Since the third edition of Grieve's *Modern Manual Therapy* was published in 2005, the original concepts of manipulative therapy have grown to embrace new research-generated knowledge. Expansions in practice have adopted new evidence which include consideration of psychological or social moderators. The original manual therapy or manipulative therapy approaches have transformed into musculoskeletal physiotherapy, and this is recognized by the change in title for the new edition: *Grieve's Modern Musculoskeletal Physiotherapy*. *Grieve's Modern Musculoskeletal Physiotherapy* continues to bring together the latest state-of-the-art research from both clinical practice and the related basic sciences which is most relevant to practitioners. The topics addressed and the contributing authors reflect the best and most clinically relevant contemporary work within the field of musculoskeletal physiotherapy. With this as its foundation and a new six-strong editorial team at its helm, the fourth edition now expands its focus from the vertebral column to the entire musculoskeletal system.
