Fan Fiction and Fan Communities in the Age of the Internet Mar 15 2024 Fans have been responding to literary works since the days of Homer's *Odyssey* and Euripedes' *Medea*. More recently, a number of science fiction, fantasy, media, and game works have found devoted fan followings. The advent of the Internet has brought these groups from relatively limited, face-to-face enterprises to easily accessible global communities, within which fan texts proliferate and are widely read and even more widely commented upon. New interactions between readers and writers of fan texts are possible in these new virtual communities. From *Star Trek* to *Harry Potter*, the essays in this volume explore the world of fan fiction--its purposes, how it is created, how the fan experiences it. Grouped by subject matter, essays cover topics such as genre intersection, sexual relationships between characters, character construction through narrative, and the role of the beta reader in online communities. The work also discusses the terminology used by creators of fan artifacts and comments on the effects of technological advancements on fan communities. Instructors considering this book for use in a course may request an examination copy here.

The Morphosyntax of Transitions Jan 21 2022 This book examines the cross-linguistic expression of changes of location or state, taking as a starting point Talmy's typological generalization that classifies languages as either 'satellite-framed' or 'verb-framed'. In verb-framed languages, such as those of the Romance family, the result state or location is encoded in the verb. In satellite-framed languages, such as English or Latin, the result state or location is encoded in a non-verbal element. These languages can be further subdivided into weak satellite-framed languages, in which the element expressing result must form a word with the verb, and strong satellite-framed languages, in which it is expressed by an independent element: an adjective, a prepositional phrase or a particle. In this volume, Víctor Acedo-Matellán explores the similarities between Latin and Slavic in their expression of events of transition: neither allows the expression of complex adjectival resultative constructions and both express the result state or location of a complex transition through prefixes. They are therefore analysed as weak satellite-framed languages, along with Ancient Greek and some varieties of Mandarin Chinese, and stand in contrast to strong satellite-framed languages such as English, the Germanic languages in general, and Finno-Ugric. This variation is expressed in terms of the morphological properties of the head that

expresses transition, which is argued to be affixal in weak but not in strong satellite-framed language. The author takes a neo-constructionist approach to argument structure, which accounts for the verb elasticity shown by Latin, and a Distributed Morphology approach to the syntax-morphology interface.

**The Elusive Fan: Reinventing Sports in a Crowded Market** May 05 2023 Sports are a multibillion-dollar global business that will continue to grow by leaps and bounds into the foreseeable future. The bad news is: It's never been harder to attract, engage, and retain the sports fan. Today's sports fans are bombarded by choices. Traditional sports, such as baseball, football, and basketball, compete for fans' dollars with snowboarding, lacrosse, poker...even paintball. The old business formulas, developed in the age of three TV networks and creaky stadiums, no longer apply. World-renowned communication expert Irving Rein, international marketing guru Philip Kotler, and communication specialist Ben Shields deliver an innovative new business model centered squarely on fan satisfaction and retention. They give you the tools to transform your sports product into an enduring brand-immune to the vagaries of winning and losing-that quickly adapts to changing market conditions. Along the way they illustrate their points with fascinating case studies, including Manchester United's transformation from a plucky home team to a billion-dollar international franchise Professional golfer Michelle Wie's quest to maximize her talents and marketability Southlake Carroll High School football team's benchmarking of professional and college football programs to build its own brand Daytona International Speedway's reinvention of fan intimacy Combining expert analysis with field-tested strategies for winning hearts and minds, *The Elusive Fan* is your guide to surviving and thriving in today's ever-widening world of sports.

**Motorsports and American Culture** May 25 2022 Soon after the first automobiles were introduced in the United States, auto racing became a reality. Since that time, motorsports have expanded to include drag racing, open wheel racing, rallying, demolition derbies, stock car racing, and more. Motorsports have grown to such an extent that NASCAR is now the second most watched professional sport in America, behind only football. But motorsports are about much more than going fast and finishing first. These events also reflect our culture, our society, our values, and our history. In *Motorsports and American Culture: From Demolition Derbies to NASCAR*, Mark D. Howell and John D. Miller bring together essays that examine the relevancy of motorsports to American culture and history, from the late nineteenth century to the present. Addressing a wide spectrum of motorsports—such as stock car racing, demolition derbies, land speed record pursuits, and even staged train wrecks—the essays highlight the social and cultural implications of contemporary and historical moments in these sports. Topics covered include gender roles in motorsports, hot rods and the creation of fan and participant identities, the appeal of demolition derbies, the globalization of motorsports, the role of moonshine in stock car history, the economic relationship between NASCAR and its corporate sponsors, and more. Offering the most thorough study of motorsports to date from a diverse pool of disciplines and subjects, *Motorsports and American Culture* will appeal to motorsports and automobile enthusiasts, as well as those interested in American history, popular culture, sports history, and gender studies.

**DVD, Blu-ray and Beyond** Jan 01 2023 This book demonstrates, in contrast to statistics that show declining consumption of physical formats, that there has not been a mass shift towards purely digital media. Physical releases such as special editions, DVD box-sets and Blu-Rays are frequently promoted and sought out by consumers. And that past formats such as VHS, Laserdisc and HD-DVD make for sought-after collectible items. These trends are also found within particular genres and niche categories, such as documentary, education and independent film distribution. Through its case studies, this collection makes a distinctive and significant intervention in highlighting the ways in which the film industry has responded to rapidly changing markets. This volume, global in scope, will prove useful to those studying the distribution and exhibition of films, and the economics of the film industry around the world.

**Ruminations, Peregrinations, and Regenerations** Nov 11 2023 *Peregrinations, Ruminations, and Regenerations: A Critical Approach to Doctor Who* examines the famous BBC science fiction show as a cultural artifact in dialogue with other science fiction, with politics and religion, and with the culture at large, both in terms of how it reflects and comments upon that culture and in terms of the audience

the peculiarities of its response. This book enables researchers in film and media to make historical, industrial, aesthetic, and ideological connections between and among Doctor Who and other shows and historical events since its inception in 1963. This volume is a new entry in a relatively new area. As the young fans of Doctor Who have matured, and as many have become scholars, they are returning to the show to consider it from a scholarly perspective. It is also of use in the media studies classroom to address directly the issues presented by the longest running science fiction show in the history of the medium. *Peregrinations, Ruminations, and Regenerations* considers not only cultural ramifications and connections, but audience studies as well.

Framing Languages and Literacies Aug 28 2022 In this seminal volume leading language and literacy scholars clearly articulate and explicate major social perspectives and approaches in the fields of language and literacy studies. Each approach draws on distinct bodies of literature and traditions and uses distinct identifiers, labels, and constellations of concepts; each has been taken up across diverse global contexts and is used as rationale and guide for the design of research and of educational policies and practices. Authors discuss the genesis and historical trajectory of the approach with which they are associated; offer their unique perspectives, rationales, and engagements; and investigate implications for understanding language and literacy use in and out of schools. The premise of the book is that understanding concepts, perspectives, and approaches requires knowing the context in which they were created, the rationale or purpose in creating them, and how they have been taken up and applied in communities of practice. Accessible yet theoretically rich, this volume is indispensable for researchers, students, and professionals across the fields of language and literacy studies.

The 2006 Yankees Oct 10 2023 The New York Yankees are a dynasty, but since the end of the 2001 season, the franchise has slowly lost its power to win or even get to the World Series consistently. This story specifically examines the Yankees 2006 season, one in which the individual players did not form a cohesive team. Through a player by player analysis, the author proves that individual strengths and weaknesses turned into a team meltdown. Could any player on the 2006 roster save his team from shooting itself in the foot?

What is the New Rhetoric? Dec 20 2021 The Age of Information has spawned a critical focus on human communication in a multimedia world, particularly on theories and practices of writing. With the worldwide web impacting increasingly on academic and business communication, the need has never been greater for advanced study in writing, communication, and critical thinking across all genres, sectors, and cultures. In recent decades, the definitions of 'new rhetoric' have expanded to encompass a variety of theories and movements, raising the question of how rhetoric is understood and employed in the twenty-first century. The essays collected here represent variations on these themes, with each attempting to answer the title's deliberately provocative question, addressing particularly: -How the classical art of rhetoric is still relevant today; -How it is directly related to modern technologies and the new modes of communication they have generated; -How rhetorical practice is informing research methodologies and teaching and learning practices in the contemporary academy.

Confronting the Challenges of Participatory Culture Jun 13 2021 Many teens today who use the Internet are actively involved in participatory cultures—joining online communities (Facebook, message boards, game clans), producing creative work in new forms (digital sampling, modding, fan videomaking, fan fiction), working in teams to complete tasks and develop new knowledge (as in Wikipedia), and shaping the flow of media (as in blogging or podcasting). A growing body of scholarship

suggests potential benefits of these activities, including opportunities for peer-to-peer learning, development of skills useful in the modern workplace, and a more empowered conception of citizenship. Some argue that young people pick up these key skills and competencies on their own by interacting with popular culture; but the problems of unequal access, lack of media transparency, and the breakdown of traditional forms of socialization and professional training suggest a role for policy and pedagogical intervention. This report aims to shift the conversation about the "digital divide" from questions about access to technology to questions about access to opportunities for involvement in participatory culture and how to provide all young people with the chance to develop the cultural competencies and social skills needed. Fostering these skills, the authors argue, requires a systemic approach to media education; schools, afterschool programs, and parents all have distinctive roles to play. The John D. and Catherine T. MacArthur Foundation Reports on Digital Media and Learning

Apr 11 2021 Cars. Principles of Cloning Jun 25 2022 Principles of Cloning, Second Edition is the fully revised edition of the authoritative book on the science of cloning. The book presents the basic biological mechanisms of how cloning works and progresses to discuss current and potential applications in basic biology, agriculture, biotechnology, and medicine. Beginning with the history and theory behind cloning, the book goes on to examine methods of micromanipulation, nuclear transfer, genetic modification, and pregnancy and neonatal care of cloned animals. The cloning of various species—including mice, sheep, cattle, and non-mammals—is considered as well. The Editors have been involved in a number of breakthroughs using cloning technique, including the first demonstration that cloning works in differentiated cells done by the Recipient of the 2012 Nobel Prize for Physiology or Medicine – Dr John Gurdon; the cloning of the first mammal from a somatic cell – Drs Keith Campbell and Ian Wilmut; the demonstration that cloning can reset the biological clock – Drs Michael West and Robert Lanza; the demonstration that a terminally differentiated cell can give rise to a whole new individual – Dr Rudolf Jaenisch and the cloning of the first transgenic bovine from a differentiated cell – Dr Jose Cibelli. The majority of the contributing authors are the principal investigators on each of the animal species cloned to date and are expertly qualified to present the state-of-the-art information in their respective areas. First and most comprehensive book on animal cloning, 100% revised Describes an in-depth analysis of current limitations of the technology and research areas to explore Offers cloning applications on basic biology, agriculture, biotechnology, and medicine

Aug 08 2023 Fandom has been celebrated both as a harmonious, tolerant space and as apolitical and detached from reality. Yet fandom is neither harmonious nor apolitical. Throughout the past century, fandom has been shaped by recurring controversies and sparked by the emergence of new circles, platforms and discourses. Since the earliest days of science-fiction fandom fans have conceived of their communities as quasi-political bodies, and of themselves as public actors in discursive spaces. They are concerned with the organizational structures, norms, and borders of fandom as well as their own position within it all. This latter concern has moved to the forefront as fan practices and platforms have been coopted by the entertainment industry and by political actors, forcing fans to situate their fannish and political identities in relation to both sprawling transmedia franchises and right-wing groups exploiting fannish formations for political ends. Through case studies of Glee and The Hunger Games fandoms as well as events such as Gamergate, RaceFail '09 and the Hugo Awards controversies, this book explores the complexities of political fandom.

Mar 03 2023 Bachelor Thesis from the year 2013 in the subject Communications - Public Relations, Advertising, Marketing, Social Media, grade: 1,1, European School of Business Reutlingen, language: English, abstract: In the globalized world of today a well-elaborated, long-term oriented nation branding strategy which includes the government, the public and the private sector as well as the nation's citizens themselves can help nations to improve and to better control their nation image. Nation branding activities increase the countries' competitiveness in the global marketplace and help to foster the tourism arrivals, inward foreign direct investment flows and exports as well as they help to attract talented workforce and students. Despite its growing importance

most Latin American countries still have not engaged enough in the area of nation branding and most only focus their activities on the tourism promotion. The region's countries have a good image regarding soft factors such as their people and tourism attractions but have a weak image regarding their products, services and investment opportunities. Brazil has a relatively good nation image in many dimensions but still has not developed an extensive nation branding strategy. Chile and Colombia are among the Latin American countries which have started to conduct more complete and advanced nation branding activities. Although such advances can be observed, there is still a lot of improvement potential in the nation branding practices of Latin American countries.

Gamma-Ray Bursts Jun 06 2023 Since their discovery was first announced in 1973, gamma-ray bursts (GRBs) have been among the most fascination objects in the universe. While the initial mystery has gone, the fascination continues, sustained by the close connection linking GRBs with some of the most fundamental topics in modern astrophysics and cosmology. Both authors have been active in GRB observations for over two decades and have produced an outstanding account on both the history and the perspectives of GRB research.

Snow Flower and the Secret Fan Nov 30 2022 Lily is the daughter of a humble farmer, and to her family she is just another expensive mouth to feed. Then the local matchmaker delivers startling news: if Lily's feet are bound properly, they will be flawless. In nineteenth-century China, where a woman's eligibility is judged by the shape and size of her feet, this is extraordinary good luck. Lily now has the power to make a good marriage and change the fortunes of her family. To prepare for her new life, she must undergo the agonies of footbinding, learn nu shu, the famed secret women's writing, and make a very special friend, Snow Flower. But a bitter reversal of fortune is about to change everything.

Fandom May 13 2021 The first edition of a seminal work on fans and communities We are all fans. Whether we log on to Web sites to scrutinize the latest plot turns in *Lost*, "stalk" our favorite celebrities on Gawker, attend gaming conventions, or simply wait with bated breath for the newest Harry Potter novel—each of us is a fan. Fandom extends beyond television and film to literature, opera, sports, and pop music, and encompasses both high and low culture. Fandom brings together leading scholars to examine fans, their practices, and their favorite texts. This unparalleled selection of original essays examines instances across the spectrum of modern cultural consumption from Karl Marx to Paris Hilton, Buffy the Vampire Slayer to backyard wrestling, Bach fugues to Bollywood cinema and nineteenth-century concert halls to computer gaming. Contributors examine fans of high cultural text and genres, the spaces of fandom, fandom around the globe, the impact of new technologies on fandom, and the legal and historical contexts of fan activity. Fandom is key to understanding modern life in our increasingly mediated and globalized world.

Ageing and Youth Cultures Sep 28 2022 What happens to punks, clubbers, goths, riot grrls, soulies, break-dancers and queer scene participants as they become older? For decades, research on spectacular 'youth cultures' has understood such groups as adolescent phenomena and assumed that involvement ceases with the onset of adulthood. In an age of increasingly complex life trajectories, *Ageing and Youth Cultures* is the first anthology to challenge such thinking by examining the lives of those who continue to participate into adulthood and middle-age. Showcasing a range of original research case studies from across the globe, the chapters explore how participants reconcile their continuing involvement with ageing bodies, older identities and adult responsibilities. Breaking new ground and establishing a new field of study, the book will be essential reading for students and

scholars researching or studying questions of youth, fashion, popular music and identity across a wide range of disciplines.

**Bioinspired Materials Science and Engineering** Sep 09 2023 An authoritative introduction to the science and engineering of bioinspired materials Bioinspired Materials Science and Engineering offers a comprehensive view of the science and engineering of bioinspired materials and includes a discussion of biofabrication approaches and applications of bioinspired materials as they are fed back to nature in the guise of biomaterials. The authors also review some biological compounds and shows how they can be useful in the engineering of bioinspired materials. With contributions from noted experts in the field, this comprehensive resource considers biofabrication, biomacromolecules, and biomaterials. The authors illustrate the bioinspiration process from materials design and conception to application of bioinspired materials. In addition, the text presents the multidisciplinary aspect of the concept, and contains a typical example of how knowledge is acquired from nature, and how in turn that information contributes to biological sciences, with an accent on biomedical applications. This important resource: Offers an introduction to the science and engineering principles for the development of bioinspired materials Includes a summary of recent developments on biotemplated formation of inorganic materials using natural templates Illustrates the fabrication of 3D-tumor invasion models and their potential application in drug assessments Explores electroactive hydrogels based on natural polymers Contains information on turning mechanical properties of protein hydrogels for biomedical applications Written for chemists, biologists, physicists, and engineers, Bioinspired Materials Science and Engineering contains an indispensable resource for an understanding of bioinspired materials science and engineering.

**Fandom as Methodology** Mar 11 2021 An illustrated exploration of fandom that combines academic essays with artist pages and experimental texts. Fandom as Methodology examines fandom as a set of practices for approaching and writing about art. The collection includes experimental texts, autobiography, fiction, and new academic perspectives on fandom in and as art. Key to the idea of "fandom as methodology" is a focus on the potential for fandom in art to create oppositional spaces, communities, and practices, particularly from queer perspectives, but also through transnational, feminist and artist-of-color fandoms. The book provides a range of examples of artists and writers working in this vein, as well as academic essays that explore the ways in which fandom can be theorized as a methodology for art practice and art history. Fandom as Methodology proposes that many artists and art writers already draw on affective strategies found in fandom. With the current focus in many areas of art history, art writing, and performance studies around affective engagement with artworks and imaginative potentials, fandom is a key methodology that has yet to be explored. Interwoven into the academic essays are lavishly designed artist pages in which artists offer an introduction to their use of fandom as methodology. Contributors Taylor J. Acosta, Catherine Grant, Dominic Johnson, Kate Random Love, Maud Lavin, Owen G. Parry, Alice Butler, SooJin Lee, Jenny Lin, Judy Batalion, Ika Willis. Artists featured in the artist pages Jeremy Deller, Ego Ahaïwe Sowinski, Anna Bunting-Branch, Maria Fusco, Cathy Lomax, Kamau Amu Patton, Holly Pester, Dawn Mellor, Michelle Williams Gamaker, The Women of Colour Index Reading Group, Liv Wynter, Zhiyuan Yang

**Jet Li** Jul 07 2023 This is the first study of Chinese stars and their transnational stardom, examining transnational Chinese actor Jet Li, probably the best martial arts actor alive. Jet Li's career has crossed numerous cultural and geographic boundaries, from mainland China to Hong Kong, from Hollywood to France. In *Jet Li: Chinese Masculinity and Transnational Film Stardom*, Sabrina Qiong Yu uses Li as an example to address some intriguing but under-examined issues surrounding transnational stardom in general and transnational kung fu stardom in particular. Presenting case studies of audiences' responses to Jet Li films and his star image, this book explores the way in which Li has evolved from Chinese wuxia hero to a transnational kung fu star in relation to the discourses of genre, gender, sexuality, ethnicity and national identity. By rejecting a text-centred approach which prevails in star studies and instead emphasising the role of audiences in constructing star image, this book challenges some established perspectives in the study of Chinese male screen images and martial arts/action cinema.

**Iminosugars** Jul 15 2021 Iminosugars form undoubtedly the most attractive of carbohydrate mimics reported so far. In these structures, the substitution of the endocyclic oxygen of sugars by a basic nitrogen atom leads to remarkable biological properties and raises many challenges in organic synthesis. Since the discovery of their biological activity as glycosidase inhibitors in the 1970's, these polyvalent molecules have progressively made their way from the laboratory to the clinic. The impressive series of discoveries in the field over the past ten years indicates clearly that it is "a boom time" for iminosugar chemistry and biology. The scope of their profile as inhibitors has been extended to a number of enzymes such as phosphorylases, glycosyltransferases or metalloproteinases, and iminosugars now constitute lead compounds for the development of new therapeutic agents for a wide range of diseases including diabetes, viral infections, lysosomal storage disorders and tumor metastasis. Latest developments, from iminosugar synthesis to their use in clinical studies, are presented in this book, which contains contributions from over fifteen of the major chemists, biochemists and drug developers in this rapidly expanding field. An extensive table correlating the structures of more than 600 iminosugars of therapeutic interest with their biological activities is also included in the book and should prove particularly useful to aid with the design and the discovery of novel bioactive substances. *Iminosugars: From Synthesis to Therapeutic Application* provides a unique resource for academic and industrial researchers working in the field of iminosugars and glycomimetics of biological and/or therapeutic interest: organic chemists, medicinal chemists, carbohydrate chemists and medical scientists.

**Globalised Football** Aug 16 2021 When studying the social phenomena in and around football, five major aspects of globalisation processes become evident: international migration, the global flow of capital, the syncretistic nature of tradition and modernity in contemporary culture, new experiences of time and space and the revolution in information technologies. In an exploration of these themes the collection provides insight into academic studies of football in Portugal, Germany, England, Spain, Brazil, Angola, Mozambique, China, Japan, South Korea, Russia and the USA. At examining football-related phenomena under the headings of nations and migration, myths and business, the city and the dream, it shows how modernised football itself is object and subject in processes of both neo-liberal globalisation and counter hegemonic globalisation. While the contributions highlight characteristics of

particular local and national contexts, the volume focuses on global centre-periphery-relations and migration trajectories of football professionals by analysing recent developments in post-colonial Portuguese speaking areas: The high ranking of "Portuguese football" not only serves in national(ist) discourses or in order to emancipate the country from a marginal position, it also turns Portugal into football-talent exporter, confronting it partly with the same ambiguous consequences as Brazil and the African countries, who "lose" their football talents to the European centre. The receiving countries, again, include Portugal. This book was previously published as a special issue of Soccer in Society Football Fans Around the World Feb 14 2024 This volume investigates the way in which football supporters around the world express themselves as followers of teams, whether they be professional amateur or national. The diverse geographical and cultural array of contributions to this volume highlights not only the variety of how fans express themselves, but their commonalities as well. The collection brings together scholars of North and South America, Europe, Asia and Africa to present a global picture of fan culture. The collection shows that while every group of fans around the world has its own characteristics, the role of a football fan is laced with commonalities, irrespective of geography or culture. This book was previously published as a special issue of Soccer and Society.

Wide Band Gap Semiconductor Nanowires Feb 07 2021 GaN and ZnO nanowires can be grown using a wide variety of methods from physical vapor deposition to wet chemistry for optical devices. This book starts by presenting the similarities and differences between GaN and ZnO materials, as well as the assets and current limitations of nanowires for their use in optical devices, including feasibility and perspectives. It then focuses on the nucleation and growth mechanisms of ZnO and GaN nanowires, grown by various chemical and physical methods. Finally, it describes the formation of nanowire heterostructures applied to optical devices.

Handbook of Research on Transmedia Storytelling and Narrative Strategies April 04 2023 Transmedia storytelling is defined as a process where integral elements of fiction get dispersed systematically across multiple delivery channels to create a unified and coordinated entertainment experience. This process and its narrative models have had an increasing influence on the academic world in addressing both theoretical and practical dimensions of transmedia storytelling. The Handbook of Research on Transmedia Storytelling and Narrative Strategies is a critical scholarly resource that explores the connections between consumers of media content and information parts that come from multimedia platforms, as well as the concepts of narration and narrative styles. Featuring coverage on a wide range of topics such as augmented reality, digital society, and marketing strategies, this book explores narration as a method of relating to consumers. This book is ideal for advertising professionals, creative directors, academicians, scriptwriters, researchers, and upper-level graduate students seeking current research on narrative marketing strategies.

Chinese Fans of Japanese and Korean Pop Culture Jan 13 2024 How can Japanese popular culture gain numerous fans in China, despite pervasive anti-Japanese sentiment? How is it that there's such a strong anti-Korean sentiment in Chinese online fan communities when the official Sino-Korean relationship is quite stable before 2016? Avid fans in China are raising hundreds of thousands of dollars in funding to make gifts to their idols in foreign countries. Tabloid reports on Japanese and Korean celebrities have been known to trigger nationalist protests in China. So, what is the relationship between Chinese fandom of Japanese and Korean popular culture and nationalist sentiment among Chinese youth? Chen discusses how Chinese fans of Japanese and Korean popular culture have formed their own nationalistic discourse since the 1990s. She argues that, as nationalism is constructed from various entangled ideologies, narratives, myths and collective memories, popular culture simply becomes another resource for the construction of nationalism. Fans thus actively select, interpret and reproduce the content of cultural products to suit their own ends. Unlike existing works, which focus on the content of transnational cultural flows in East Asia, this book focuses on the reception and interpretation of the Chinese audience.

The Cnidaria, Past, Present and Future Feb 19 2022 This volume presents a broad panorama of the current status of research of invertebrate animals considered belonging to the phylum Cnidaria, such as hydra, jellyfish, sea anemone, and coral. In this book the Cnidarians are traced from the Earth's primordial oceans, to their response to the warming and acidifying oceans. Due to the role of corals in the carbon and calcium cycles, various aspects of cnidarian calcification are discussed. The relation of the Cnidaria with Mankind is approached, in accordance with the Editors' philosophy of bridging the artificial schism between science, arts and Humanities. Cnidarians' encounters with humans result in a broad spectrum of medical emergencies that are reviewed. The final section of the volume is devoted to the role of Hydra and Medusa in mythology and art.

Fans, Bloggers, and Gamers Apr 16 2024 Henry Jenkins's pioneering work in the early 1990s promoted the idea that fans are among the most active and socially connected consumers of popular culture. This volume maps the core theoretical and methodological issues in Fan Studies, and also charts the growth of participatory culture on the web.
