Modern Logistics Management John F. Magee, William C. Copacino, Donald B. Rosenfield, 1985-10-02 This comprehensive overview of logistics provides a conceptual framework for understanding the logistics system, the integration of its basic elements, and its relationship to the overall firm. Discusses both manufacturing and physical distribution, new technologies in each of these areas, and how they related to each other and to the company. New topics covered range from approaches to strategic logistics planning and multi location inventory planning to international logistics issues and future directions. Includes case studies.

Switchpoints for the Future of Logistics Ingo Wieck, Martin Streichfuss, Thorsten Klaas-Wissing, Wolfgang Stölzle, 2011-11-04 Roland Berger Strategy Consultants and the University of St Gallen's Chair of Logistics Management conducted this study in order to identify and assess switchpoints that will shape the future of the logistics industry. Rather than making projections focused on a fixed point in time, the authors instead aimed to identify the most unpredictable developments that could impact logistics. Consequently, the topics for discussion range from fairly specific near future developments to more exploratory blue sky topics. Throughout their highly interesting discussions with respondents and experts, the authors encountered a wide range of uncommon and unexpected but not at all unlikely projections for the future.

Worldwide Logistics Ben G. Radstaak, Mark H. Ketelaar, 1998

Urban Logistics Michael Browne, Sönke Behrends, Johan Woxenius, Genevieve Giuliano, José Holguin-Veras, 2018-12-03 Approximately 80 per cent of European and American citizens live in an urban environment. Due to their large populations and extensive commercial establishments, urban areas require large quantities of goods and services for commercial and domestic use. This results in increasing levels of demand for freight transport services. Freight transport in towns and cities is a major contributor to environmental impacts, particularly to local air pollution and noise. Urban Logistics addresses public policy makers, freight transport companies, and receivers of supplies, providing them with the information and guidance to affect change in the logistics of the city. Urban Logistics is written by an outstanding team of international editors combining their expertise and using their research from leading business schools in Sweden and the US. There are also valuable contributions from academics and industry experts from companies and universities from all over the world. The book includes clear examples of initiatives that work and business case developments, as well as toolkits for policymakers and managers who are devising new initiatives. There is an in-depth examination of different aspects of urban logistics, such as retail logistics for cities, urban food supply chains, services, and the special logistics requirements involved in construction, waste management, and e-commerce and home delivery. There is also a focus on networks and partnerships and an analysis of innovation as a new constant.

Factors Affecting Transportation Logistics James Shuler, 2011-07-01 The purpose of this book, Factors Affecting Transportation Logistics, is to provide the reader with a basic understanding of various factors that logistics decision makers use when making logistic-related decisions. There are two major factor categories: internal environmental factors and external environmental factors. Internal environmental factors are divided into four levels: individual, service, functional, and organizational levels. External environmental factors are divided into information technology, supply chain, globalization, and corporate structure.
