## Installation and Operation Instructions

### 9A20400X Urology Accessory

#### Installation

1. Position the table at a convenient working height with the tilt fully up and the back and foot fully down.
2. Disconnect the power cord from the electrical receptacle.

#### DANGER

Failure to disconnect the table power cord from the power supply could result in personal injury or equipment damage.

3. Remove the upholstered seat and allow it to rest against the back.
4. Remove the (4) screws from the seat board assembly, and remove the seat board assembly from the seat weldment.
5. Remove the (4) nuts that retain the drain pan assembly, and remove the drain pan assembly from the seat weldment.
6. Assemble the washers (three on each front stud and one on the right rear stud, item A) on the urology pan holder assembly, as shown in Figure 1. Then locate the urology pan holder assembly studs in the holes in the seat weldment. Position the hose guide slot around the left rear stud, as shown in Figure 2. Install and tighten the screw for the hose guide and the nuts (removed from the drain pan assembly in Step 5) on the urology pan holder assembly.
7. If the standard container is to be used, cut the hose length to 47". If a floor drain or another container is to be used, size the hose with the pan in its extended position with the table at its maximum height. Assemble the clamp to one end of the hose, assemble the end of the hose with the clamp to the drain pan and tighten the clamp. Insert the free end of the hose through the slot in the pan holder, under the hose guide, through the access hole in the seat weldment, and under the back weldment. Insert the drain pan into the pan holder and the screen (with its handles up) into the pan.
8. Assemble the hose clip to the free end of the hose. If the hose is to be inserted in a floor drain or any container other than the standard container, the end of hose must be above the fluid level in order for the pan to drain properly.
9. Refer to the base rail installation instructions to install the base rail, if necessary.

10. Assemble the container bracket to the base rail on the side of the table where the container will be most accessible or where it will interfere the least with patient care delivery.

FIGURE 1

FIGURE 2

11. With the opening of the container bracket toward the back of the table, insert the (2) screws through the slots in the container bracket. Tighten the screws to clamp the container bracket to the base rail, as shown in Figure 3.
