James R. Munkres, 2004

A Concise Course in Algebraic Topology J. P. May, 1999-09 Algebraic topology is a basic part of modern mathematics and some knowledge of this area is indispensable for any advanced work relating to geometry including topology itself differential geometry algebraic geometry and Lie groups This book provides a detailed treatment of algebraic topology both for teachers of the subject and for advanced graduate students in mathematics either specializing in this area or continuing on to other fields J Peter May's approach reflects the enormous internal developments within algebraic topology over the past several decades most of which are largely unknown to mathematicians in other fields But he also retains the classical presentations of various topics where appropriate Most chapters end with problems that further explore and refine the concepts presented The final four chapters provide sketches of substantial areas of algebraic topology that are normally omitted from introductory texts and the book concludes with a list of suggested readings for those interested in delving further into the field

Topology of Metric Spaces S. Kumaresan, 2005 Topology of Metric Spaces gives a very streamlined development of a course in metric space topology emphasizing only the most useful concepts concrete spaces and geometric ideas to encourage geometric thinking to treat this as a preparatory ground for a general topology course to use this course as a surrogate for real analysis and to help the students gain some perspective of modern analysis Eminently suitable for self study this book may also be used as a supplementary text for courses in general or point set topology so that students will acquire a lot of concrete examples of spaces and maps **BOOK JACKET**
