*Automazione e tecnologie emergenti* Daniel Mikelsten, L'automazione ovunque e la sua penetrazione e raffinatezza sono in aumento. Si prevede che l'intelligenza artificiale amplificherà notevolmente la capacità di robot e sistemi automatizzati di apprendere, combinare funzioni di lavoro e pensare fuori dagli schemi. La robotica e le tecnologie cognitive continuano a soppiantare un numero crescente di funzioni aziendali di routine che in precedenza erano gestite da esseri umani. Le tecnologie emergenti includono una varietà di tecnologie come la tecnologia educativa, la tecnologia dell'informazione, la nanotecnologia, la biotecnologia, la scienza cognitiva, la psicotecnologia, la robotica e l'intelligenza artificiale. Man mano che la robotica e l'intelligenza artificiale si sviluppano ulteriormente, anche molti lavori qualificati possono essere minacciati. Tecnologie come l'apprendimento automatico possono in definitiva consentire ai computer di svolgere molti lavori basati sulla conoscenza che richiedono un'istruzione significativa.
