Cyberlaw Jun 22 2022 This law school casebook starts from the premise that cyberlaw is not simply a set of legal rules governing online interaction, but a lens through which to re-examine general problems of policy, jurisprudence, and culture. The book goes beyond simply plugging Internet-related cases into a series of doctrinal categories, instead emphasizing conceptual issues that extend across the spectrum of cyberspace legal dilemmas. While the book addresses all of the "traditional" subject matter areas of cyberlaw, it asks readers to consider both how traditional legal doctrines can be applied to cyberspace conduct, and how the special problems encountered in that application can teach us something about those traditional legal doctrines. The fifth edition has been updated, shortened, and reconceptualized to make the book even more effective as a teaching tool and to illuminate new debates at the heart of this evolving field. The book groups the material into units addressing the who, how, and what of governance/regulation-- fundamental questions that pertain to any legal system, in cyberspace or elsewhere. The fifth edition also includes updated treatment throughout, as well as a more stream-lined approach that should make an already effective casebook even more unified and teachable.

Normative Jurisprudence Jan 30 2023 Normative Jurisprudence aims to reinvigorate normative legal scholarship that both criticizes positive law and suggests reforms for it, on the basis of stated moral values and legalistic ideals. It looks sequentially and in detail at the three major traditions in jurisprudence – natural law, legal positivism and critical legal studies – that have in the past provided philosophical foundations for just such normative scholarship. Over the last fifty years or so, all of these traditions, although for different reasons, have taken a number of different turns – toward empirical analysis, conceptual analysis or Foucaultian critique – and away from straightforward normative criticism. As a result, normative legal scholarship – scholarship that is aimed at criticism and reform – is now lacking a foundation in jurisprudential thought. The book criticizes those developments and suggests a return, albeit with different and in many ways larger challenges, to this traditional understanding of the purpose of legal scholarship.

The Architecture of Law Jun 03 2023 This book argues that classical natural law jurisprudence provides a superior answer to the questions “What is law?” and “How should law be made?” rather than those provided by legal positivism and “new” natural law theories. What is law? How should law be made? Using St. Thomas Aquinas’s analogy of God as an architect, Brian McCall argues that classical natural law jurisprudence provides an answer to these questions far superior to those provided by legal positivism or the “new” natural law theories. The Architecture of Law explores the metaphor of law as an architectural building project, with eternal law as the foundation, natural law as the frame, divine law as the guidance provided by the architect, and human law as the provider of the defining details and ornamentation. Classical jurisprudence is presented as a synthesis of the work of the greatest minds of antiquity and the medieval period, including Cicero, Aristotle, Gratian, Augustine, and Aquinas; the significant texts of each receive detailed exposition in these pages. Along with McCall’s development of the architectural image, he raises a question that becomes a running theme throughout the book: To what extent does one need to know God to accept and understand natural law jurisprudence, given its foundational premise that all authority comes from God? The separation of the study of law from knowledge of theology and morality, McCall argues, only results in the impoverishment of our understanding of law. He concludes that they must be reunited in order for jurisprudence to flourish. This book will appeal to academics, students in law, philosophy, and theology, and to all those interested in legal or political philosophy.
