The Fourth Industrial Revolution Klaus Schwab,2017-01-03 World renowned economist Klaus Schwab Founder and Executive Chairman of the World Economic Forum explains that we have an opportunity to shape the fourth industrial revolution which will fundamentally alter how we live and work Schwab argues that this revolution is different in scale scope and complexity from any that have come before Characterized by a range of new technologies that are fusing the physical digital and biological worlds the developments are affecting all disciplines economies industries and governments and even challenging ideas about what it means to be human Artificial intelligence is already all around us from supercomputers drones and virtual assistants to 3D printing DNA sequencing smart thermostats wear able sensors and microchips smaller than a grain of sand But this is just the beginning nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development Imagine smart factories in which global systems of manufacturing are coordinated virtually or implantable mobile phones made of biosynthetic materials The fourth industrial revolution says Schwab is more significant and its ramifications more profound than in any prior period of human history He outlines the key technologies driving this revolution and discusses the major impacts expected on government business civil society and individuals Schwab also offers bold ideas on how to harness these changes and shape a better future one in which technology empowers people rather than replaces them progress

Medina-Ramón, Inmaculada Oliver-Faubel, Isabel Rodríguez-Abad, Andrea Salandin, Rafael Sánchez-Grandia, Isabel Tort-Ausina, 2014-01-31 Many areas of knowledge converge in the building industry and therefore research in this field necessarily involves an interdisciplinary approach. Effective research requires strong relation between a broad variety of scientific and technological domains and more conventional construction or craft processes while also considering advanced management processes where all the main actors permanently interact. This publication takes an interdisciplinary approach grouping various studies on the building industry chosen from among the works presented for the 2nd International Conference on Construction and Building Research. The papers examine aspects of materials and building systems, construction technology, energy and sustainability, construction management, heritage, refurbishment and conservation. The information contained within these pages may be of interest to researchers and practitioners in construction and building activities from the academic sphere as well as public and private sectors. *AutoCAD 2016 and AutoCAD LT 2016 Essentials*
