**Achtung-Panzer!** Mar 11 2024 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

**A Bigger Picture** Apr 19 2022 In A Bigger Picture, the bestselling political memoir of 2020, Malcolm Turnbull, Australia's 29th prime minister, tells the remarkable story of his life. Now in paperback, this edition is updated with an all-new foreword by the author that sheds light on the huge political and cultural changes happening today. When Malcolm Turnbull took over the nation's top job there was a sense of excitement in

Australia. Sky-high opinion polls followed as the political outsider with a successful business, legal and media career took charge. The infighting that had dogged politics for the best part of a decade looked to be over. But a right-wing insurgency brutally cut down Turnbull's time in office after three years, leaving many Australians asking, 'Why?' Exceptionally candid and compelling, *A Bigger Picture* is the definitive narrative of Malcolm Turnbull's prime ministership. He describes how he legalised same-sex marriage, established Snowy Hydro 2.0, stood up to Donald Trump, and many more achievements – remarkable in their pace and significance, and delivered in the teeth of so much opposition. But it's far more than just politics. Turnbull's life has been filled with colourful characters and controversies, success and failure. From his early years in Sydney, growing up with a single father, to defending 'Spycatcher' Peter Wright against the UK government; the years representing Kerry Packer, leading the Republican Movement and making millions in business; and finally toppling Tony Abbott to become prime minister of Australia. For the first time he tells it all – in his own words. With revelatory insights on the workings of Canberra and the contentious events of Turnbull's life, *A Bigger Picture* explores the strengths and vulnerabilities of one of Australia's best-known and most dynamic business and political leaders. Lyrically written in highly readable and entertaining prose, this is a genuine page-turner that's not just for political junkies.

**New Visualities, New Technologies** Jan 29 2023 Back in the 1980s Jean Baudrillard wrote that public space was collapsing due to a double obscenity: 'The most intimate operation of your life becomes the potential grazing ground of the media....The entire universe also unfolds unnecessarily on your home screen.' He termed this the ecstasy of communication. But today, your everyday life is not just the potential grazing ground of the media, but of anyone with a camera, and the entire universe unfolds not just at home but in the palm of your hand virtually anywhere you travel. Bringing together a transdisciplinary team of leading scholars and artists from North America, Europe and Asia, this volume documents and theorizes this new visibility. It focuses on the proliferation of a range of new visual technologies, examining questions of subjectivity, agency, and surveillance as well as mapping and theorizing new practices of visibility within this new visual assemblage. *New Visualities, New Technologies* addresses the pressing need for the conceptual understanding of new forms of seeing, looking, presenting, and hiding.

**Re-theorizing Literacy Practices** Mar 31 2023 Moving beyond current theories on literacy practices, this edited collection sheds new light on the complexities inherent to the social, cultural, and ideological contexts in which literacy practices are realized. Building on Brian V. Street's scholarship, contributors discuss literacy as intrinsically social and ideological, and examine how the theorizing of literacy practices has evolved in recognition of the diverse contexts in which written language is used. Breaking new intellectual and theoretical ground, this book brings together leading literacy scholars to re-examine how educational and sociocultural contexts frame and define literacy events and practices. Drawing from the richness of Brian V. Street's work, this volume offers insights into fractures, tensions, and developments in literacy for scholars, students, and researchers.
