Quantitative Aptitude for Competitive Examinations Abhijit Guha,1996 **The Cult of Smart** Fredrik deBoer,2020-08-04 Named one of Vulture s Top 10 Best Books of 2020 Leftist firebrand Fredrik deBoer exposes the lie at the heart of our educational system and demands top to bottom reform Everyone agrees that education is the key to creating a more just and equal world and that our schools are broken and failing Proposed reforms variously target incompetent teachers corrupt union practices or outdated curricula but no one acknowledges a scientifically proven fact that we all understand intuitively Academic potential varies between individuals and cannot be dramatically improved In The Cult of Smart educator and outspoken leftist Fredrik deBoer exposes this omission as the central flaw of our entire society which has created and perpetuated an unjust class structure based on intellectual ability Since cognitive talent varies from person to person our education system can never create equal opportunity for all Instead it teaches our children that hierarchy and competition are natural and that human value should be based on intelligence These ideas are counter to everything that the left believes but until they acknowledge the existence of individual cognitive differences progressives remain complicit in keeping the status quo in place This passionate voice driven manifesto demands that we embrace a new goal for education equality of outcomes We must create a world that has a place for everyone not just the academically talented But we ll never achieve this dream until the Cult of Smart is destroyed Transforming the Workforce for Children Birth Through Age 8 National Research Council,Institute of Medicine,Board on Children, Youth, and Families,Committee on the Science of Children Birth to Age 8: Deepening and Broadening the Foundation for Success,2015-07-23 Children are already learning at birth and they develop and learn at a rapid pace in their early years This provides a critical foundation for lifelong progress and the adults who provide for the care and the education of young children bear a great responsibility for their health development and learning Despite the fact that they share the same objective to nurture young children and secure their future success the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well

Transforming the Workforce for Children Birth Through Age 8 explores the science of child development particularly looking at implications for the professionals who work with children This report examines the current capacities and practices of the workforce the settings in which they work the policies and infrastructure that set qualifications and provide professional learning and the government agencies and other funders who support and oversee these systems This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning shared knowledge and competencies for care and education professionals and principles for effective professional learning Young children thrive and learn best when they have secure positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice specific actions to improve professional learning systems and workforce development and research to continue to build the knowledge base in ways that will directly advance and inform future actions The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive and ultimately improve outcomes for children
