Freshwater Prawn Culture Michael Bernard New, Wagner Cotroni Valenti, 2008-04-15 The farming of the freshwater prawn *Macrobrachium rosenbergii* has developed rapidly during recent years. Advances in techniques and the huge expansion of world demand for this species continue to stimulate the growth of a multi million dollar industry. This landmark publication is a compendium of information on every aspect of the farming of *M. rosenbergii*. A comprehensive review of the status of freshwater prawn farming, research, development and commercial practice, the book is intended to stimulate further advances in the knowledge and understanding of this important field. An extremely well known and internationally respected team of contributing authors have written cutting edge chapters covering all major aspects of the subject. Coverage includes biology, hatchery and grow out culture systems, feeds and feeding, up to date information on the status of freshwater prawn farming around the world, post harvest handling and processing, markets and economics and business management. Further chapters are devoted to the culture of other prawn species, prawn capture fisheries and the sustainability of freshwater prawn culture. Contributions to the book have been brought together and edited by Michael New and Wagner Valenti themselves, widely known for their work in this area. The comprehensive information in *Freshwater Prawn Culture* will give an important commercial edge to anyone involved in the culture and trade of freshwater prawns. Readership should include prawn farm personnel, business managers and researchers and invertebrate, freshwater and crustacean biologists. Copies of the book should be available on the shelves of all libraries in research establishments and universities where aquaculture and fisheries are studied and taught. Michael Bernard New OBE is a Past President of the World Aquaculture Society and President Elect of the European Aquaculture Society. Wagner Cotroni Valenti is a Professor at the Aquaculture Center, S o Paulo State University, Brazil.

Farming Freshwater Prawns Michael B. New, 2002 With coastal fisheries in decline around the world there is mounting concern about how long current sources of seafood can supply world needs Governments resource managers and those who make their livelihood on fishing are seeking better ways to improve fishing yields Many seek greater emphasis on restocking and aquaculture based stock enhancement as a way rapidly to replenish depleted fish stocks and increase fishery landings This volume presents case studies that represent various scenarios and situations in using sea ranching and marine hatchery enhancement to generate income re establish fisheries and conserve aquatic biodiversity The studies demonstrate that stocking can clearly work in some cases to increase fishery landings but that economic success will depend on many factors

Nursing of Freshwater Prawn Abdullah-Al-Mamun, Arshad Hossain, 2012-08 There has been a very rapid global expansion of freshwater prawn farming since 1990 this is mainly because of the huge production of China but also in the last few years because of a rapid take off of farming in India and Bangladesh Survival at the end of the nursery phase can vary substantially and may be related to the territorial and cannibalistic nature of prawn PLs when cultured at high densities Nursery production may be enhanced by the addition of artificial substrates Seed cost is a dominant variable cost in prawn production Thereby cost efficiency of nurseries significantly impacts the prices of stocker size juveniles which in turn has a dramatic influence on the profitability of prawn grow out Therefore investigation into potential benefits derived from using artificial substrates a study was conducted in recirculatory system to evaluate the effects of substrates on the growth and survival of *Macrobrachium rosenbergii* postlarvae PL Result of the present study indicated that growth of *M. rosenbergii* PLs improved in presence of artificial substrates but the artificial substrates did not improved survival
