Time and Tide Lenalee N. Robinson,2022-07-25 Lucy Nash has just finished up her sophomore year of high school and is anticipating an uneventful summer at her rural Georgia home that is until a weird twist of fate and physics takes her on a trip back through time to the year 1975 with Cameron Hall a boy her age whose own time is thirty years into her future Cameron is hoping to stop a series of child disappearances one of which deeply affected his family and ends up teaming up with his accidental passenger to solve the crime But despite their access to resources from the future can two teenagers resolve a mystery that has remained a cold case for over sixty years and what impact will their presence in the past have on their own lives and their own futures

Brand New Justice Simon Anholt,2006-08-11 Recently vilified as the prime dynamic driving home the breach between poor and rich nations here the branding process is rehabilitated as a potential saviour of the economically underprivileged Brand New Justice now in a revised paperback edition systematically analyses the success stories of the Top Thirteen nations demonstrating that their wealth is based on the last mile of the commercial process buying raw materials and manufacturing cheaply in third world countries these countries realise their lucrative profits by adding value through finishing packaging and marketing and then selling the branded product on to the end user at a hugely inflated price The use of sophisticated global media techniques alongside a range of creative marketing activities are the lynchpins of this process Applying his observations on economic history and the development and impact of global marketing Anholt presents a cogent plan for developing nations to benefit from globalization So long the helpless victim of capitalist trading systems he shows that they can cross the divide and graduate from supplier nation to producer nation Branding native produce on a global scale making a commercial virtue out of perceived authenticity and otherness and fully capitalising on the last mile benefits are key to this graduation and fundamental to forging a new global economic balance Anholt argues with a forceful logic but also backs his hypothesis with enticing glimpses of this process actually beginning to take place Examining activities in India Thailand Russia and Africa among others he shows the risks challenges and pressures inherent in turning the tide but above all he demonstrates the very real possibility of enlightened capitalism working as a force for good in global terms

Never Far Away Michelle Rodriguez,2013-11-01 Never Far Away is a short story and resource for the parent who has a child that doesn't like to separate from them when time for school or work It has illustrative pictures and content for the parent and child to interact before they go about their day

The Maruti Story R C Bhargava,2010-02-02 An extraordinary and rare insight into how a few determined entrepreneurs created an icon C K Prahalad The targets were stupendous and considered unachievable by almost everyone Slightly over two years to find a suitable partner finalize all legal documentation get governmental approval to these agreements as well as to the investment proposals build a factory develop a supplier base to meet localization regulations create a sales and service network and

develop and launch a people's car that would sell 100 000 a year in a sector where Indian expertise was limited. And to do this as a public sector company having to follow all governmental systems and procedures and having to please both its masters in the government and Suzuki Motor Corporation. However, the Maruti project succeeded and in ways that were unimaginable in 1983. The car revolutionized the industry and put a country on wheels. Suddenly, ordinary middle class men and women could aspire to own a reliable, economical and modern car, and the steep sales targets were easily met. Twenty six years later, the company, now free of government controls and facing competition from the world's major manufacturers who have entered the Indian market, still leads the way. Not only that, cars made by Maruti can be seen in all continents. By any yardstick, it is an incredible story involving grit, management skill and entrepreneurship of a high order. R C Bhargava, who was at the helm of the company and is currently its chairman, co-writing with senior journalist and author Seetha, shows how it was done in this riveting account of a landmark achievement. *Sadhguru, More Than a Life* Arundhati Subramaniam, 2010

The thirst to be boundless is not created by you, it is just life longing for itself. Sadhguru. This is the extraordinary story of Sadhguru, a young agnostic who turned yogi, a wild motorcyclist who turned mystic, a sceptic who turned spiritual guide. Pulsating with his razor sharp intelligence, bracing wit and modern day vocabulary, the book empowers you to explore your spiritual self and could well change your life. It seeks to re-create the life journey of a man who combines rationality with mysticism, irreverence with compassion, ancient wisdom with a provocatively contemporary outlook and a deep knowledge of the self with a contagious love of life. Described as a profound mystic, visionary, humanitarian and prominent spiritual leader of our times, he is equally at home in a satsangh in rural Tamil Nadu as at the World Economic Forum in Davos. In his early years, Jaggi Vasudev or Sadhguru, as he is now known, was a chronic truant, a boisterous prankster and later a lover of motorbikes and fast cars. It is evident that the same urgency, passion and vitality echo in his spiritual pursuits to this day, from his creation of the historic Dhyanalunga, the mission of three lifetimes, to his approach as a guru. In Sadhguru's view, faith and reason, spirituality and science, the sacred and the material, cannot be divided into easy binaries. He sees people as spiritual beings, dabbling with the material rather than the reverse, and liberation as the fundamental longing in every form of life. Truth, for him, is a living experience, instead of a destination, a conclusion or a matter of metaphysical speculation. The possibility of self-realization, he strongly believes, is available to all. Drawing upon extended conversations with Sadhguru, interviews with Isha colleagues and fellow meditators, poet Arundhati Subramaniam presents an evocative portrait of a contemporary mystic and guru, a man who seems to pack the intensity and adventure of several lifetimes into a single one.

*Asiaweek*, 1993 **The Tatasa** Girish Kuber, 2019-03-25 WINNER OF THE GAJA CAPITAL BUSINESS BOOK PRIZE 2019

The nineteenth century was an exciting time of initiative and enterprise around the world. If John D Rockefeller was creating unimaginable wealth in the United States, that he would put to the service of the nation, a Parsi family with humble roots was doing the same in India. In 1822, a boy was born in a priestly household in Gujarat's Navsari village. Young Nusserwanji knew

early on that his destiny lay beyond his village and decided to head for Bombay to start a business the first in his family to do so He had neither higher education nor knowledge of business matters just a burning passion to carve a path of his own What Nusserwanji started as a cotton trading venture his son Jamsetji born in the same year as Rockefeller grew into a multifaceted business turning around sick textile mills setting up an iron and steel company envisioning a cutting edge institute of higher learning building a world class hotel and earning himself the title of the Bhisma Pitamah of Indian Industry Stewarded ably over the decades by Jamsetji s sons Dorabji and Ratanji the charismatic and larger than life JRD and thereafter the more business like Ratan the Tata group today is a 110 billion dollar empire The Tatas is their story But it is more than just a history of the industrial house it is an inspiring account of India in the making It chronicles how each generation of the family invested not only in the expansion of its own business interests but also in nation building Few know for instance that the first hydel power project in the world was conceived of and built by the Tatas Nor that some radical labour concepts such as eight hour work shifts were born in India at the Tata mill in Nagpur The Tata Cancer Research Centre the Indian Institute of Science the Tata Institute of Fundamental Research as also the national carrier Air India the family has a long rich and unrivalled legacy The Tatas is a tribute to a line of visionaries who have a special place in the hearts and minds of ordinary Indians Written by seasoned journalist Girish Kuber this is also the only book that tells the complete Tata story spanning almost two hundred years

*From Crisis to Communitisation* Gilles Dauvé,2019-02-01 Communitisation means something quite straightforward

a revolution that starts to change social relations immediately It would extend over years decades probably but from Day One it would begin to do away with wage labour profit productivity private property classes States masculine domination and more There would be no transition period in the Marxist sense no period when the associated producers continue furthering economic growth to create the industrial foundations of a new world Communisation means a creative insurrection that would bring about communism not its preconditions Thus stated it sounds simple enough The questions are what how and by whom That is what this book is about Communisation is not the be all and end all that solves everything and proves wrong all past critical theory The concept was born out of a specific period and we can fully understand it by going back to how people personally and collectively experienced the crises of the 1960s and 70s The notion is now developing in the maelstrom of a new crisis deeper than the Depression of the 1930s among other reasons because of its ecological dimension a crisis that has the scope and magnitude of a crisis of civilisation This is not a book that glorifies existing struggles as if their present accumulation were enough to result in revolution Radical theory is meaningful if it addresses the question How can proletarian resistance to exploitation and dispossession achieve more than aggravate the crisis How can it reshape the world
