The International Space Station Jul 13 2022 Looks at the operations of the International Space Station from the perspective of the Houston flight control team, under the leadership of NASA's flight

directors, who authored the book. The book provides insight into the vast amount of time and energy that these teams devote to the development, planning and integration of a mission before it is executed. The passion and attention to detail of the flight control team members, who are always ready to step up when things do not go well, is a hallmark of NASA human spaceflight operations. With tremendous support from the ISS program office and engineering community, the flight control team has made the International Space Station and the programs before it a success.

State of Chaos Mar 01 2024 Over twenty years ago SETI closed most of the large radio telescope earth stations. One of them is not as abandoned as it seems, and it just received an alien message from 95,000 light years away. The alien message arrives with breathtaking possibilities. And with it a life-and-death struggle for the future of humanity. Technology intertwines with terrorism and sabotage in a race against the clock. Now Ex-Special Forces Captain Cade Rearden must get past his own trauma and become the warrior needed to defeat an unseen enemy intent on destroying the human race. Pulling together a crack military team, Rearden must take down a rogue AI intent on launching a chain of deadly attacks on American soil. And the key to staying one step ahead of the enemy could lie in understanding and protecting the incredible alien message. State of Chaos is the first book in the riveting Cade Rearden science fiction thriller series. If you like near-future technology, complex heroes, and high-octane action, then you'll love JK Franks' explosive adventure. Buy State of Chaos to join the fight against an AI Apocalypse today!

The Coach's Mind Manual Jun 04 2024 The Coach's Mind Manual combines the latest findings from neuroscience, psychology, and mindfulness research to provide an accessible framework to help coaches and leadership development specialists improve their awareness of the mind, enhancing their coaching practice. Syed Azmatullah explains how such knowledge can be used to guide clients on a journey of self-discovery, facilitating transformational changes and enriching their performance and personal lives. Part One considers the mind's management committee, the cerebral cortex, and how its contrasting functions can be accessed to improve problem solving skills. Part Two considers the mind's middle management, the limbic system, balancing executive direction with our social and emotional needs, driving motivation around core values. Part Three examines how the environment, via the body, influences our mental infrastructure at various stages in life, guiding the selection of interventions. Part Four looks at interpersonal dynamics and how to maximise team performance. Part Five considers the power of collaboration for generating the culture needed to improve the sustainability of our global community. Each section contains self-reflection exercises and experiential role-play to help clients derive benefit from their new personal insights. Coaches are encouraged to combine the broad range of concepts presented with their own experience, creating a contextually-driven coaching process. By focusing on the mind as the target for coaching interventions Azmatullah establishes a comprehensive framework for achieving transformational change. The Coach's Mind Manual is ideal for all professionals engaged in adult development including executive coaches, business coaches, human resource development professionals, leadership development professionals, management consultants and organisational development professionals.
