

Diameter and distance potentiometers - Calibration with code C80.

Enter C80 by simultaneously pressing and holding the CODE and ALU buttons and rotating the main shaft. When C80 appears just release the buttons.

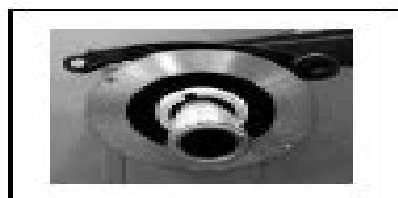

... is read out for 1 second. Then the voltages reading for each pot is displayed

The left-hand reading is the voltage setting of the diameter potentiometer.
The right-hand reading is the voltage setting of the distance potentiometer.

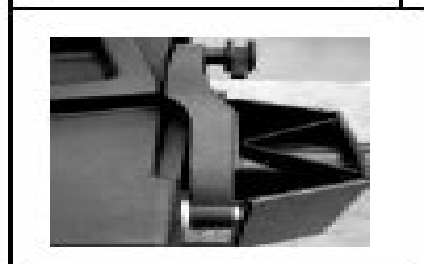

Step 1

Setting the diameter potentiometer:

Mount the wheel adapter on the machine. Pull out the distance gauge arm and place on the edge of wheel adapter. The reading in the left display should be set between 3.55 – 3.60. If adjustment is needed, remove the weight tray and adjust pot on the small gear wheel by using a flat screwdriver (the 10 mm nut may need to be loosened) to turn the shaft of pot. Replace weight tray. On the 2400 the display panel has to be removed first before the weight tray.

Setting the distance potentiometer:

Bring the distance gauge arm back to the home position (resting on the weight tray) the reading in the right display should be within 4.25 to 4.30. If adjustment is needed remove the weight tray and adjust pot on large wheel on left side of machine by using a flat screwdriver (the 10 mm nut may need to be loosened) to turn the shaft of pot. Replace weight tray. On the 2400 the display panel has to be removed first before the weight tray.

Press the CODE button to store both values.

Step 2

Pull out the distance gauge arm by exactly 290 mm (29 on the scale) and press the CODE button to store the value. **IMPORTANT:** Be careful to pull the gauge out to 290 mm or 29 on the scale. This is almost fully extended.
