workbook to help your 7th grade student master the skills necessary to perform better in class and on standardized tests. Colorful, dynamic, and filled with engaging activities, McGraw Hill Math Grade 7 Third Edition provides maximum educational value, giving your seventh grader a student-friendly learning experience to learn and practice the skills they need to do well in school and on standardized tests. Based on the curriculum standards followed by states across the U.S., McGraw Hill Math Grade 7 covers key topics with easy-to-follow instructions, helpful examples, and more than 1,000 practice problems with answers. End-of-chapter tests allow your child to see where mastery has been gained and what they need to focus on. As they master each concept, your child will sharpen their problem-solving skills and build the confidence they need to succeed in seventh grade math.

Features include:

- A state-by-state guide showing you how to focus your child's lessons. The guide shows which states have adopted Common Core State Standards, how each state has implemented the standards for math, and outlines the standards for non-Common Core states.
- 1,000 math problems with explanations for answers.
- A 10-Week Summer Study Plan showing you how to create the best study schedule for your child.
- A pretest helping your child determine which skills require more attention.
- End-of-chapter tests helping your child assess if they've mastered the chapter's concepts.
- Posttest at the end of the book showing your child how well they understand key concepts.
- A glossary explaining key terms that students will encounter in the book.

Topics covered: Mathematical operations and number properties, Negative numbers and absolute value, Solving problems with rational numbers, Ratios, proportions, equivalence, and scale factors, Percent and percent change, Graphing relationships and unit rates, Roots and exponents, Scientific notation, Solving equations and inequalities, Customary and metric units of measure including conversions, Data presentation, Statistics and probability, Constructing and analyzing geometric figures, Solving problems involving angle measure, area, surface area, and volume.
