Manfredini, Marco Pedroni**

Memorandum For November 2010 Mathematics Paper 2

Quiver Grassmannians of Extended Dynkin Type D Part I: Schubert Systems and Decompositions into Affine Spaces Oliver Lorscheid, Thorsten Weist, 2019-12-02 Let Q be a quiver of extended Dynkin type D_n . In this first of two papers the authors show that the quiver Grassmannian $\text{Gr}_e M$ has a decomposition into affine spaces for every dimension vector e and every indecomposable representation M of defect 1 and defect 0 with the exception of the non Schurian representations in homogeneous tubes. The authors characterize the affine spaces in terms of the combinatorics of a fixed coefficient quiver for M . The method of proof is to exhibit explicit equations for the Schubert cells of $\text{Gr}_e M$ and to solve this system of equations successively in linear terms. This leads to an intricate combinatorial problem for whose solution the authors develop the theory of Schubert systems. In Part 2 of this pair of papers they extend the result of this paper to all indecomposable representations M of Q and determine explicit formulae for the F polynomial of M . *Formality of the Little N -disks Operad* Pascal Lambrechts, Ismar Volić, 2014-06-05 The little disks operad along with its variants is an important tool in homotopy theory. It is defined in terms of configurations of disjoint dimensional disks inside the standard unit disk and it was initially conceived for detecting and understanding fold loop spaces. Its many uses now stretch across a variety of disciplines including topology, algebra and mathematical physics. In this paper the authors develop the details of Kontsevich's proof of the formality of little disks operad over the field of real numbers. More precisely, one can consider the singular chains on as well as the singular homology of these two objects, which are operads in the category of chain complexes. The formality then states that there is a zig-zag of quasi-isomorphisms connecting these two operads. The formality also, in some sense, holds in the category of commutative differential graded algebras. The authors additionally prove a relative version of the formality for the inclusion of the little disks operad in the little disks operad when **On the Differential Structure of Metric Measure Spaces and Applications** Nicola Gigli, 2015-06-26 The main goals of this paper are: i) To develop an abstract differential calculus on metric measure spaces by investigating the duality relations between differentials and gradients of Sobolev functions. This will be achieved without calling into play any sort of analysis in charts, our assumptions being that the metric space is complete and separable and the measure is Radon and non-negative. ii) To employ these notions of calculus to provide, via integration by parts, a general definition of distributional Laplacian, thus giving a meaning to an expression like $\int \Delta f \, d\mu$ where f is a function and μ is a measure. iii) To show that, on spaces with Ricci curvature bounded from below and dimension bounded from above, the Laplacian of the distance function is always a measure and that this measure has the standard sharp comparison properties. This result requires an additional assumption on the space which reduces to strict convexity of the norm in the case of smooth Finsler structures and is always satisfied on spaces with linear Laplacian, a situation which is analyzed in detail. **Railway Safety, Reliability, and Security: Technologies and Systems Engineering** Flammini,

Francesco,2012-05-31 Human errors as well as deliberate sabotage pose a considerable danger to passengers riding on the modern railways and have created disastrous consequences To protect civilians against both intentional and unintentional threats rail transportation has become increasingly automated Railway Safety Reliability and Security Technologies and Systems Engineering provides engineering students and professionals with a collection of state of the art methodological and technological notions to support the development and certification of real time safety critical railway control systems as well as the protection of rail transportation infrastructures *Fundamental Solutions and Local Solvability for Nonsmooth*

Hormander's Operators Marco Bramanti, Luca Brandolini, Maria Manfredini, Marco Pedroni,2017-09-25 The authors consider operators of the form in a bounded domain of where are nonsmooth Hormander's vector fields of step such that the highest order commutators are only Hormander continuous Applying Levi's parametrix method the authors construct a local fundamental solution for and provide growth estimates for and its first derivatives with respect to the vector fields Requiring the existence of one more derivative of the coefficients the authors prove that also possesses second derivatives and they deduce the local solvability of constructing by means of a solution to with Hormander continuous The authors also prove estimates on this solution

The Democratic Dilemma of American Education Arnold Shober,2018-04-19 This compelling new book asks How can American education policy be consistent with democratic ideals Robust democracy is the combination of participation self rule equality understanding and inclusion but these norms can produce contradictory policy Local control in education policy can undermine educational equality Participation in teachers unions can improve working conditions but thwart self rule by local taxpayers The Democratic Dilemma of American Education draws on contemporary research in political science and education policy to offer remarkably balanced insights into these challenging issues Expertly navigating through local state and federal layers of education policy Arnold Shober examines contemporary controversies over education governance teachers unions and collective bargaining school funding school choice academic accountability and desegregation Shober describes the inherent practical dilemmas of current policy and the difficulties policymakers face in overcoming them to produce lasting educational reform in a democratic federal system of government Timely engaging and accessible this is the ideal resource for courses in public policy as well as education and politics **Advances in Information Technology**

Borworn Papasratorn, Kittichai Lavangnananda, Wichian Chutimaskul, Vajirasak Vanijja,2010-10-19 It was our intention to organize IAIT 2010 as the place where researchers and industrial practitioners could share their work and achievements in information technology both theoretical and in application This is the fourth time we have organized IAIT to serve as a venue to foster collaboration among industry and academia from different parts of the world A lot has been achieved since the launch of the first IAIT in 2005 however many challenges remain to be addressed in the years to come IAIT 2010 drew attendance from leading professionals in both industry and academes as in IAIT 2009 In addition to the relevant program offered by IAIT 2010 the conference provided an excellent environment to meet peers in the IT profession build relationships

and exchange lessons learned During the conference participants presented and discussed the latest topics in information technology ranging from technical knowledge and experimentation to future strategic directions As the Internet continues to reach out even further almost everything in our daily life is accessible via IP addresses our societies need to recognize that we need new knowledge to make this advancement become a benefit to all life in this world It is almost impossible to gain this new knowledge without contributions from our colleagues working in various aspects of information technology Some times new knowledge found in one area can help simplify difficult task in another Together we can make our world better by creating applications from information technology

Hecke Operators and Systems of Eigenvalues on Siegel Cusp Forms Kazuyuki Hatada,2021-06-18 View the abstract

A Country is Not a Company Paul R. Krugman,2009 Nobel Prize winning economist Paul Krugman argues that business leaders need to understand the differences between economic policy on the national and international scale and business strategy on the organizational scale Economists deal with the closed system of a national economy whereas executives live in the open system world of business Moreover economists know that an economy must be run on the basis of general principles but businesspeople are forever in search of the particular brilliant strategy Krugman s article serves to elucidate the world of economics for businesspeople who are so close to it and yet are continually frustrated by what they see Since 1922 Harvard Business Review has been a leading source of breakthrough management ideas many of which still speak to and influence us today The Harvard Business Review Classics series now offers readers the opportunity to make these seminal pieces a part of your permanent management library Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world and will have a direct impact on you today and for years to come

The Emperor of All Maladies Siddhartha Mukherjee,2011-08-09 Winner of the Pulitzer Prize and a documentary from Ken Burns on PBS this New York Times bestseller is an extraordinary achievement The New Yorker a magnificent profoundly humane biography of cancer from its first documented appearances thousands of years ago through the epic battles in the twentieth century to cure control and conquer it to a radical new understanding of its essence Physician researcher and award winning science writer Siddhartha Mukherjee examines cancer with a cellular biologist s precision a historian s perspective and a biographer s passion The result is an astonishingly lucid and eloquent chronicle of a disease humans have lived with and perished from for more than five thousand years The story of cancer is a story of human ingenuity resilience and perseverance but also of hubris paternalism and misperception Mukherjee recounts centuries of discoveries setbacks victories and deaths told through the eyes of his predecessors and peers training their wits against an infinitely resourceful adversary that just three decades ago was thought to be easily vanquished in an all out war against cancer The book reads like a literary thriller with cancer as the protagonist Riveting urgent and surprising The Emperor of All Maladies provides a fascinating glimpse into the future of cancer treatments It is an illuminating book that provides hope and clarity to those seeking to demystify cancer

Interpolation for Normal Bundles of General Curves Atanas Atanasov, Eric Larson, David Yang, 2019-02-21 Given n general points p_1, p_2, \dots, p_n in \mathbb{P}^r it is natural to ask when there exists a curve C in \mathbb{P}^r of degree d and genus g passing through p_1, p_2, \dots, p_n . In this paper the authors give a complete answer to this question for curves C with nonspecial hyperplane section. This result is a consequence of our main theorem which states that the normal bundle N_C of a general nonspecial curve of degree d and genus g in \mathbb{P}^r with $d > g$ has the property of interpolation, i.e. that for a general effective divisor D of any degree on C either $H^0(N_C(D)) > 0$ or $H^1(N_C(D)) > 0$ with exactly three exceptions. [Algorithmic Reason](#) Claudia Aradau, Tobias Blanke, 2022-04-25 This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. Are algorithms ruling the world today? Is artificial intelligence making life and death decisions? Are social media companies able to manipulate elections? As we are confronted with public and academic anxieties about unprecedented changes, this book offers a different analytical prism through which these transformations can be explored. Claudia Aradau and Tobias Blanke develop conceptual and methodological tools to understand how algorithmic operations shape the government of self and other. They explore the emergence of algorithmic reason through rationalities, materializations, and interventions, and trace how algorithmic rationalities of decomposition, recomposition, and partitioning are materialized in the construction of dangerous others, the power of platforms, and the production of economic value. The book provides a global transdisciplinary perspective on algorithmic operations, drawing on qualitative and digital methods to investigate controversies ranging from mass surveillance and the Cambridge Analytica scandal in the UK to predictive policing in the US and from the use of facial recognition in China and drone targeting in Pakistan to the regulation of hate speech in Germany. **How Learning Works** Susan A. Ambrose, Michael W. Bridges, Michele DiPietro, Marsha C. Lovett, Marie K. Norman, 2010-04-16 Praise for *How Learning Works*: *How Learning Works* is the perfect title for this excellent book. Drawing upon new research in psychology, education, and cognitive science, the authors have demystified a complex topic into clear explanations of seven powerful learning principles. Full of great ideas and practical suggestions, all based on solid research evidence, this book is essential reading for instructors at all levels who wish to improve their students' learning. Barbara Gross Davis, assistant vice chancellor for educational development, University of California, Berkeley, and author of *Tools for Teaching*. This book is a must-read for every instructor, new or experienced. Although I have been teaching for almost thirty years, as I read this book, I found myself resonating with many of its ideas, and I discovered new ways of thinking about teaching. Eugenia T. Paulus, professor of chemistry, North Hennepin Community College, and 2008 U.S. Community Colleges Professor of the Year from The Carnegie Foundation for the Advancement of Teaching and the Council for Advancement and Support of Education. Thank you, Carnegie Mellon, for making accessible what has previously been inaccessible to those of us who are not learning scientists. Your focus on the essence of learning, combined with concrete examples of the daily challenges of teaching and clear tactical

strategies for faculty to consider is a welcome work I will recommend this book to all my colleagues Catherine M Casserly senior partner The Carnegie Foundation for the Advancement of Teaching As you read about each of the seven basic learning principles in this book you will find advice that is grounded in learning theory based on research evidence relevant to college teaching and easy to understand The authors have extensive knowledge and experience in applying the science of learning to college teaching and they graciously share it with you in this organized and readable book From the Foreword by Richard E Mayer professor of psychology University of California Santa Barbara coauthor e Learning and the Science of Instruction and author Multimedia Learning

Weakly Modular Graphs and Nonpositive Curvature Jérémie Chalopin,Victor Chepoi,Hiroshi Hirai,Damian Osajda,2021-06-18 This article investigates structural geometrical and topological characterizations and properties of weakly modular graphs and of cell complexes derived from them The unifying themes of our investigation are various nonpositive curvature and local to global properties and characterizations of weakly modular graphs and their subclasses Weakly modular graphs have been introduced as a far reaching common generalization of median graphs and more generally of modular and orientable modular graphs Helly graphs bridged graphs and dual polar graphs occurring under different disguises 1 skeletons collinearity graphs covering graphs domains etc in several seemingly unrelated fields of mathematics Metric graph theory Geometric group theory Incidence geometries and buildings Theoretical computer science and combinatorial optimization We give a local to global characterization of weakly modular graphs and their subclasses in terms of simple connectedness of associated triangle square complexes and specific local combinatorial conditions In particular we revisit characterizations of dual polar graphs by Cameron and by Brouwer Cohen We also show that disk Helly graphs are precisely the clique Helly graphs with simply connected clique complexes With 11 embeddable weakly modular and weakly modular graphs we associate high dimensional cell complexes having several strong topological and geometrical properties contractibility and the CAT 0 property Their cells have a specific structure they are basis polyhedra of even matroids in the first case and orthoscheme complexes of gated dual polar subgraphs in the second case We resolve some open problems concerning subclasses of weakly modular graphs we prove a Brady McCammond conjecture about CAT 0 metric on the orthoscheme

A Homology Theory for Smale Spaces Ian F. Putnam,2014-09-29 The author develops a homology theory for Smale spaces which include the basic sets for an Axiom A diffeomorphism It is based on two ingredients The first is an improved version of Bowen's result that every such system is the image of a shift of finite type under a finite to one factor map The second is Krieger's dimension group invariant for shifts of finite type He proves a Lefschetz formula which relates the number of periodic points of the system for a given period to trace data from the action of the dynamics on the homology groups The existence of such a theory was proposed by Bowen in the 1970s

Military Cost-Benefit Analysis Francois Melese,Anke Richter,Binyam Solomon,2015-03-27 This is the first comprehensive book on Military Cost Benefit Analysis and provides novel approaches to structuring cost benefit and affordability analysis amidst an uncertain defense environment and

cloudy fiscal prospects Lifting the veil on military Cost Benefit Analysis this volume offers several new practical tools designed to guide defense investments and divestments combined with a selection of real world applications The widespread employment of Cost Benefit Analysis offers a unique opportunity to transform legacy defense forces into efficient effective and accountable 21st century organizations A synthesis of economics statistics and decision theory CBA is currently used in a wide range of defense applications in countries around the world i to shape national security strategy ii to set acquisition policy and iii to inform critical investments in people equipment infrastructure services and supplies As sovereign debt challenges squeeze national budgets and emerging threats disrupt traditional notions of security this volume offers valuable tools to navigate the political landscape meet calls for fiscal accountability and boost the effectiveness of defense investments to help guarantee future peace and stability A valuable resource for scholars practitioners novices and experts this book offers a comprehensive overview of Military Cost Benefit Analysis and will appeal to anyone interested or involved in improving national security and will also be of general interest to those responsible for major government programs projects or policies

Teaching at Its Best Linda B. Nilson, 2010-04-20 Teaching at Its Best This third edition of the best selling handbook offers faculty at all levels an essential toolbox of hundreds of practical teaching techniques formats classroom activities and exercises all of which can be implemented immediately This thoroughly revised edition includes the newest portrait of the Millennial student current research from cognitive psychology a focus on outcomes maps the latest legal options on copyright issues and how to best use new technology including wikis blogs podcasts vodcasts and clickers Entirely new chapters include subjects such as matching teaching methods with learning outcomes inquiry guided learning and using visuals to teach and new sections address Felder and Silverman s Index of Learning Styles SCALE UP classrooms multiple true false test items and much more Praise for the Third Edition of Teaching at Its Best Everyone veterans as well as novices will profit from reading Teaching at Its Best for it provides both theory and practical suggestions for handling all of the problems one encounters in teaching classes varying in size ability and motivation Wilbert McKeachie Department of Psychology University of Michigan and coauthor McKeachie s Teaching Tips This new edition of Dr Nilson s book with its completely updated material and several new topics is an even more powerful collection of ideas and tools than the last What a great resource especially for beginning teachers but also for us veterans L Dee Fink author Creating Significant Learning Experiences This third edition of Teaching at Its Best is successful at weaving the latest research on teaching and learning into what was already a thorough exploration of each topic New information on how we learn how students develop and innovations in instructional strategies complement the solid foundation established in the first two editions Marilla D Svinicki Department of Psychology The University of Texas Austin and coauthor McKeachie s Teaching Tips

Sums of Reciprocals of Fractional Parts and Multiplicative Diophantine Approximation Victor Beresnevich, Alan Haynes, Sanju Velani, 2020-04-03

One-Dimensional Empirical Measures, Order Statistics, and Kantorovich Transport Distances Sergey Bobkov, Michel

Ledoux,2019-12-02 This work is devoted to the study of rates of convergence of the empirical measures μ_n over a sample X_k of independent identically distributed real valued random variables towards the common distribution in Kantorovich transport distances W_p . The focus is on finite range bounds on the expected Kantorovich distances $E W_p$ or $E W_{pp}$ in terms of moments and analytic conditions on the measure and its distribution function. The study describes a variety of rates from the standard one $1/n$ to slower rates and both lower and upper bounds on $E W_p$ for fixed n in various instances. Order statistics reduction to uniform samples and analysis of beta distributions inverse distribution functions log concavity are main tools in the investigation. Two detailed appendices collect classical and some new facts on inverse distribution functions and beta distributions and their densities necessary to the investigation.

Ocean Acidification
National Research Council, Division on Earth and Life Studies, Ocean Studies Board, Committee on the Development of an Integrated Science Strategy for Ocean Acidification Monitoring, 2010-09-14

The ocean has absorbed a significant portion of all human made carbon dioxide emissions. This benefits human society by moderating the rate of climate change but also causes unprecedented changes to ocean chemistry. Carbon dioxide taken up by the ocean decreases the pH of the water and leads to a suite of chemical changes collectively known as ocean acidification. The long term consequences of ocean acidification are not known but are expected to result in changes to many ecosystems and the services they provide to society.

Ocean Acidification: A National Strategy to Meet the Challenges of a Changing Ocean reviews the current state of knowledge, explores gaps in understanding and identifies several key findings. Like climate change, ocean acidification is a growing global problem that will intensify with continued CO₂ emissions and has the potential to change marine ecosystems and affect benefits to society. The federal government has taken positive initial steps by developing a national ocean acidification program but more information is needed to fully understand and address the threat that ocean acidification may pose to marine ecosystems and the services they provide. In addition, a global observation network of chemical and biological sensors is needed to monitor changes in ocean conditions attributable to acidification.
