The chilling tome that launched an entire genre of books about the often gruesome but always tragic ways people have died in our national parks, this updated edition of the classic includes calamities in Yellowstone from the past sixteen years, including the infamous grizzly bear attacks in the summer of 2011 as well as a fatal hot springs accident in 2000. In these accounts, written with sensitivity as cautionary tales about what to do and what not to do in one of our wildest national parks, Whittlesey recounts deaths ranging from tragedy to folly—from being caught in a

freak avalanche to the goring of a photographer who just got a little too close to a bison. Armchair travelers and park visitors alike will be fascinated by this important book detailing the dangers awaiting in our first national park. ([www.canammissing.com](http://www.canammissing.com)) Missing-411 is the first comprehensive book about people who have disappeared in the wilds of North America. It's understood that people routinely get lost, some want to disappear but this story is about the unusual. Nobody has ever studied the archives for similarities, traits and geographical clusters of missing people, until now. A tip from a national park ranger led to this three year, 7000+ hour investigative effort into understanding the stories behind people who have vanished. The book chronicles children, adults and the elderly who disappeared, sometimes in the presence of friends and relatives. As Search and Rescue personnel exhaust leads and places to search, relatives start to believe kidnappings and abductions have occurred. The belief by the relatives is not an isolated occurrence; it replicates itself time after time, case after case across North America. The research depicts 28 clusters of missing people across the continent, something that has never been exposed and was a shocking find to researchers. Topography does play a part into the age of the victims and certain clusters have specific age and sex consistency that is baffling. This is not a phenomenon that has been

occurring in just the last few decades, clusters of missing people have been identified as far back as the 1800's. The manuscript for the research was extremely large so the story was split between two books, Missing 411 Western United States and Canada and Missing 411 Eastern United States. The Eastern version will be released in late March and will include a list of all missing people in each edition and a concluding chapter that draws both books together for conclusions. Some of the issues that are discussed in each edition: \* The National Park Service attitude toward missing people \* How specific factors in certain cases replicate themselves in different clusters \* Exposing cases involving missing children that aren't on any national database \* Unusual behavior by bloodhounds/canines involved in the search process \* How storms, berries, swamps, briar patches, boulder fields and victim disabilities play a role in the disappearance \* The strategies of Search and Rescue personnel need to change under specific circumstances Major news organizations do a deplorable job of covering stories and issues which are deemed too unusual or too far outside the box. Chances are, they will find a way to trivialize or ignore the disturbing evidence accumulated by David Paulides, a former lawman turned investigative journalist. The paper trail uncovered by Paulides through sheer doggedness is impressive, the evidence indisputable. People

are vanishing without a trace from our national parks and forests, yet government agencies are saying nothing. At a minimum, this story deserves space on the frontpage of every newspaper in the country, and it warrants a formal high level inquiry by the federal agencies whose files leave little doubt that something very strange is unfolding in our wilderness. George Knapp, Host, Coast to Coast AM After reading this book, you will forever walk in the woods with a different awareness. Eight hours. Twelve contestants. A flight none of them might survive. A flight to Paris full of teenagers seeking opportunity turns deadly in this suspenseful, locked-door YA thriller. Perfect for fans of Diana Urban, Karen McManus, and Jessica Goodman. Seventeen-year-old boarding school student Emily Walters is selected for an opportunity of a lifetime—she'll compete abroad for a cash prize that will cover not only tuition to the college of her choice, but will lift her mother and her out of poverty. But almost from the moment she and 11 other contestants board a private jet to Europe, Emily realizes somebody is willing to do anything to win. Between keeping an eye on her best friend's flirty boyfriend and hiding her own dark secrets, she's not sure how she'll survive the contest, much less the flight. Especially when people start dying... As loyalties shift and secrets are revealed, Emily must figure out who to trust, and who's trying to kill them all, before she becomes the next victim. The

New York Times and Wall Street Journal Nonfiction Bestseller that explores the gripping Dyatlov Pass incident that took the lives of nine young Russian hikers in 1959. What happened that night on Dead Mountain? In February 1959, a group of nine experienced hikers in the Russian Ural Mountains died mysteriously on an elevation known as Dead Mountain. Eerie aspects of the mountain climbing incident—unexplained violent injuries, signs that they cut open and fled the tent without proper clothing or shoes, a strange final photograph taken by one of the hikers, and elevated levels of radiation found on some of their clothes—have led to decades of speculation over the true stories and what really happened. *Dead Mountain: The Untold True Story of the Dyatlov Pass Incident* delves into the untold story through unprecedented access to the hikers' own journals and photographs, rarely seen government records, dozens of interviews, and author Donnie Eichar's retracing of the hikers' fateful journey in the Russian winter. An instant historical nonfiction bestseller upon its release, this is the dramatic real story of what happened on Dead Mountain. **GRIPPING AND BIZARRE:** This is a fascinating portrait of young adventurers in the Soviet era, and a skillful interweaving of the hikers' narrative, the investigators' efforts, and the author's investigations. *Library Journal* hailed "the drama and poignancy of Eichar's solid depiction of this truly eerie and

enduring mystery." **FOR FANS OF UNSOLVED MYSTERIES:** Unsolved true crimes and historical mysteries never cease to capture our imaginations. The Dyatlov Pass incident was little known outside of Russia until film producer and director Donnie Eichar brought the decades-old mystery to light in a book that reads like a mystery. **FASCINATING VISUALS:** This well-researched volume includes black-and-white photographs from the cameras that belonged to the hikers, which were recovered after their deaths, along with explanatory graphics breaking down some of the theories surrounding the mysterious incident. Perfect for: Fans of nonfiction history books and true crime Anyone who enjoys real-life mountaineering and survival stories such as *Into Thin Air*, *Buried in the Sky*, *The Moth and the Mountain*, and *Icebound: Shipwrecked at the Edge of the World* Readers seeking Cold War narratives and true stories from the Soviet era The second book in the *Missing 411 State Series*. A close look at missing person cases in the state of Idaho that match *Missing 411* profile points. -- from Goodreads. The definitive guide to Bigfoot, Sasquatch, Yeti, and other man-primates from an established author and respected expert on the unexplained and paranormal. Does a hulking, hairy, 800-pound, nine-foot-tall, elusive primate roam the woods and forests throughout North America—and the world? What should we make of the grainy

videos and photos and the thousands of eyewitness reports? Audio-recordings exist purporting to be the creatures' eerie chatter and bone-chilling screaming. Whether called Sasquatch, Yeti, Bigfoot, or something else, bipedal primates appear in folklore, legends, and eyewitness accounts in every state of the union and many places around the world. The fascination with the man-beast is stronger than ever in today's pop culture. Exploring the history, movies, and literature, the conspiracy theorizing, and the world of the supernatural, *The Bigfoot Book: The Encyclopedia of Sasquatch, Yeti, and Cryptid Primates* is a comprehensive resource to the man-beast. With nearly 200 entries and 120 photographs, drawings, and illustrations, it is the definitive guide to understanding, hunting, and avoiding the brute, as well as discovering the facts behind the sightings and horrifying tales. It covers 400 years of folklore, mythology, history, and pop culture, including Native American lore, the "wild men" reports in the pages of 19th century-era American newspapers, Florida's Myakka Skunk Ape, Australia's Yowie, China's Yeren, Himalayas' Yeti, Russian expeditions, Harry and the Hendersons, *Exists* and the countless movies titled *Bigfoot*, as well as specials on the television shows *Animal Planet*, *Discovery Channel* and *National Geographic Channel*, scientific reports and findings, and much, much more. Various documentaries and reality television shows have all

superficially tackled the subject, but Nick Redfern presents a truly complete and comprehensive look at cryptid primates. It is a richly researched reference, overflowing with fascinating information to make readers think—and reconsider their next camping trip. Perfect for readers of Jon Krakauer and Douglas Preston, this "authentic and encyclopedic" book examines real-life cases of those who vanish in the wilderness without a trace (Roman Dial)—and those eccentric, determined characters who try to find them. These are the stories that defy conventional logic. The proverbial vanished without a trace incidences, which happen a lot more (and a lot closer to your backyard) than almost anyone thinks. These are the missing whose situations are the hardest on loved ones left behind. The cases that are an embarrassment for park superintendents, rangers and law enforcement charged with Search & Rescue. The ones that baffle the volunteers who comb the mountains, woods and badlands. The stories that should give you pause every time you venture outdoors. Through Jacob Gray's disappearance in Olympic National Park, and his father Randy Gray who left his life to search for him, we will learn about what happens when someone goes missing. Braided around the core will be the stories of the characters who fill the vacuum created by a vanished human being. We'll meet eccentric bloodhound-

handler Duff and R.C., his flagship purebred, who began trailing with the family dog after his brother vanished in the San Gabriel Mountains. And there's Michael Neiger North America's foremost backcountry Search & Rescue expert and self-described "bushman" obsessed with missing persons. And top researcher of persons missing on public wildlands Ex-San Jose, California detective David Paulides who is also one of the world's foremost Bigfoot researchers. It's a tricky thing to write about missing persons because the story is the absence of someone. A void. The person at the heart of the story is thinner than a smoke ring, invisible as someone else's memory. The bones you dig up are most often metaphorical. While much of the book will embrace memory and faulty memory—history—*The Cold Vanish* is at its core a story of now and tomorrow. Someone will vanish in the wild tomorrow. These are the people who will go looking. ([www.canammissing.com](http://www.canammissing.com)) *Missing 411-The Devil's in the Detail*. Missing 411- A Sobering Coincidence is the fifth book in the acclaimed series about people who have mysteriously disappeared. The books have been vetted by some of the top journalists in the world with statements such as; "David Paulides has shined a light onto one of the greatest and most disturbing mysteries of our time." Another comment; "The paper trail uncovered by Paulides through sheer doggedness is impressive, the evidence indisputable." Survivorman Les Stroud was interviewed about the series and stated, "Paulides presents pure facts. Facts that can't be disputed." The author continues with his profile points involving the disappearances and applies them to a series of incidents involving young men and women, mostly college age. Many of the victims vanished within the confines of their college or university town. These individuals were brilliant scholars, athletes and stellar people in their community. They disappear under unusual circumstances and are often found in areas that were previously searched. Medical examiners in these cases often cannot determine the cause of death. Many times the victim was recovered in water, yet autopsies show the body was not in the water the entire time the victim was missing. The majority of the families in these

cases believe their loved ones were abducted and held, then later dumped in the water. These allegations are generally ignored by authorities until pressured by facts presented through secondary autopsies that families requested and paid for. This is a chilling and shocking series of stories that will cause many parents and young people to rethink their nighttime activities. Missing 411- Off The Grid Missing 411- Off The Grid is the seventh book in the best selling series about missing people. The books are based on actual law enforcement, search and rescue and archived reports of incidents. The author has based the narrative on

delivering the facts and not making unsubstantiated claims. Thousands of case files were reviewed and what's presented are incidents that fit narrow criteria of established profile points. According to the Urban Dictionary, Off the Grid means, "untraceable through normal means." The individuals that are documented in this seventh book of the Missing 411 series fit this definition to perfection. The disappearances involve physicists, physicians, professors, hikers, hunters, children, and joggers. Cases from thirty states, six Canadian provinces and five countries are included. Each of these stories is new to the Missing 411 series. Disappearances from national parks, forests and open spaces that have never been discussed or compared to similar instances are included. Updated tables from past books assist the reader in understanding the vast numbers of missing that fit the established profile. Early reviewers of this book have called it the most intriguing and thought-provoking of the series. Author David Paulides is an investigative reporter, twenty-year police officer/detective and the director of the Canam Missing Project ([www.canammissing.com](http://www.canammissing.com)), the organization behind the search for understanding the missing person issue. He recently released a movie based on the books, Missing 411, which a former LA Magazine and NBC movie critic rated it the best documentary for 2017. He has presented his findings to the most attended annual search

and rescue conference in the world, NASAR and has spoken at hundreds of seminars, symposiums, and meetings. Mr. Paulides has a bachelors and masters degree from the University of San Francisco and currently resides in Denver. Except that with running a business, comes an inordinate amount of responsibilities. Like making sure everything keeps running and your people are paid. Worrying about the longevity of his company, Felix begins to expand into other cities. Further research into Middle America bigfoot sightings indicates a strong connection between bigfoot and Native Americans, and witness descriptions show a strong human likeness. The latest research from the author of the groundbreaking *The Hoopa Project: Bigfoot Encounters in California* named 2008 Bigfoot Book of the Year by *Cryptomundo.com*. Dave Paulides brings his law-enforcement investigative and analytical skills to an expanded area of research: the counties in Northern California that

have reported the greatest numbers of bigfoot occurrences, and beyond to Minnesota and Oklahoma. Gaining access to many people who have never discussed their bigfoot experiences publicly before now, the author obtains intriguing details that broaden our perception of the elusive creature; and his subsequent analysis leads to the discovery of a strong and consistent link between bigfoot and the Native American community. The expert interview and artistic skills of forensic artist Harvey Pratt help to define the creatures described by the witnesses - - once again with astonishing and illuminating results. The presentation of startling new forensic evidence indicates that there truly is an as-yet-unidentified primate living in the wilds of North America, and the author hints at new data on the horizon that will finally provide the tantalizing truth about the existence of bigfoot in North America. traditions throughout history • Examines beliefs from many different cultures on the soul, heaven, hell, and reincarnation; instructions for accessing the different worlds of the afterlife; how one may become a god; and how ethics and the afterlife may not be connected • Explores techniques to communicate with the dead, including séance instructions • Includes an extensive bibliography of more than 900 sources from around the world

Drawing on death and afterlife traditions from cultures around the world, Mark Mirabello explores the many forms of existence beyond death and each tradition's instructions to access the afterlife. He examines beliefs on the soul, heaven, hell, and reincarnation and wisdom from Books of the Dead such as the Book of Going Forth by Day from Egypt, the Katha Upanishad from India, the Bardo Thodol from Tibet, the Golden Orphic Tablets from Greece, Lieh Tzu from China, and Heaven and its Wonders and Hell from Things Heard and Seen from 18th-century Europe. Considering the question "What is Death?" Mirabello provides answers from a wide range of ancient and modern thinkers, including scientist Nicholas Maxwell, the seer Emanuel Swedenborg, 1st-century Buddhist philosopher Nagarjuna, and Greek philosopher Euripides, who opined that we may already be dead and only dreaming we are alive. He explores the trek of the soul through life and death with firsthand accounts of the death journey and notes that what is perceived as death here

may actually be life somewhere else. He reveals how, in many traditions, ethics and the afterlife are not connected and how an afterlife is possible even without a god or a soul. Sharing evidence that consciousness is not simply a product of the brain, he offers a strong rebuttal to nihilists, materialists, and the Lokayata philosophical school of India who believe in the "finality" of death. He explains how specters and ghosts are produced and offers techniques to communicate with the dead as well as instructions for an out-of-body experience and the complete procedure for a séance. With an extensive bibliography of more than 900 sources, this guide offers comprehensive information on afterlife beliefs from the vast majority of cultures around the world and throughout history--a veritable "traveler's guide" to the afterlife. Some of the most visited national parks in the country have a dark side. Aside from crowds of hikers, campers, and general tourists, there's a dark side to these three locations in California; the famous Yosemite, Joshua Tree and Mount Shasta. From strange disappearances, grisly murders and bone-chilling paranormal hauntings and ghost sightings; these pristine locales have a lot more to offer than just serene hiking trails or camping. In this second installment of National Park Mysteries & Disappearances, Steve Stockton, along with Bill Melder, presents the reader with a side to these locations you've never heard before. So, put aside your nature

guidebooks, forget about the pretty leaves, and the relaxing streams as well as the miniature golf, the funnel cakes and all the other "tourist traps" and prepare for a wild ride on the dark side of these major national parks. ([www.canammissing.com](http://www.canammissing.com)) This is the third "Missing 411" book researching facts of people who have vanished in remote locations of the world. "Missing 411-North America and Beyond" is the first edition that discusses missing people and relevant facts from five countries (Australia, England, France, Iceland and Indonesia) outside of North America and examines the parallels between the cases. The book also includes a multitude of new stories from North America. There is a continuing trend of clusters of missing people in United States National Parks. The National Park Service has continued with their policy of failing to keep ledgers, track or otherwise document lists of missing people inside their parks and monuments. This edition has cases from Florida, Texas, Hawaii and forty other states. There are new clusters of missing people from Sequoia and Mount Rainier National Park, Three Sisters Wilderness (OR) and Adirondacks (NY). Canada has missing cases from six provinces that are documented. This new book brings further clarity to the missing person issue by examining multiple disappearances of people in small-confined areas and exposing the similarities of their case. David Paulides also

exposes a series of coed disappearances that date back to the early 1900's, which have unusual facts surrounding their case. "Missing 411-North America and Beyond" is the largest and most comprehensive of the trilogy, 472 pages. The Missing 411 series builds upon itself. It is recommended that you read "Missing 411-Western United States" first, then the eastern version and then "North America and Beyond." There is a historical aspect to this issue and there are common elements that run through the disappearances.

\*\*\*\*\*One of the early reviews of "Missing 411-North America and Beyond" was written by New York Times Best Selling author Whitley Strieber: David Paulides has shined a light onto one of the greatest and most disturbing mysteries of our time: the simple and awful fact that people disappear, especially in our national parks, and little effort is made to find them, let alone inform the public about the danger. Even when massive searches are mounted, and people are found, the events surrounding their loss and recovery are often far beyond logical explanation. This is the most comprehensive and expertly presented series of books on the subject ever written, and the latest volume, which includes stories from five countries, is sobering, chilling and far too well researched to ignore. It also includes an 80 page word document that is a master index for the 16 years The Track Record was produced. This is the single greatest index in any cryptozoology book, CD, DVD, anything! You can spend weeks browsing the CD that we have produced. The accumulation of Track Records is truly a Bigfoot Encyclopedia with an extensive cross reference via the index. "The Track Record" was a monthly newsletter produced by Ray Crowe (Hillsboro, OR) over a 16-year time span, July 1991-August 2007. Ray did a fantastic job documenting various aspects of Bigfoot/Sasquatch that will not appear anywhere else. Ray not only centered his work on Bigfoot/Sasquatch, he also included stories on Yowie, Yeti, Almasti, Loch Ness Monster, UFO's, Chupacabras, etc. We know that you will find this as a centerpiece for all Bigfoot related research. In 2007 North America Bigfoot Search (NABS) purchased the research, documents, writings, copyrights and trademarks associated with Ray Crowe and his two organizations. We immediately made a decision that the Track Record was an extremely valuable document for Bigfoot Researchers and we embarked on a path to put the newsletters on a CD for reference purposes. This project was completed in 2009. The greatest contribution that NABS made to the Track

Record was the development of an index for all of the newsletters. The index is 95,000 words and 80 pages in length. There is no other index in all of Cryptozoology that comes close to what NABS has established. Every major category, state, country and crypto subject is in the index. The CD is PC and MAC compatible. God only knows what possessed Bill Bryson, a reluctant adventurer if ever there was one, to undertake a gruelling hike along the world's longest continuous footpath—The Appalachian Trail. The 2,000-plus-mile trail winds through 14 states, stretching along the east coast of the United States, from Georgia to Maine. It snakes through some of the wildest and most spectacular landscapes in North America, as well as through some of its most poverty-stricken and primitive backwoods areas. With his offbeat sensibility, his eye for the absurd, and his laugh-out-loud sense of humour, Bryson recounts his confrontations with nature at its most uncompromising over his five-month journey. The books have revealed the names and facts behind people who have disappeared in the national parks and forests of the world. The identification of over 59 geographical clusters of missing people in North America is one of the mysterious, unsettling and unexplained elements in the Missing 411 series. Missing 411- Hunters explains a subset of the research and documents 148 cases of hunters who have vanished in four countries. The incidents parallel other disappearances documented in prior Missing 411 books. The

vast majority of the cases in this edition are new and they don't appear in other books in the series. The mystery and stories of the victims will baffle and confound the avid outdoorsman and seasoned hunter. She chaperoned baby sea turtles on their journey to sea. She pursued bad guys on her galloping patrol horse. She jumped into rescue helicopters bound for the heart of the Grand Canyon. She won arguments with bears. She slept with a few too many rattlesnakes. Hell yeah, it was the best job in the world! Fortunately, Andrea survived it. In this graphic and yet surprisingly funny account of her and others' extraordinary careers, Lankford unveils a world in which park rangers struggle to maintain their idealism in the face of death, disillusionment, and the loss of a comrade killed while holding that thin green line between protecting the park from the people, the people from the park, and the people from each

other. Ranger Confidential is the story behind the scenery of the nation's crown jewels—Yosemite, Grand Canyon, Yellowstone, Great Smokies, Denali. In these iconic landscapes, where nature and humanity constantly collide, scenery can be as cruel as it is redemptive. People in the Woods are disappearing.... hikers missing in national parks, people lost to the woods never to return, people taken.... never found again... Natural predators can lurk in the wilderness; bears, mountain lions, cougars, and occasionally a hiker will be victim to these wild animals. They feed where they kill or drag their bloody victim to a nearby lair; they leave a trail that is obvious to searchers. However, the victims in this book show no evidence of an animal attack. For these victims, there is no logical explanation.... only cryptic mysteries, enigma and many unanswered questions... Baffling, strange, and cryptic cases. Based on True Stories. Bestselling Author Steph Young has appeared on radio shows including Coast to Coast AM, telling creepy unexplained mysteries of stories that come from her books, and her Podcast; Unexplained Mysteries with Steph Young. MISSING 411 - People missing in the WOODS David Paulides and Chris Williams Unexplained mysteries, thriller stories, detective missions, dogs strange behavior and more terrifying unsolved cases The author of the controversial bestseller Brain Trust brings his scientific expertise to the chilling true story of unexplained phenomena on Utah's Skinwalker Ranch -- and challenges us with a new vision of reality. For more than fifty years, the bizarre events at a remote Utah ranch have ranged from the perplexing to the wholly terrifying. Vanishing and mutilated cattle. Unidentified Flying Objects. The appearance of huge, otherworldly creatures. Invisible objects emitting magnetic fields with the power to spark a cattle stampede. Flying orbs of light with dazzling maneuverability and lethal consequences. For one family, life on the Skinwalker Ranch had become a life under siege by an unknown enemy or enemies. Nothing else could explain the horrors that surrounded them -- perhaps science could. Leading a first-class team of research scientists on a disturbing odyssey into the unknown, Colm Kelleher spent hundreds of days and nights on the Skinwalker property and experienced firsthand many of its haunting mysteries. With investigative reporter George Knapp -- the only journalist allowed to witness and document the team's work -- Kelleher chronicles in superb detail the spectacular

happenings the team observed personally, and the theories of modern physics behind the phenomena. Far from the coldly detached findings one might expect, their conclusions are utterly hair-raising in their implications. Opening a door to the unseen world around us, *Hunt for the Skinwalker* is a clarion call to expand our vision far beyond what we know. Wildlife author and photographer of more than thirty books (including *The Encyclopedia of Deer*, *The Deer Hunter's Illustrated Dictionary*, and *Whitetails*), Leonard Lee Rue III provides the most comprehensive reference on whitetail deer ever published. This book will appeal to anyone remotely interested in whitetails and other deer: nature buffs, deer lovers, deer haters, gardeners, farmers, photographers, biologists, mammalogists, highway troopers, and--not least--deer hunters, who will find a wealth of material that will improve their understanding and appreciation of their quarry. In spite of the manuscript's astounding thoroughness, Rue keeps the text short and clear to allow room for hundreds of his extraordinary photos, illustrating virtually every aspect of whitetail behavior, physiology, and more. Outdoors author Neil Soderstrom "[has] never encountered a manuscript as interesting and comprehensive on whitetails or any other species. Most information in this book is entirely new.... This is a very good read, its factual material gracefully presented and richly enlivened by [Rue's] personal

observations and good humor." Even if your bookshelf is already full of titles about whitetails, this new addition has breaking research that is necessary for anyone interested in whitetail deer. ([www.canammissing.com](http://www.canammissing.com)) People have been disappearing under mysterious circumstances for centuries. During the last 150 years the media has covered many of these cases and has attempted to put a rational spin on a very unusual event. After 3+ years and 7000 hours of intensive research there is a new paradigm being presented on people missing in the wilds of North America. "Missing 411" identifies 28 clusters of missing people who have vanished in remote areas of the continent. The finding is a troubling fact questioning why and how these people have disappeared. Some of the victims are found and tell a very interesting and mind bending story of their experience, others are never found, a fact that confounds searchers and law enforcement. There are many children that have disappeared under highly unusual circumstances. After weeks of searching and failing to find any evidence of the child being in a remote location, many parents and law enforcement draw the conclusion that the victim was kidnapped, yes, taken by someone lurking in remote areas of our national parks, forests, farms and even ranches. There are two editions of this research, "Missing 411-Eastern United States" and "Missing 411-Western United States." The eastern United

States copy has a list of every person who is listed in each book as well as a final conclusion to the investigation. You will be shocked by the lack of interest and documentation that many of our governmental bodies have committed to missing people. After reading these books you will never look at our wildlands the same. Chapters; 1. Introduction 1 A. Clusters 1 B. Unique Factors in Disappearances 2. Missing People 3. Index" Major news organizations do a deplorable job of covering major stories and issues which are deemed too unusual or too far outside the box. Chances are, they will find a way to trivialize or ignore the disturbing evidence accumulated by David Paulides,

a former law man turned investigative journalist. The paper trail uncovered by Paulides through sheer doggedness is impressive, the evidence indisputable. People are vanishing without a trace from our national parks and forests, yet government agencies are saying nothing. At a minimum, this story deserves space on the front page of every newspaper in the country, and it warrants a formal high level inquiry by the federal agencies whose files leave little doubt that something very strange is unfolding in our wilderness."George Knapp, Host, Coast to Coast AM
