Helming,2017-04-28 The 71F Advantage National Defense University Press,2010-09 Includes a foreword by Major General David A Rubenstein From the editor 71F or 71 Foxtrot is the AOC area of concentration code assigned by the U S Army to the specialty of Research Psychology Qualifying as an Army research psychologist requires first of all a Ph D from a research not clinical intensive graduate psychology program Due to their advanced education research psychologists receive a direct commission as Army officers in the Medical Service Corps at the rank of captain In terms of numbers the 71F AOC is a small one with only 25 to 30 officers serving in any given year However the 71F impact is much bigger than this small cadre suggests Army research psychologists apply their extensive training and expertise in the science of psychology and social behavior toward understanding preserving and enhancing the health well being morale and performance of Soldiers and military families As is clear throughout the pages of this book they do this in many ways and in many areas but always with a scientific approach This is the 71F advantage applying the science of psychology to understand the human dimension and developing programs policies and products to benefit the person in military operations This book grew out of the April 2008 biennial conference of U S Army Research Psychologists held in Bethesda Maryland This meeting was to be my last as Consultant to the Surgeon General for Research Psychology and I thought it would be a good idea to publish proceedings which had not been done before As Consultant I d often wished for such a document to help explain to people what it is that Army Research Psychologists do for a living In addition to our core group of 71Fs at the Bethesda 2008 meeting we had several brand new members and a number of distinguished retirees the grey beards of the 71F clan Together with longtime 71F colleagues Ross Pastel and Mark Vaitkus I also saw an unusual opportunity to capture some of the history of the Army Research Psychology specialty while providing a representative sample of current 71F research and activities It seemed to us especially important to do this at a time when the operational demands on the Army and the total force were reaching unprecedented levels with no sign of easing and with the Army in turn relying more heavily on research psychology to inform its programs for protecting the health well being and performance of Soldiers and their families **2008 Lexus SC430**

How Tobacco Smoke Causes Disease United States. Public Health Service. Office of the Surgeon General,2010 This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke Many Surgeon General s reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies Mechanisms of disease are important because they may provide plausibility which is one of the guideline criteria for assessing evidence on causation This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke This evidence is relevant to understanding how smoking causes disease to identifying those who may be particularly susceptible and to assessing the potential risks of tobacco products
