Pedagogy in Basic and Higher Education Kirsi Tirri, Auli Toom, 2020-02-19 This book takes a holistic approach to pedagogy and argues that the purpose of education is to educate the student s whole personality including cognitive social and moral domains The four sections and twelve chapters address the current pedagogical challenges in basic and higher education in international contexts The authors describe the principles and practices through which meaningful education is promoted and enhanced in a variety of ways The challenges educators face in their profession as well as ways to overcome them are elaborated on both theoretically and empirically The book allows both researchers teachers and educational policy makers to reflect on current developments challenges and areas of development in educational institutions when aiming to support student growth and learning *Critical Perspectives on Teachers and Teaching* Jessica Holloway, 2024-02-08 This book draws attention to the new ways the field of education is

problematizing the emerging and evolving conditions that shape the work lives and identities of teachers. It offers geographically diverse accounts of the teacher and teaching demonstrating what it means to do critical research well. Teachers and their practice have been and continue to be important sites of critical research. This book offers varied perspectives from diverse geographies to examine how teacher subjectivities are shaped by conditions of possibility. Collectively they show how critiquing conditions rather than the teachers themselves provide a means for problematizing the teacher while also advocating the well being of teachers as humans. Contributions offer compelling examples of how critical scholars can emphasise teaching as a political and value laden exercise and therefore treat the teacher subject as also being constituted through political and value laden discourses. *Critical Perspectives on Teachers and Teaching* offers a provocation to inspire new questions moving forward. That is critical researchers have an obligation to challenge taken for granted assumptions not only by looking outwards at the policymakers, edu businesses and intergovernmental agencies e.g. OECD but also by looking inwards and challenging their assumptions about power, discourse and subjectivity. This book was originally published as a special issue of *Critical Studies in Education*. [Education Game Changers](#) Karen E. Starr, 2014-12-08. *Education Game Changers* is written for an international readership. This book refers to all education levels and sectors and builds on research in educational leadership, education business and organizational change. Karen E. Starr describes policy paradoxes challenging the sustainability of educational provision as we know it and the imperatives they present for educational leadership, business and governance. This book critiques the paradoxical education policy context while exploring alternative futures they may spawn. It ponders both possibilities and pitfalls that cannot be ignored by instrumental players such as governments, policy makers, educational leaders and business managers, researchers and analysts. This book unveils rising cases of education business failures around the world, the paucity of governance and business skill on educational boards and the irrational contradictions faced by governments in determining education policy. *National Testing in Schools* Bob Lingard, Greg Thompson, Sam Sellar, 2015-11-06. Over the last two decades large scale national or provincial standardised testing has become prominent in the schools of many countries around the globe. *National Testing in Schools: An Australian Assessment* draws on research to consider the nature of national testing and its multiple effects including media responses and constructions such as league tables of performance, pressures within school systems and on schools, effects on the work and identities of principals and teachers and impacts on the experience of schooling for many young people including those least advantaged. Using Australia as the case site for global concerns regarding national testing, this book will be an invaluable companion for education researchers, teacher educators, teacher education students and teachers globally. **Searching the Globe for Answers** Peter R. Litchka, 2019-09-17. Drawing on the extensive knowledge of experts from nations around the world, the authors provide comprehensive assessments of the challenges and opportunities when dealing with educational change initiatives at the national and local levels. **PIRLS 2011 International Results in Reading** Ina
