**Intelligent Communication, Control and Devices** Sushabhan Choudhury,Ranjan Mishra,Raj Gaurav Mishra,Adesh Kumar,2019-08-28 The book focuses on the integration of intelligent communication systems control systems and devices related to all aspects of engineering and sciences It includes high quality research papers from the 3rd international conference ICICCD 2018 organized by the Department of Electronics Instrumentation and Control Engineering at the University of Petroleum and Energy Studies Dehradun on 21 22 December 2018 Covering a range of recent advances in intelligent communication intelligent control and intelligent devices the book presents original research and findings as well as researchers and industrial practitioners practical development experiences of **Value Engineering** Del Younker,2003-05-14 This invaluable reference teaches effective and practical techniques to improve the overall performance and outcome of design projects in various industries Value Engineering highlights the application of value methodology to streamline current day operations strategic planning in company or business segments and everyday business decisions in the private sector The book shows how to maximize budgets reduce life cycle costs improve project understanding and create better working relationships It explains how to gather information for the creation evaluation development and presentation of new project ideas and shows how to design an appropriate task agenda and timeline **Utopian Discourses Across Cultures** Miriam Bait,Marina Brambilla,Valentina Crestani,2016 The authors of this volume analyze discourses on utopia with a view to adopting a multidisciplinary vision Belonging to a wide range of disciplines from political science and economics to computer science and linguistics they offer interesting extensive studies about how utopian scenarios are realized in different cultural contexts **Brown's Gas** George Wiseman,1997-01-01 *Measurement, Analysis and Remediation of Environmental Pollutants* Tarun Gupta,Swatantra Pratap Singh,Prashant Rajput,Avinash Kumar Agarwal,2019-10-08 This book discusses contamination of water air and soil media The book covers health effects of such contamination and discusses remedial measures to improve the situation Contributions by experts provide a comprehensive discussion on the latest developments in the detection and analysis of contaminants enabling researchers to understand the evolution of these pollutants in real time and develop more accurate source apportionment of these pollutants The contents of this book will be of interest to researchers professionals and policy makers alike *Organic Waste Recycling: Technology, Management and Sustainability* Chongrak Polprasert,Thammarat Koottatep,2017-06-15 This fourth edition of Organic Waste Recycling is fully updated with new material to create a comprehensive and accessible textbook New chapter on constructed wetlands for wastewater and faecal sludge stabilization New sections on waste recycling vs climate change and water faecal sludge and its characteristics hydrothermal carbonization technology up to date environmental criteria and legislation and environmental risk assessment New case studies with emphasis on practices in both developed and developing countries

have been included along with more exercises at the end of chapters to help the readers understand the technical principles and their application Novel concepts and strategies of waste management are presented Up to date research findings and innovative technologies of waste recycling program are provided This textbook is intended for undergraduate and graduate students majoring in environmental sciences and engineering as well as researchers professionals and policy makers who conduct research and practices in the related fields It is essential reading for experts in environmental science and engineering and sustainable waste reuse and recycling in both developed and developing countries

**Soft Computing: Theories and Applications** Millie Pant, Tarun K. Sharma, Om Prakash Verma, Rajesh Singla, Afzal Sikander, 2020-02-24 The book focuses on soft computing and its applications to solve real world problems in different domains ranging from medicine and health care to supply chain management image processing and cryptanalysis It includes high quality papers presented at the International Conference on Soft Computing Theories and Applications SoCTA 2018 organized by Dr B R Ambedkar National Institute of Technology Jalandhar Punjab India Offering significant insights into soft computing for teachers and researchers alike the book inspires more researchers to work in the field of soft computing

**AI and Machine Learning Paradigms for Health Monitoring System** Hasmat Malik, Nuzhat Fatema, Jafar A. Alzubi, 2021-02-14 This book embodies principles and applications of advanced soft computing approaches in engineering healthcare and allied domains directed toward the researchers aspiring to learn and apply intelligent data analytics techniques The first part covers AI machine learning and data analytics tools and techniques and their applications to the class of several hospital and health real life problems In the later part the applications of AI ML and data analytics shall be covered over the wide variety of applications in hospital health engineering and or applied sciences such as the clinical services medical image analysis management support quality analysis bioinformatics device analysis and operations The book presents knowledge of experts in the form of chapters with the objective to introduce the theme of intelligent data analytics and discusses associated theoretical applications At last it presents simulation codes for the problems included in the book for better understanding for beginners

**Advances in Smart Grid and Renewable Energy** Karma Sonam Sherpa, Akash Kumar Bhoi, Akhtar Kalam, Manoj Kumar Mishra, 2021-01-04 This book comprises select proceedings of the international conference ETAEERE 2020 and primarily focuses on renewable energy resources and smart grid technologies The book provides valuable information on the technology and design of power grid integration on microgrids of green energy sources Some of the topics covered include solar PV array hybrid microgrid daylight harvesting green computing photovoltaic applications nanogrid applications AC DC AC converter for wind energy systems solar photovoltaic panels PEM fuel cell system and biogas run dual fueled diesel engine The contents of this book will be useful for researchers and practitioners working in the areas of smart grids and renewable energy generation distribution and management

**Magnetocaloric Energy Conversion** Andrej Kitanovski, Jaka Tušek, Urban Tomc, Uroš Plaznik, Marko Ožbolt, Alojz Poredoš, 2014-12-03 This book provides the latest

research on a new alternative form of technology the magnetocaloric energy conversion This area of research concerns magnetic refrigeration and cooling magnetic heat pumping and magnetic power generation The book s systematic approach offers the theoretical basis of magnetocaloric energy conversion and its various sub domains and this is supported with the practical examples Besides these fundamentals the book also introduces potential solutions to engineering problems in magnetocalorics and to alternative technologies of solid state energy conversion The aim of the book is therefore to provide engineers with the most up to date information and also to facilitate the understanding design and construction of future magnetocaloric energy conversion devices The magnetocaloric energy conversion represents an alternative to compressor based refrigerators and heat pumps It is a serious alternative to power generation with low enthalpy heat sources This green technology offers an opportunity to use environmentally friendly solid refrigerants and the potentially high energy efficiency follows the trends of future energy conversion devices This book is intended for postgraduate students and researchers of refrigeration heat pumping power generation alternatives heat regenerators and advanced heat transfer mechanisms

*Innovative Data Communication Technologies and Application* Jennifer S. Raj,Abdullah M. Ilyasu,Robert Bestak,Zubair A. Baig,2021-02-02 This book presents the latest research in the fields of computational intelligence ubiquitous computing models communication intelligence communication security machine learning informatics mobile computing cloud computing and big data analytics The best selected papers presented at the International Conference on Innovative Data Communication Technologies and Application ICIDCA 2020 are included in the book The book focuses on the theory design analysis implementation and applications of distributed systems and networks *Technology, Innovation and Creativity in Digital Society* Daria Bylieva,Alfred Nordmann,2021-10-25 This book requires an interdisciplinary understanding of creativity ideal for the formation of a digital public culture Educating students young professionals and future engineers is to develop their capacity for creativity Can creativity be learned With this question the relations of technology and art appear in a new light Especially the notion of progress takes on a new meaning and must be distinguished from innovation The discussion of particular educational approaches the exploration of digital technologies and the presentation of best practice examples conclude the book University teachers show how the teaching of creativity reinforces the teaching of other subjects especially foreign languages *Proceedings of the Fourth International Conference in Ocean Engineering (ICOE2018)* K. Murali,V. Sriram,Abdus Samad,Nilanjan Saha,2018-12-31 This book comprises selected proceedings of the Fourth International Conference in Ocean Engineering ICOE2018 focusing on emerging opportunities and challenges in the field of ocean engineering and offshore structures It includes state of the art content from leading international experts making it a valuable resource for researchers and practicing engineers alike **Constructive Nonsmooth Analysis and Related Topics** Vladimir F. Demyanov,Panos M. Pardalos,Mikhail Batsyn,2013-11-12 This volume contains a collection of papers based on lectures and presentations delivered at the International Conference on Constructive Nonsmooth Analysis CNSA

held in St Petersburg Russia from June 18-23, 2012. This conference was organized to mark the 50th anniversary of the birth of nonsmooth analysis and nondifferentiable optimization and was dedicated to J.J. Moreau and the late B.N. Pshenichnyi, A.M. Rubinov and N.Z. Shor whose contributions to NSA and NDO remain invaluable. The first four chapters of the book are devoted to the theory of nonsmooth analysis. Chapters 5-8 contain new results in nonsmooth mechanics and calculus of variations. Chapters 9-13 are related to nondifferentiable optimization and the volume concludes with four chapters containing interesting and important historical chapters including tributes to three giants of nonsmooth analysis: convexity and optimization, Alexandr Alexandrov, Leonid Kantorovich and Alex Rubinov. The last chapter provides an overview and important snapshots of the 50-year history of convex analysis and optimization.

*Advances and Applications Through Fungal Nanobiotechnology* Ram Prasad, 2016-11-08. Fungal nanobiotechnology has emerged as one of the key technologies and an eco-friendly source of food and harnessed to ferment and preserve foods and beverages as well as applications in human health: antibiotics, anti-cholesterol statins and immunosuppressive agents while industry has used fungi for large-scale production of enzymes, acids, biosurfactants and to manage fungal disease in crops and pest control. With the harnessing of nanotechnology, fungi have grown increasingly important by providing a greener alternative to chemically synthesized nanoparticles.

*Neurotransmitters in Plant Signaling and Communication* František Baluška, Soumya Mukherjee, Akula Ramakrishna, 2020-09-20. This book provides a comprehensive update on the recent developments concerning the role of plant neurotransmitters in signaling and communication. Physiological investigations over the past few decades have demonstrated that plants employ neurotransmitters in various signaling pathways. Plant-based neurotransmitters: serotonin, melatonin, dopamine, acetylcholine and GABA share biochemical similarities with those in animal systems in terms of their chemical nature and biochemical pathways. Plant-environment interaction associated with abiotic stress management, growth modulation, flowering, circadian rhythm, fruit ripening and allelopathic interactions are a major focus of research in the field and recent advances in genomic, transcriptomic and metabolomic approaches have resulted in the deciphering of the molecular mechanisms associated with various neurotransmitters in plants. Other current and potential areas of investigation include the putative phytohormone, phyto-melatonin and receptor-mediated signaling in plant neurotransmitters. Providing an up-to-date overview of molecular crosstalk mechanisms between various neurotransmitters, the book offers essential insights to help readers gain a better understanding of the physiology of plant signaling and communication with the environment.

*Advanced Intelligent Systems for Sustainable Development (AI2SD'2019)* Mostafa Ezziyyani, 2020-02-05. This book gathers papers presented at the second installment of the International Conference on Advanced Intelligent Systems for Sustainable Development (AI2SD 2019) which was held on July 08-11, 2019 in Marrakech, Morocco. It offers comprehensive coverage of recent advances in big data, data analytics and related paradigms. The book consists of fifty-two chapters, each of which shares the latest research in the fields of big data and data science and describes use cases and applications of big

data technologies in various domains such as social networks and health care All parts of the book discuss open research problems and potential opportunities that have arisen from the rapid advances in big data technologies In addition the book surveys the state of the art in data science and provides practical guidance on big data analytics and data science Expert perspectives are provided by authoritative researchers and practitioners from around the world who discuss research developments and emerging trends present case studies on helpful frameworks and innovative methodologies and suggest best practices for efficient and effective data analytics Chiefly intended for researchers IT professionals and graduate students the book represents a timely contribution to the growing field of big data which has been recognized as one of the leading emerging technologies that will have a major impact on various fields of science and various aspects of human society over the next several decades Therefore the content in this book is an essential tool to help readers understand current developments and provides them with an extensive overview of the field of big data analytics as it is practiced today The chapters cover technical aspects of key areas that generate and use big data such as management and finance medicine and health care networks the Internet of Things big data standards benchmarking of systems and others In addition to a diverse range of applications key algorithmic approaches such as graph partitioning clustering and finite mixture modeling of high dimensional data are also covered The varied collection of topics addressed introduces readers to the richness of the emerging field of big data analytics

**Advances in Soil Microbiology: Recent Trends and Future Prospects** Tapan Kumar Adhya, Banwari Lal, Balaram Mohapatra, Dhiraj Paul, Subhasis Das, 2018-02-28 This book presents a comprehensive collection of articles illustrating the importance of microbial community structure and function for ecosystem sustainability and environmental reclamation It addresses a diverse range of topics including microbial diversity physiology genomics ecosystem function interaction metabolism and the fruitful use of microbial communities for crop productivity and environmental remediation In addition the book explores issues ranging from general concepts on the diversity of microorganisms in soil and ecosystem function to the evolution and taxonomy of soil microbiota with future prospects It covers cutting edge methods in soil microbial ecological studies rhizosphere microflora the role of organic matter in plant productivity biological nitrogen fixation and its genetics microbial transformation of plant nutrients in soil plant growth promoting rhizobacteria and organic matter transformation The book also discusses the application of microbes in biodegradation of xenobiotic contaminants It covers bio fertilizers and their role in sustainable agriculture and soil health biological control of insect pests and plant pathogens and the latest tools of omics in soil microbiology i e genomics proteomics transcriptomics and metabolomics which offer pioneering approaches to the exploration of microbial structure and function

*Functionally Graded Materials* Y. Miyamoto, W.A. Kaysser, B.H. Rabin, A. Kawasaki, R.G. Ford, 2013-11-27 Seven years have elapsed since Dr Renee Ford editor in chief of Materials Technology first suggested to me to publish a book on Functionally Graded Materials FGMs She said that the FGM concept then largely unknown outside of Japan and a

relatively few laboratories elsewhere would be of great interest to everyone working in the materials field because of its potentially universal applicability There was no book about FGMs in English at that time although the number of research papers review articles and FGM conference proceedings had been increasing yearly We discussed what the book should cover and decided it should present a comprehensive description from basic theory to the most recent applications of FGMs This would make it useful both as an introduction to FGMs for those simply curious about what this new materials field was all about and also as a textbook for researchers engineers and graduate students in various material fields The FGM Forum in Japan generously offered to support this publication program is very difficult for an individual author to write a book that Because it covers such a wide range of various aspects of many different materials I invited more than 30 eminent materials scientists throughout the world who were associated with FGM research to contribute selected topics I also asked several leading researchers in this field to edit selected chapters Dr Barry H Rabin then at the U S *Emerging Technologies in Data Mining and Information Security* Ajith Abraham,Paramartha Dutta,Jyotsna Kumar Mandal,Abhishek Bhattacharya,Soumi Dutta,2018-12-12 This book features research papers presented at the International Conference on Emerging Technologies in Data Mining and Information Security IEMIS 2018 held at the University of Engineering Management Kolkata India on February 23 25 2018 It comprises high quality research work by academicians and industrial experts in the field of computing and communication including full length papers research in progress papers and case studies related to all the areas of data mining machine learning Internet of Things IoT and information security
