Manual of Romance Phonetics and Phonology Apr 15 2024 This handbook is structured in two parts: it provides, on the one hand, a comprehensive (synchronic) overview of the phonetics and phonology (including prosody) of a breadth of Romance languages and focuses, on the other hand, on central topics of research in Romance segmental and suprasegmental phonology, including comparative and diachronic perspectives. Phonetics and phonology have always been a core discipline in Romance linguistics: the wide synchronic variety of languages and dialects derived from spoken Latin is extensively explored in numerous corpus and atlas projects, and for quite a few of these varieties there is also more or less ample documentation of at least some of their diachronic stages. This rich

empirical database offers excellent testing grounds for different theoretical approaches and allows for substantial insights into phonological structuring as well as into (incipient, ongoing, or concluded) processes of phonological change. The volume can be read both as a state-of-the-art report of research in the field and as a manual of Romance languages with special emphasis on the key topics of phonetics and phonology.

**Cultural Diversity in Neuropsychological Assessment** Aug 07 2023 Cultural Diversity in Neuropsychological Assessment provides a platform for clinical neuropsychologists, psychologists, and trainees to bridge cultures and speak to each other about the ethnically diverse communities they serve throughout the world. It allows readers to peek into their clinical filing cabinets and examine how they worked with diverse individuals from indigenous and migrant communities of Arab, Asian, European, Israeli, Latin American and Caribbean, Persian, Russian, Sub-Saharan African, and North American origin. The book first reviews important foundations for working with diverse communities that include key knowledge, awareness, skills, and action orientation. It then provides a collection of cases for each cultural geographic region. Each section begins with an introductory chapter to provide a bird's eye view of the historical and current state of clinical and research practice of neuropsychology in that region. Then, each chapter focuses on a specific community by providing surface and deep-level cultural background knowledge from the authors' unique perspectives. A case study is then covered in depth to practically showcase an evaluation with someone from that community. This is followed by a summary of key strategic points, lessons learned, references, further readings, and a glossary of culture specific terminology used throughout the chapter. In the end, the appendix provides a list of culturally relevant tests and norms for some

communities. This ground-breaking peer-reviewed handbook provides an invaluable clinical resource for neuropsychologists, psychologists, and trainees. It increases self-reflection about multicultural awareness and knowledge, highlights practical ways to increase cultural understanding in neuropsychological and psychological assessments, and sparks further discussion for professional and personal growth in this area.

Family Law and Society in Europe from the Middle Ages to the Contemporary Era Nov 10 2023 This volume addresses the study of family law and society in Europe, from medieval to contemporary ages. It examines the topic from a legal and social point of view. Furthermore, it investigates those aspects of the new family legal history that have not commonly been examined in depth by legal historians. The volume provides a new 'global' interpretative key of the development of family law in Europe. It presents essays about family and the Christian influence, family and criminal law, family and civil liability, filiation (legitimate, natural and adopted children), and family and children labour law. In addition, it explores specific topics related to marriage, such as the matrimonial property regime from a European comparative perspective, and impediments to marriage, such as bigamy. The book also addresses topics including family, society and European juridical science.

Gender and the Woman Artist in Early Modern Iberia Mar 10 2021 This monograph explores the social constructs surrounding artistic production in early modern Iberia through the lenses of gender and class by examining the rarely considered contribution of creative women in Spain and Portugal between 1550 and 1700. Using the life-stage framework popular in texts of the period and drawing on a broad spectrum of materials including conduct guidebooks, treatises and conventual rules, this book examines the constraints imposed by gender-related social structures through

microhistories of nuns, married, and unmarried women. The text spans class boundaries in its analysis of the work of painters, engravers, and sculptors, many of whom have until now eluded scholarly attention in English-language publications. An extensive bibliography promotes new avenues of inquiry into women's contributions to the visual arts of the period. This book will be of interest to scholars working in art history, gender studies, women's history, early modern Iberian studies, and Renaissance studies.

Killer Books Nov 29 2022 "AnÁbal GonzÁilez's book is a rich, exquisitely erudite, highly original, brilliantly argued essay about profound ethical issues in the history of writing literature in Spanish America. . . . It is the work of a consummate and recognized critic at the height of his powers."-- CÃ©sar A. Salgado, Associate Professor of Spanish and Portuguese, University of Texas at Austin Writing and violence have been inextricably linked in Spanish America from the Conquest onward. Spanish authorities used written edicts, laws, permits, regulations, logbooks, and account books to control indigenous peoples whose cultures were predominantly oral, giving rise to a mingled awe and mistrust of the power of the written word that persists in Spanish American culture to the present day. In this masterful study, AnÁbal GonzÁilez traces and describes how Spanish American writers have reflected ethically in their works about writing's relation to violence and about their own relation to writing. Using an approach that owes much to the recent "turn to ethics" in deconstruction and to the works of Jacques Derrida and Emmanuel Levinas, he examines selected short stories and novels by major Spanish American authors from the late nineteenth through the twentieth centuries: Manuel GutiÃ©rrez NÃ©jira, Manuel Zeno GandÃ¡a, Teresa de la Parra, Jorge

Luis Borges, Alejo Carpentier, Gabriel Garc a M rquez, and Julio Cort azar. He shows how these authors frequently display an attitude he calls "graphophobia," an intense awareness of the potential dangers of the written word.

Bibliografía cronológica de la lingüística, la gramática y la lexicografía del español (BICRES V) Mar 02 2023 Since the publication of the still very valuable *Biblioteca histórica de la filología* by Cipriano Muñoz y Manzano, conde de la Viñaza (Madrid, 1893), our knowledge of the history of the study of the Spanish language has grown considerably, and most manuscript and secondary sources had never been tapped before Hans-Josef Niederehe of the University of Trier courageously undertook the task to bring together any available bibliographical information together with much more recent research findings, scattered in libraries, journals and other places. The resulting *Bibliografía cronológica de la lingüística, la gramática y la lexicografía del español: Desde los principios hasta el año 1600* (BICRES) began appearing in 1994. BICRES I covered the period from the early

beginnings to 1600), followed by BICRES II (1601–1700), BICRES III (1701–1800), and together with Miguel Ángel Esparza Torres of Madrid there followed BICRES IV (1801 to 1860). Now, the fifth volume, has become available, covering the years from 1861 to 1899. Access to the bibliographical information of altogether 5,272 titles is facilitated by several detailed indexes, such as a short title index, a listing of printers, publishers and places of production, and an author index. More than twenty years of research in the major libraries of Spain and other European countries have gone into this unique work — relative sources of the Americas have also been covered — making it exhaustive source for any serious scholar of any possible aspect of the Spanish language.
