Hydrogen Technology Aline Léon,2008-07-18 Aline Leon In the last years public attention was increasingly shifted by the media and world governments to the concepts of saving energy reducing pollution protecting the environment and developing long term energy supply solutions In parallel research funding relating to alternative fuels and energy carriers is increasing on both national and international levels Why has future energy supply become such a matter of concern The reasons are the problems created by the world's current energy supply system which is mainly based on fossil fuels In fact the energy stored in hydrocarbon based solid liquid and gaseous fuels was and will be widely consumed for internal combustion engine based transportation for electricity and heat generation in residential and industrial sectors and for the production of fertilizers in agriculture as it is convenient abundant and cheap However such a widespread use of fossil fuels by a constantly growing world population from 2.3 billion in 1939 to 6.5 billion in 2006 gives rise to the two problems of oil supply and environmental degradation The problem related to oil supply is caused by the fact that fossil fuels are not renewable primary energy sources This means that since the first barrel of petroleum has been pumped out from the ground we have been exhausting a heritage given by nature

Go Like Hell Albert J. Baime,2009 By the early 1960s the Ford Motor Company built to bring automobile transportation to the masses was falling behind Young Henry Ford II who had taken the reins of his grandfather s company with little business experience to speak of knew he had to do something to shake things up Baby boomers were taking to the road in droves looking for speed not safety style not comfort Meanwhile Enzo Ferrari whose cars epitomized style lorded it over the European racing scene He crafted beautiful sports cars science fiction on wheels but was also called the Assassin because so many drivers perished while racing them Go Like Hell tells the remarkable story of how Henry Ford II with the help of a young visionary named Lee Iacocca and a former racing champion turned engineer Carroll Shelby concocted a scheme to reinvent the Ford company They would enter the high stakes world of European car racing where an adventurous few threw safety and sanity to the wind They would design build and race a car that could beat Ferrari at his own game at the most prestigious and brutal race in the world something no American car had ever done Go Like Hell transports readers to a risk filled glorious time in this brilliant portrait of a rivalry between two industrialists the cars they built and the pilots who would drive them to victory or doom
