*Creating the Jazz Solo* Jul 03 2021 Throughout his life, Louis Armstrong tried to explain how singing with a barbershop quartet on the streets of New Orleans was foundational to his musicianship. Until now, there has been no in-depth inquiry into what he meant when he said, “I figure singing and playing is the same,” or, “Singing was more into my blood than the trumpet.” *Creating the Jazz Solo: Louis Armstrong and Barbershop Harmony* shows that Armstrong understood exactly the relationship between what he sang and what

he played, and that he meant these comments to be taken literally: he was singing through his horn. To describe the relationship between what Armstrong sang and played, author Vic Hobson discusses elements of music theory with a style accessible even to readers with little or no musical background. Jazz is a music that is often performed by people with limited formal musical education. Armstrong did not analyze what he played in theoretical terms. Instead, he thought about it in terms of the voices in a barbershop quartet. Understanding how Armstrong, and other pioneer jazz musicians of his generation, learned to play jazz and how he used his background of singing in a quartet to develop the jazz solo has fundamental implications for the teaching of jazz history and performance today. This assertive book provides an approachable foundation for current musicians to unlock the magic and understand jazz the Louis Armstrong way.

Jazz Piano and Harmony Apr 11 2022 Geared to the beginning to intermediate student, this book starts with triadic and four part chords, and transitions into the concept of voice leading via inversions which is the key to moving voicings in a smooth manner. Numerous exercises and examples are included and performed on the accompanying CD. Great for either the classroom or individual study.
