Condition or Process? Researching Race in Education Adrienne D. Dixon, Gloria J. Ladson-Billings, Cecilia E. Suarez, William T. Trent, James D. Anderson, 2021-01-18 The question of why we need to think about how we research race demands a conceptualization of race that captures both its social construction and its temporal evolution We need both an understanding of race and clarity about how we talk about it in our design and conduct of research and in how we interpret and apply it in our findings As a field we can use research on race and racism in education to help construct social change Our purpose with this volume is to underscore the persistence of the discriminatory actions processes and the normalization of the use of race and class conditions to justify the existing and growing disparity between the quality of life and opportunity for middle class and more affluent Whites and that for people of color and people of color who live in poverty As editors of this volume we wonder what more we could learn and understand about the process and condition of race if we dare to ask bold questions about race and racism and commit to methods and analyses that respect the experiences and knowledges of our research participants and partners

Between the World and the Urban Classroom George Sirrakos Jr.,Christopher Emdin,2017-05-12 Borrowing from the ideas of John Dewey schools and classrooms are a reflection of the world therefore in order to make sense of the urban classroom we need to make sense of the world In this book the editors have compiled a collection of nine critical essays or chapters each examining a particular contemporary national and or international event The essays each undertake an explicit approach to naming oppression and addressing it in the context of urban schooling Each essay has a two fold purpose The first purpose is to help readers see the world unveiled through a more critical lens and to problematize long held beliefs about urban classrooms with regard to race gender social class equity and access Second as each author draws parallels between an event and urban classrooms a better understanding of the microstructures that exist in urban classrooms emerges At a time of serious political economic and social uncertainty we need a book like this one that showcases how the world can be seen as a critical site of curriculum and pedagogy A powerful intersectional analysis of the

world word and urban sociopolitical context authors in this book push the boundaries of what educators know and do in urban schools and classrooms Grounded in frameworks of critical race theory and culturally relevant pedagogy authors center essential societal moments that must be viewed as the real curriculum These moments can equip students with tools to examine the what of the world as well as how to examine critique challenge and disrupt individual systemic and structural realities and practices that perpetuate and maintain a racist sexist homophobic and xenophobic status quo This is an important forward thinking innovative book a welcome addition to the field of urban education H Richard Milner IV Helen Faison Chair of Urban Education University of Pittsburgh

The African American Child Yvette R. Harris, PhD, James A. Graham, PhD, 2007-05-01 This book argues convincingly that children's cultural differences need to be recognized for any accurate understanding of their development Pointing out the need for additional and more effectively designed research Harris and Graham provide a valuable foundation for further investigations This nonpolemic book should be in all libraries filling an unfortunate gap Highly recommended Choice Current Reviews for Academic Libraries This major new textbook introduces students to issues that have an impact on the lives of African American children but have typically been ignored or inadequately discussed in mainstream child development textbooks The authors hope to familiarize students with a sampling of research that moves beyond a deficit view of the development of the African American child while stimulating critical thinking about future directions for research on African American children and their families The book is designed to be student friendly with each chapter presenting an overview of the material covered as well as an Insider's Voice which offers a personal story or viewpoint about the issues discussed in the chapter Each chapter goes on to feature a dialogue of current biological environmental constructivist and cultural contextual theories as well as suggestions for additional reading videos websites and questions to guide critical thinking

Savage Inequalities Jonathan Kozol, 2012-07-24 NEW YORK TIMES BESTSELLER An impassioned book laced with anger and indignation about how our public education system scorns so many of our children The New York Times Book Review In 1988 Jonathan Kozol set off to spend time with children in the American public education system For two years he visited schools in neighborhoods across the country from Illinois to Washington D C and from New York to San Antonio He spoke with teachers principals superintendents and most important children What he found was devastating Not only were schools for rich and poor blatantly unequal the gulf between the two extremes was widening and it has widened since The urban schools he visited were overcrowded and understaffed and lacked the basic elements of learning including books and all too often classrooms for the students In *Savage Inequalities* Kozol delivers a searing examination of the extremes of wealth and poverty and calls into question the reality of equal opportunity in our nation s schools Praise for *Savage Inequalities* I was unprepared for the horror and shame I felt *Savage Inequalities* is a savage indictment Everyone should read this important book Robert Wilson USA Today Kozol has written a book that must be read by anyone interested in education Elizabeth Duff Philadelphia Inquirer The forces of equity have now been joined by a powerful voice Kozol has written a searing expos of the extremes of wealth and poverty in America s school system and the blighting effect on poor children especially those in cities Emily Mitchell Time Easily the most passionate and certain to be the most passionately debated book about American education in several years A classic American muckraker with an eloquent prose style Kozol offers an old fashioned brand of moral outrage that will affect every reader whose heart has not yet turned to stone Entertainment Weekly

Street Data Shane Safir, Jamila Dugan, 2021-02-12 Radically reimagine our ways of being learning and doing Education can be transformed if we eradicate our fixation on big data like standardized test scores as the supreme measure of equity and learning Instead of the focus being on fixing and filling academic gaps we must envision and rebuild the system from the student up with classrooms schools and systems built around students brilliance cultural wealth and intellectual potential *Street data* reminds us that what is measurable is not the same as what is valuable and that data can be humanizing liberatory and healing By breaking down street data fundamentals what it is how to gather it and how it can

complement other forms of data to guide a school or district s equity journey Safir and Dugan offer an actionable framework for school transformation Written for educators and policymakers this book Offers fresh ideas and innovative tools to apply immediately Provides an asset based model to help educators look for what s right in our students and communities instead of seeking what s wrong Explores a different application of data from its capacity to help us diagnose root causes of inequity to its potential to transform learning and its power to reshape adult culture Now is the time to take an antiracist stance interrogate our assumptions about knowledge measurement and what really matters when it comes to educating young people
