Revolutionary Power Shalanda Baker, 2021-01-14 In September 2017 Hurricane Maria hit Puerto Rico completely upending the energy grid of the small island The nearly year long power outage that followed vividly shows how the new climate reality intersects with race and access to energy The island is home to brown and black US citizens who lack the political power of those living in the continental US As the world continues to warm and storms like Maria become more commonplace it is critical that we rethink our current energy system to enable reliable locally produced and locally controlled energy without replicating the current structures of power and control In *Revolutionary Power* Shalanda Baker arms those made most vulnerable by our current energy system with the tools they need to remake the system in the service of their humanity She argues that people of color poor people and indigenous people must engage in the creation of the new energy system in order to upend the unequal power dynamics of the current system *Revolutionary Power* is a playbook for the energy transformation complete with a step by step analysis of the key energy policy areas that are ripe for intervention Baker tells the stories of those who have been left behind in our current system and those who are working to be architects of a more just system She draws from her experience as an energy justice advocate a lawyer and a queer woman of color to inspire activists working to build our new energy system Climate change will force us to rethink the way we generate and distribute energy and regulate the system But how much are we willing to change the system This unique moment in history provides an unprecedented opening for a deeper transformation of the energy system and thus an opportunity to transform society *Revolutionary Power* shows us how

Drawdown Paul Hawken, 2017-04-18 New York Times bestseller The 100 most substantive solutions to reverse global warming based on meticulous research by leading scientists and policymakers around the world At this point in time the *Drawdown* book is exactly what is needed a credible conservative solution by solution narrative that we can do it Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis Reported by effects include increased determination and a sense of grounded hope Per Espen Stoknes Author *What We Think About When We Try Not To Think About Global Warming* There's been no real way for ordinary people to get an understanding of what they can do and what impact it can have There remains no single comprehensive reliable compendium of carbon reduction solutions across sectors At least until now The public is hungry for this kind of practical wisdom David Roberts *Vox* This is the ideal environmental sciences textbook only it is too

interesting and inspiring to be called a textbook Peter Kareiva Director of the Institute of the Environment and Sustainability UCLA In the face of widespread fear and apathy an international coalition of researchers professionals and scientists have come together to offer a set of realistic and bold solutions to climate change One hundred techniques and practices are described here some are well known some you may have never heard of They range from clean energy to educating girls in lower income countries to land use practices that pull carbon out of the air The solutions exist are economically viable and communities throughout the world are currently enacting them with skill and determination If deployed collectively on a global scale over the next thirty years they represent a credible path forward not just to slow the earth s warming but to reach drawdown that point in time when greenhouse gases in the atmosphere peak and begin to decline These measures promise cascading benefits to human health security prosperity and well being giving us every reason to see this planetary crisis as an opportunity to create a just and livable world

Clearinghouse Review,1998

Right of Way Angie Schmitt,2020-08-27 The face of the pedestrian safety crisis looks a lot like Ignacio Duarte Rodriguez The 77 year old grandfather was struck in a hit and run crash while trying to cross a high speed six lane road without crosswalks near his son's home in Phoenix Arizona He was one of the more than 6 000 people killed while walking in America in 2018 In the last ten years there has been a 50 percent increase in pedestrian deaths The tragedy of traffic violence has barely registered with the media and wider culture Disproportionately the victims are like Duarte Rodriguez immigrants the poor and people of color They have largely been blamed and forgotten In Right of Way journalist Angie Schmitt shows us that deaths like Duarte Rodriguez's are not unavoidable accidents They don't happen because of jaywalking or distracted walking They are predictable occurring in stark geographic patterns that tell a story about systemic inequality These deaths are the forgotten faces of an increasingly urgent public health crisis that we have the tools but not the will to solve Schmitt examines the possible causes of the increase in pedestrian deaths as well as programs and movements that are beginning to respond to the epidemic Her investigation unveils why pedestrians are dying and she demands action Right of Way is a call to reframe the problem acknowledge the role of racism and classism in the public response to these deaths and energize advocacy around road safety Ultimately

Schmitt argues that we need improvements in infrastructure and changes to policy to save lives Right of Way unveils a crisis that is rooted in both inequality and the undeterred reign of the automobile in our cities It challenges us to imagine and demand safer and more equitable cities where no one is expendable **OECD Public Governance Reviews Estonia: Towards a Single Government Approach** OECD,2011-08-04 This review looks at how building on its significant accomplishments to date the Estonian public administration can work together as a single government to improve and sustain service delivery to citizens and to meet new challenges on the horizon
