Fundamentals of Criminal Law: Caught in the Act offers an accessible, comprehensive and contemporary survey of the field. With a focus on the current state of the law and on contemporary problems that matter to students, all presented in way that piques curiosity and interest, this book will cover topics such as hate crime, free speech, human trafficking, firearms possession and use, self-defense, cybercrime, and Internet stalking. Author Daniel E. Hall has written engaging content to help students think critically about how criminal acts are defined, defended, and determined. Built around a conversational narrative, the concepts and optional case studies connect to real life. There is also a clear emphasis on cases and examples that are relevant to criminal justice majors and future practitioners, such as litigation against police and correctional officers, terrorism, the death penalty, corporal punishment in prisons, etc. The Texas Penal Code for 2017 contains the following: Title 1. This influential book presents a comprehensive analysis of the American legal system and proposes a radical reformulation of criminal law. The author argues that the current system is characterized by a confusing array of inconsistent and arbitrary rules, and proposes a unified Model Penal Code that would provide a clear and consistent framework for criminal law. Drawing on his experience as a leading legal scholar and practitioner, Wechsler provides a compelling argument for the need for fundamental reform of the American legal system. The Model Penal Code has been called the principal text in criminal law teaching. It is an ambitious, and influential, attempt to work out the principles of American criminal law in a systematic way. By highlighting the Code's conceptual structure, this study aid helps students to navigate the Code's complex provisions and helps teachers unlock its full pedagogic potential, one all too easily obscured by a fragmented discussion of Code sections dealing with a variety of topics. The appendix includes the text of the Model Penal Code, parts I & II. These five volumes contain the complete texts of the law codes drafted for New York State by David Dudley Field and his colleagues during the years 1847 to 1865. They include Field's two procedural codes and three substantive codes. In this second edition of his well-received introductory overview of the Model Penal Code, Markus Dubber retains the book's original aim to serve as an accessible companion to the Code. Professor Dubber unlocks the Model Penal Code's potential as a key to the study of American criminal law for law students and teachers, and for anyone else with an interest in understanding the basic contours of American criminal law. While the book's general goal and basic approach remain unchanged, its content has been thoroughly revised. Citations to primary and secondary materials have been updated and supplemented where appropriate. The American Law Institute's ongoing revision of the Code's sentencing and sexual offense provisions has been taken into account. Also, the comparative analysis found sporadically throughout the original edition has been expanded in places to provide additional context.
