**The Public Value of the Humanities** Sep 06 2023 Recession is a time for asking fundamental questions about value. At a time when governments are being forced to make swingeing savings in public expenditure, why should they continue to invest public money funding research into ancient Greek tragedy, literary value, philosophical conundrums or the aesthetics of design? Does such research deliver 'value for money' and 'public benefit'? Such questions have become especially pertinent in the UK in recent years, in the context of the drive by government to instrumentalize research across the disciplines and the prominence of discussions about.

**The Value of Humanity in Kant's Moral Theory** Jun 10 2021 The humanity formulation of Kant's Categorical Imperative demands that we treat humanity as an end in itself. Because this principle resonates with currently influential ideals of human rights and dignity, contemporary readers often find it compelling, even if the rest of Kant's moral philosophy leaves them cold. Moreover, some prominent specialists in Kant's ethics recently have turned to the humanity formulation as the most theoretically central and promising principle of Kant'sethics. Nevertheless, despite the intuitive appeal and the increasingly recognized philosophical importance of the humanity formulation, it has received less attention than many other, less central, aspects of Kant's ethics. Richard Dean offers the most sustained and systematic examination of thehumanity formulation to date.Dean argues that the 'rational nature' that must be treated as an end in itself is not a minimally rational nature, consisting of the power to set ends or the unrealized capacity to act morally, but instead is the more properly rational nature possessed by someone who gives priority to moral principles over any contrary impulses. This non-standard reading of the humanity formulation provides a firm theoretical foundation for deriving plausible approaches to particular moral issues - and,contrary to first impressions, does not impose moralistic demands to pass judgment on others' character. Dean's reading also enables progress on problems of interest to Kant scholars, such as reconstructing Kant's argument for accepting the humanity formulation as a basic moral principle, and allows forincreased understanding of the relationship between Kant's ethics and supposedly Kantian ideas such as 'respect for autonomy'.

**Debates in the Digital Humanities 2016** Jun 03 2023 Pairing full-length scholarly essays with shorter pieces drawn from scholarly blogs and conference presentations, as well as commissioned interviews and position statements, Debates in the Digital Humanities 2016 reveals a dynamic view of a field in negotiation with its identity, methods, and reach. Pieces in the book explore how DH can and must change in response to social justice movements and events like #Ferguson; how DH alters and is altered by community college classrooms; and how scholars applying DH approaches to feminist studies, queer studies, and black studies might reframe the commitments of DH analysts. Numerous contributors examine the movement of interdisciplinary DH work into areas such as history, art history, and archaeology, and a special forum on large-scale text mining brings together position statements on a fast-growing area of DH research. In the multivalent aspects of its arguments, progressing across a range of platforms and environments, Debates in the Digital Humanities 2016 offers a vision of DH as an expanded field—new possibilities, differently structured. Published simultaneously in print, e-book, and interactive webtext formats, each DH annual will be a book-length publication highlighting the particular debates that have shaped the discipline in a given year. By identifying key issues as they unfold, and by providing a hybrid model of open-access publication, these volumes and the Debates in the Digital Humanities series will articulate the present contours of the field and help forge its future. **Reality Through the Arts** Apr 08 2021 This introductory exploration of basic artistic concepts and terms applies them to a skeletal multi-disciplinary and multi-cultural history of artistic styles. It treats all the arts—painting, printmaking, photography, sculpture, music, theatre, dance, film, architecture, literature—uniformly, and uses a common outline to reinforce the relationship of terms and concepts to the perceptual process. The book also ties both artistic media and history to the theme of art as a reflection of human realityThis examination focuses on the media of the arts, pictures, sculpture, music, theatre, cinema, dance, architecture, literature, the styles of the arts, ancient approaches, artistic reflections in the pre-modern world, as well as artistic styles in the emerging modern world and, the beginnings of modernism, pluralism in a post-modern age.For art enthusiasts and others interested exploring how artists express themselves.

**Culture and Values** Dec 09 2023 **CULTURE AND VALUES: A SURVEY OF THE HUMANITIES**, International Edition introduces students to art, music, philosophy, and literature in a new and exciting format, from the beginnings of civilization to the contemporary world, with more coverage of photography, film, digital media, and popular music than in past editions of this popular text. New co-author Lois Fichner-Rathus brings her spirit, pedagogical expertise, clear conversational style, and love of teaching to this beautifully written and illustrated book. Students will appreciate the new features, designed to encourage critical thinking and help them master the material: integrated primary source readings with guided discussions, chapter previews, timelines, "Compare and Contrast" sections, and "Big Picture" reviews. The eighth edition also provides expanded and updated coverage of Asia and Africa for a broader discussion of world cultures and the entire human story, while preserving popular features such as in-depth discussions of the music for each period, the "Values and Voices" boxes, and high-quality images with clear captions. Instructors will appreciate the wide range of digital instructor resources that will help them save time when preparing for class. iTunes® and YouTube listings of the music make it easy for students to download only the music that they need. An optional set of online resources is also available to students to help them prepare for classes and exams.

*Bodies of Information* May 22 2022 A wide-ranging, interconnected anthology presents a diversity of feminist contributions to digital humanities In recent years, the digital humanities has been shaken by important debates about inclusivity and scope—but what change will these conversations ultimately bring about? Can the digital humanities complicate the basic assumptions of tech culture, or will this body of scholarship and practices simply reinforce preexisting biases? *Bodies of Information* addresses this crucial question by assembling a varied group of leading voices, showcasing feminist contributions to a panoply of topics, including ubiquitous computing, game studies, new materialisms, and cultural phenomena like hashtag activism, hacktivism, and campaigns against online misogyny. Taking intersectional feminism as the starting point for doing digital humanities, *Bodies of Information* is diverse in discipline, identity, location, and method. Helpfully organized around keywords of materiality, values, embodiment, affect, labor, and situatedness, this comprehensive volume is ideal for classrooms. And with its multiplicity of viewpoints and arguments, it’s also an important addition to the evolving conversations around one of the fastest growing fields in the academy. **The Value of Humanity** Sep 25 2022 L. Nandi Theunissen develops a non-Kantian account of the value of human beings. Against the Kantian tradition, in which humanity is absolutely valuable and unlike the value of anything else, Theunissen outlines a relational proposal according to which our value is continuous with the value of other valuable things. She takes the Socratic starting point that good is affecting, and more particularly, that good is a notion of benefit. If people are bearers of value, the proposal is that our value is no exception. Theunissen explores the possibility that our value is explained through reciprocal relations, or relations of interdependence, as when--as daughters, or teachers, or friends--we benefit others by being part or constitutive of relationships with them. She also investigates the possibility that we can be said to stand in a valuable relationship with ourselves. Ultimately, in *The Value of Humanity*, she proposes that people are of value because we are constituted in such a way that we can be good for ourselves in the sense that we are able to lead flourishing lives. Intuitively, a person matters because she matters to herself in a very particular sort of way; to appropriate a phrase, she is a being for whom her life can be an issue.

**The Value of the Humanities** Mar 12 2024 In *The Value of the Humanities* prize-winning critic Helen Small assesses the value of the Humanities, eloquently examining five historical arguments in defence of the Humanities.

*Routledge History of Philosophy Volume VIII* Nov 15 2021 Continental philosophy, as it has emerged in the twentieth century, is less a seamless fabric than a patchwork of diverse strands. Phenomenology, hermeneutics, existentialism, structuralism, critical theory, deconstruction - these are some of the salient movements which have developed in continental Europe between 1900 and the 1990's, though their influence is by no means confined to geographic location. Continental thought has proved highly exportable, circulating far beyond the frontiers of Europe to provoke strong responses in the intellectual world at large. The fifteen articles in this volume outline and assess some of the issues and experiments of continental philosophy. The first five span the twin movements of phenomenology and existentialism, running from Husserl and Heidegger to Sartre, Merleau-Ponty and Levinas. Subsequent essays deal with specific currents of continental thought in such areas as science, Marxism, linguistics, politics, aesthetics, feminism and hermeneutics. A final chapter on postmodernism highlights the manner in which so many concerns of continental thought culminate in a radical anti-foundationalism. This volume provides a broad, scholarly introduction to this period for students of philosophy and related disciplines, as well as some original interpretations of these authors. It includes a glossary of technical terms and a chronological tube of philosophical, scientific and other cultural events.

**Health Humanities Reader** Mar 08 2021 Over the past forty years, the health humanities, previously called the medical humanities, has emerged as one of the most exciting fields for interdisciplinary scholarship, advancing humanistic inquiry into bioethics, human rights, health care, and the uses of technology. It has also helped inspire medical practitioners to engage in deeper reflection about the human elements of their practice. In *Health Humanities Reader*, editors Therese Jones, Delese Wear, and Lester D. Friedman have assembled fifty-four leading scholars, educators, artists, and clinicians to survey the rich body of work that has already emerged from the field—and to imagine fresh approaches to the health humanities in these original essays. The collection’s contributors reflect the extraordinary diversity of the field, including scholars from the disciplines of disability studies, history, literature, nursing, religion, narrative medicine, philosophy, bioethics, medicine, and the social sciences. With warmth and humor, critical acumen and ethical insight, *Health Humanities Reader* truly humanizes the field of medicine. Its accessible language and broad scope offers something for everyone from the experienced medical professional to a reader interested in health and illness.

**Proceedings of the 8th International Conference on Human Rights** Jan 10 2024 The material contained in this publication is the outcome of the 8th International Conference on Human Rights "Right to Knowledge and Information in Heterogenic Society", organized by the Faculty of Law and Administration in the University of Warmia and Mazury in Olsztyn (Poland), in cooperation with the Faculty of Law in the University of Bari (Italy), which took place on 30-31 May 2008 in Olsztyn. The selection of issues in no respect can be called accidental. The summit of the European Council in Lisbon in March 2000 created foundations for creating society based on knowledge that is conscious in gaining information and equal access to knowledge. Individual actions of countries should aim at creating a human-friendly "information society" which allows creation of new working places and developing information and telecommunication technologies. This broad spectrum of problems which were the subject of the conference, interests not only Polish researchers but also scientists from countries like Italy, Spain, Ukraine, the United States of America, United Kingdom, and South Korea. They represent various cultures, which implies differences of opinion on many issues related to human rights. Publications included in this collective work are the reflection of freedom to express thoughts on difficult topics, which are important for all though.

*Open Access and the Humanities* Apr 20 2022 If you work in a university, you are almost certain to have heard the term 'open access' in the past couple of years. You may also have heard either that it is the utopian answer to all the problems of research dissemination or perhaps that it marks the beginning of an apocalyptic new era of 'pay-to-say' publishing. In this book, Martin Paul Eve sets out the histories, contexts and controversies for open access, specifically in the humanities. Broaching practical elements alongside economic histories, open licensing, monographs and funder policies, this book is a must-read for both those new to ideas about open-access scholarly communications and those with an already keen interest in the latest developments for the humanities. This title is also available as Open Access via Cambridge Books Online.
