly In this book Florian Jatton offers a new way to study computerized methods providing an account of where algorithms come from and how they are constituted investigating the practical activities by which algorithms are progressively assembled rather than what they may suggest or require once they are assembled

Complexity and Postmodernism Paul Cilliers,2002-09-11 In Complexity and Postmodernism Paul Cilliers explores the idea of complexity in the light of contemporary perspectives from philosophy and science Cilliers offers us a unique approach to understanding complexity and computational theory by integrating postmodern theory like that of Derrida and Lyotard into his discussion Complexity and Postmodernism is an exciting and an original book that should be read by anyone interested in gaining a fresh understanding of complexity postmodernism and connectionism

Parables for the Virtual Brian Massumi, 2002-04-09 Although the body has been the focus of much contemporary cultural theory the models that are typically applied neglect the most salient characteristics of embodied existence movement affect and sensation in favor of concepts derived from linguistic theory In Parables for the Virtual Brian Massumi views the body and media such as television film and the Internet as cultural formations that operate on multiple registers of sensation beyond the reach of the reading techniques founded on the standard rhetorical and semiotic models Renewing and assessing William James's radical empiricism and Henri Bergson's philosophy of perception through the filter of the post war French philosophy of Deleuze Guattari and Foucault Massumi links a cultural logic of variation to questions of movement affect and sensation If such concepts are as fundamental as signs and significations he argues then a new set of theoretical issues appear and with them potential new paths for the wedding of scientific and cultural theory Replacing the traditional opposition of literal and figural with new distinctions between stasis and motion and between actual and virtual Parables for the Virtual tackles related theoretical issues by applying them to cultural mediums as diverse as architecture body art the digital art of Stelarc and Ronald Reagan's acting career The result is an intriguing combination of cultural theory science and philosophy that asserts itself in a crystalline and multi faceted argument

What Do Science, Technology, and Innovation Mean from Africa? Clapperton Chakanetsa Mavhunga, 2017-06-16 Explorations of science technology and innovation in Africa not as the product of technology transfer from elsewhere but as the working of African knowledge In the STI literature Africa has often been regarded as a recipient of science technology and innovation rather than a maker of them In this book scholars from a range of disciplines show that STI in Africa is not merely the product of technology transfer from elsewhere but the working of African knowledge Their contributions focus on African ways of looking meaning making and creating The chapter authors see Africans as intellectual agents whose perspectives constitute authoritative knowledge and whose strategic deployment of both endogenous and inbound things represents an African centered notion of STI Things do not always mean the same from everywhere observes Clapperton Chakanetsa Mavhunga the volume s editor Western colonialist definitions of STI are not universalizable The contributors discuss topics that include the trivialization of indigenous knowledge under colonialism the creative labor of chimurenga the transformation of everyday surroundings into military infrastructure the role of enslaved Africans in America as innovators and synthesizers the African ethos of fixing the constitutive appropriation that makes mobile technologies African and an African innovation strategy that builds on domestic capacities The contributions describe an Africa that is creative technological and scientific showing that African STI is the latest iteration of a long process of accumulative multicultural knowledge production Contributors Geri Augusto Shadreck Chirikure Chux Daniels Ron Eglash Ellen Foster Garrick E Louis D A Masolo Clapperton Chakanetsa Mavhunga Neda Nazemi Toluwalogo Odumosu Katrien Pype Scott Remer
