**The Ray Cummings MEGAPACK®: 25 Golden Age Science Fiction and Mystery Tales** Apr 14 2024 To anyone interested in the roots of modern science fiction, the name of Ray Cummings should be well known. He wrote science fiction and fantasy before the name "science fiction" had been coined, publishing fantastic yarns in Argosy, Munsey's Magazine, and other mainstream pulp magazines. Of course, as soon as the science fiction pulps debuted, he moved to them, where his work received a hearty welcome from fans. Cummings publishing more than 750 novels and short stories over his long career, producing work in many genres, including the mystery field (see "Atom Boy" in this Megapack for one prime example). We are pleased to showcase 25 of his tales, ranging from science fiction to fantasy to mystery...more than 1,500 pages of great reading! Included are: THE GIRL IN THE GOLDEN ATOM (1919-1920) THE GIRL IN THE GOLDEN ATOM, PART 2 THE SILVER VEIL (1921) THE FIRE PEOPLE (1922) TWO PROPOSALS (1923) JETTA OF THE LOWLANDS (1930) THE WHITE INVADERS (1931) REQUIEM FOR A SMALL PLANET (1958) BRIGANDS OF THE MOON (1931) WANDL THE INVADER (1932) TARRANO THE CONQUEROR (1930) PHANTOMS OF REALITY (1930) DR. FEATHER IN "A SHOT IN THE DARK" (1936) DR. FEATHER IN "MURDER IN THE FOG" (1937) DR. FEATHER IN "THE DEAD MAN LAUGHS" (1938) DR. FEATHER IN "CLUE IN CRIMSON" (1943) THE WORLD BEYOND (1938) GADGET GIRL (1944) PRECIPICE (1945) PHOTOGRAPH OF DEATH (1945) STAMP OF DOOM (1946) THE SCALPEL OF DOOM (1947) ATOM BOY (1947) THE LIFTED VEIL (1947) BEYOND THE VANISHING POINT (1958) THE GIRL FROM INFINITE SMALLNESS (1940) PLANET STORIES' FEATURE FLASH: MEET RAY CUMMINGS And don't forget to search this ebook store for "Wildside Megapack" to see more entries in the series, covering science fiction, fantasy, horror, mysteries, westerns -- and much, much more!

Everything I Need to Know About Love I Learned From a Little Golden Book Aug 14 2021 The perfect gift for adults who aren't ready to grow up. Next in the EVERYTHING I NEED TO KNOW... series comes a book perfect for your valentine, your family, or YOU. Charming and witty as ever, this new treasury of insights reveals that, for all the love-related mystery and confusion we face as adults, those Little Golden Books may have had the answers all along.

**Science is Golden** Aug 06 2023 Gold, gold, gold for Australia's mega-selling scientist's 27th book... 'Nullius in verba', the Royal Society's motto, roughly translated, means 'take nobody's word for it'. Why not do the experiment for yourself and see the reality of nature. Don't trust authority - trust nature. Does cranberry juice cure urinary tract infections? Is the hookah really a safer way to smoke? Will the Large Hadron Collider destroy the Earth and the Universe? Is the purpose of the peacock's tail to attract females? And in the unlikely event of a plane crash, are some seats safer than others? the human hand has 27 bones; Uranus has 27 moons; 27 is a perfect cube, being 3 x 3 x 3; and in this, Dr Karl's 27th book, he takes us on another exploration of the dazzling world of science.

*Global Marine Science and Carlsberg - The Golden Connections of Johannes Schmidt (1877-1933)* Oct 08 2023 In Global Marine Science and Carlsberg Bo Poulsen examines the life and work of the renowned Danish marine scientist, Johannes Schmidt (1877-1933) who made landmark discoveries such as the breeding place of the Atlantic eel in the Sargasso Sea while working for Carlsberg.

**Arab Science and Invention in the Golden Age** May 11 2021 Relates strongly to two big news topics -- the Arab world and interdisciplinary science education.

**Three Men in a Boat Illustrated** Dec 10 2023 Three Men in a Boat published in 1889, is a humorous account by English writer Jerome K. Jerome of a two-week boating holiday on the Thames from Kingston upon Thames to Oxford and back to Kingston. The book was initially intended to be a serious travel guide, with accounts of local history along the route, but the humorous elements took over to the point where the serious and somewhat sentimental passages seem a distraction to the comic novel. One of the most praised things about Three Men in a Boat is how undated it appears to modern readers - the jokes have been praised as fresh and witty

Life Science Ethics Sep 14 2021 Does nature have intrinsic value? Should we be doing more to save wilderness and ocean ecosystems? What are our duties to future generations of humans? Do animals have rights? This revised edition of "Life Science Ethics" introduces these questions using narrative case studies on genetically modified foods, use of animals in research, nanotechnology, and global climate change, and then explores them in detail using essays written by nationally-recognized experts in the ethics field. Part I introduces ethics, the relationship of religion to ethics, how we assess ethical arguments, and a method ethicists use to reason about ethical theories. Part II demonstrates the relevance of ethical reasoning to the environment, land, farms, food, biotechnology, genetically modified foods, animals in agriculture and research, climate change, and nanotechnology. Part III presents case studies for the topics found in Part II.

The Mathematics of Harmony Nov 28 2022 Assisted by Scott Olsen (Central Florida Community College, USA) This volume is a result of the author's four decades of research in the field of Fibonacci numbers and the Golden Section and their applications. It provides a broad introduction to the fascinating and beautiful subject of the "Mathematics of Harmony," a new interdisciplinary direction of modern science. This direction has its origins in "The Elements" of Euclid and has many unexpected applications in contemporary mathematics (a new approach to a history of mathematics, the generalized Fibonacci numbers and the generalized golden proportions, the "golden" algebraic equations, the generalized Binet formulas, Fibonacci and "golden" matrices), theoretical physics (new hyperbolic models of Nature) and computer science (algorithmic measurement theory, number systems with irrational radices, Fibonacci computers, ternary mirror-symmetrical arithmetic, a new theory of coding and cryptography based on the Fibonacci and "golden" matrices). The book is intended for a wide audience including mathematics teachers of high schools, students of colleges and universities and scientists in the field of mathematics, theoretical physics and computer science. The book may be used as an advanced textbook by graduate students and even ambitious undergraduates in mathematics and computer science.

**Botanical Art from the Golden Age of Scientific Discovery** May 23 2022 Throughout the nineteenth and twentieth centuries, wall charts were a familiar classroom component, displaying scientific images at a large scale, in full color. But it's only now that they've been superseded as a teaching tool that we have begun to realize something their ubiquity hid: they are stunning examples of botanical art at its finest. This beautifully illustrated oversized book gives the humble wall chart its due, reproducing more than two hundred of them in dazzling full color. Each wall chart is accompanied by captions that offer accessible information about the species featured, the scientists and botanical illustrators who created it, and any particularly interesting or innovative features the chart displays. And gardeners will be pleased to discover useful information about plant anatomy and morphology

and species differences. We see lilies and tulips, gourds, aquatic plants, legumes, poisonous plants, and carnivorous plants, all presented in exquisite, larger-than-life detail. A unique fusion of art, science, and education, the wall charts gathered here offer a glimpse into a wonderful scientific heritage and are sure to thrill naturalists, gardeners, and artists alike.

**The Cumulative Book Index** Sep 07 2023 A world list of books in the English language.

*ENCYCLOPAEDIA BRITANNICA; Or, A DICTIONARY of Arts and Sciences, Compiled Upon a New Plan. In Which the Different Science and Arts are Digested Into Distinct Treatises Or Systems; and The Various Technical Terms, ... are Explained as They Occur in the Order of the Alphabet.*

*Illustrated with One Hundred and Sixty Copperplates, by a Society of Gentlemen in Scotland. IN THREE VOLUMES. Edinburgh: Printed for A. Bell and C. Macfarquhar; and Sold by Colin Macfarquhar, at this Printing-office, Nicolson Street. M.D.CC.LXXI.* Jul 13 2021

Supramolecular Gold Chemistry Jul 25 2022 This book is about supramolecular gold chemistry. This book provides a unique international forum aimed at covering a broad description of results involving the supramolecular chemistry of gold with a special focus on the gold–sulfur interface leading to hybrid materials ranging from gold–thiolate complexes to thiolate-protected gold nanoclusters and gold–thiolate supramolecular assemblies or nanoparticles. The role of thiolates on the structure and optical features of gold nanohybrid systems (ranging from plasmonic gold nanoparticles and fluorescent gold nanoclusters to self-assembled Au-containing thiolated coordination polymers) is highlighted in the 12 papers presented in this book.

**The Golden Bull** Feb 17 2022 A brother and sister's search for a new life and new home . . . 5,000 years ago in ancient Mesopotamia during a terrible drought, Jomar and Zefa's father must send his children away to the city of Ur because he can no longer feed them. At fourteen, Jomar is old enough to apprentice with Sidah, a master goldsmith for the temple of the moon god, but there is no place for Zefa in Sidah's household. Zefa, a talented but untrained musician, is forced to play her music and sing for alms on the streets of Ur. Marjorie Cowley vividly imagines the intrigues, and harsh struggle for survival in ancient Mesopotamia.

*Dan Yaccarino's Mother Goose* Jul 05 2023 POPULAR ILLUSTRATOR DAN Yaccarino brings his unique style to the familiar realm of Mother Goose. His witty, bold graphics, set in the city, give the rhymes a fresh perspective. In this lush jacketed hardcover edition, Little Miss Muffet flips her curds and whey when she meets a spider at the diner, and Mary's little lamb hails a cab to follow Mary to school!

**GRE Verbal Workbook** Jan 11 2024 Kaplan's GRE Verbal Workbook provides hundreds of realistic practice questions to help you get comfortable and confident with the Verbal section of the test. We're so confident that GRE Verbal Workbook offers all the practice you need to excel on the GRE that we guarantee it: After studying with our book, you'll score higher on the GRE—or you'll get your money back. The Best Practice Hundreds of realistic questions and drills, including new practice questions for this edition Six full-length Verbal Reasoning practice sets Diagnostic tool for even more targeted Verbal practice Review of essential skills and concepts, including vocabulary Key strategies for all Verbal Reasoning question types on the revised GRE Essay-writing tips and strategies for the Analytical Writing section Expert Guidance We know the test: The Kaplan team has spent years studying every GRE-related document available to ensure our practice materials are true to the test Our books and practice questions are written by veteran GRE teachers who know students—every explanation is written to help you learn We invented test prep—Kaplan (www.kaptest.com) has been helping students for 80 years, and our proven strategies have helped legions of students achieve their dreams

**Seven of Nine** Jun 04 2023 Discover the astonishing story of Seven of Nine—one of the most fascinating and unforgettable characters in Star Trek history. Once she was Annika Hansen, an innocent child assimilated by the fearsome, all-conquering Borg. Now she is Seven of Nine, a unique mixture of human biology and Borg technology. Cut off from the collective that has been her only reality for most of her existence, and forced to join the crew of the USS Voyager, she must come to grips with her surprising new environment—and her own lost individuality. Seven of Nine has already captured the imagination of fans all over the world. Now the most sensational new character of the twenty-fourth century stars in her first full-length novel. Resistance is futile.

*Arihant CBSE Science Term 2 Class 9 for 2022 Exam (Cover Theory and MCQs)* Feb 12 2024 With the newly introduced 2 Term Examination Pattern, CBSE has eased out the pressure of preparation of subjects and cope up with lengthy syllabus. Introducing Arihant's CBSE TERM II – 2022 Series, the first of its kind that gives complete emphasis on the rationalized syllabus of Class 10th & 12th. The all new “CBSE Term II 2022 – Science” of Class 9th provides explanation and guidance to the syllabus required to study efficiently and succeed in the exams. The book provides topical coverage of all the chapters in a complete and comprehensive manner. Covering the 50% of syllabus as per Latest Term wise pattern 2021-22, this book consists of: 1. Complete Theory in each Chapter covering all topics 2. Case-Based, Short and Long Answer Type Question in each chapter 3. Coverage of NCERT, NCERT Exemplar & Board Exams’ Questions 4. Complete and Detailed explanations for each question 5. 3 Practice papers based on the entire Term II Syllabus. Table of Content Atoms and Molecules, Structures of Atoms, Gravitation, Work and Energy, Why Do we fall ill?, Practice Papers (1-3).

*Science Is Golden* May 15 2024 Encourages a self-teaching approach to elementary science, in which critical thinking and problem solving skills are used to enhance what is learned in the classroom.

**Western Esotericism and the Science of Religion** Mar 21 2022 This volume is based upon papers read during the innovative section "Western Esotericism and the Science of Religion" organized at the 17th International Congress of the International Association for the History of Religions (IAHR) in Mexico City, August 5-12, 1995. The section was created in order to fill a long-standing hiatus in the academic study of religions: whereas phenomena such as gnosticism and hermetism in antiquity, and even the occult sciences of that period, have long been recognized as subjects worthy of serious investigation, the history of similar and related phenomena in more recent periods has hardly received the same measure of scholarly attention and recognition. The present volume is devoted to the academic emancipation of these areas as constituting a legitimate domain of research, which may be referred to by the generic label "western esotericism". Preceded by an introductory essay on the birth of this new discipline in the study of religion, the volume provides a sample of current research in the field and devotes special attention to some central methodological questions.

**Green to Gold** Dec 18 2021 From the Publishers Weekly review: "Two experts from Yale tackle the business wake-up-call du jour—environmental responsibility—from every angle in this thorough, earnest guidebook: pragmatically, passionately, financially and historically. Though "no company the authors know of is on a truly long-term sustainable course," Esty and Winston label the forward-thinking, green-friendly (or at least green-acquainted)

companies WaveMakers and set out to assess honestly their path toward environmental responsibility, and its impact on a company's bottom line, customers, suppliers and reputation. Following the evolution of business attitudes toward environmental concerns, Esty and Winston offer a series of fascinating plays by corporations such as Wal-Mart, GE and Chiquita (Banana), the bad guys who made good, and the good guys-watchdogs and industry associations, mostly-working behind the scenes. A vast number of topics huddle beneath the umbrella of threats to the earth, and many get a thorough analysis here: from global warming to electronic waste "take-back" legislation to subsidizing sustainable seafood. For the responsible business leader, this volume provides plenty of (organic) food for thought. "

**The Golden Ticket** Jun 23 2022 The P-NP problem is the most important open problem in computer science, if not all of mathematics. Simply stated, it asks whether every problem whose solution can be quickly checked by computer can also be quickly solved by computer. The Golden Ticket provides a nontechnical introduction to P-NP, its rich history, and its algorithmic implications for everything we do with computers and beyond. Lance Fortnow traces the history and development of P-NP, giving examples from a variety of disciplines, including economics, physics, and biology. He explores problems that capture the full difficulty of the P-NP dilemma, from discovering the shortest route through all the rides at Disney World to finding large groups of friends on Facebook. The Golden Ticket explores what we truly can and cannot achieve computationally, describing the benefits and unexpected challenges of this compelling problem.

**Bioinformatics for Plant Research and Crop Breeding** Apr 02 2023 Explore and advance bioinformatics and systems biology tools for crop breeding programs in this practical resource for researchers Plant biology and crop breeding have produced an immense amount of data in recent years, from genomics to interactome and beyond. Bioinformatics tools, which aim at analyzing the vast quantities of data produced by biological research and processes, have developed at a rapid pace to meet the challenges of this vast data trove. The resulting field of bioinformatics and systems biology is producing increasingly rich and transformative research. Bioinformatics for Plant Research and Crop Breeding offers an overview of this field, its recent advances, and its wider applications. Drawing on a range of analytical and data-science tools, its foundation on an in-silico platform acquired multi-omics makes it indispensable for scientists and researchers alike. It promises to become ever more relevant as new techniques for generating and organizing data continue to transform the field. Bioinformatics for Plant Research and Crop Breeding readers will also find: A focus on emerging trends in plant science, sustainable agriculture, and global food security Detailed discussion of topics including plant diversity, plant stresses, nanotechnology in agriculture, and many others Applications incorporating artificial intelligence, machine learning, deep learning and more Bioinformatics for Plant Research and Crop Breeding is ideal for researchers and scientists interested in the potential of OMICs, and bioinformatic tools to aid and develop crop improvement programs.
