Request Inspection Copy Since the end of World War II, social science research has become increasingly quantitative in nature. A Case for the Case Study provides a rationale for an alternative to quantitative research: the close investigation of single instances of social phenomena. The first section of the book contains an overview of the central methodological issues involved in the use of the case study method. Then, well-known scholars describe how they undertook case study research in order to understand changes in church involvement, city life, gender roles, white-collar crimes, family structure, homelessness, and other types of social experience. Each contributor confronts several key questions: What does the case study tell us that other approaches cannot? To what extent can one generalize from the study of a single case or of a highly limited set of cases? Does case study work provide the basis for postulating broad principles of social structure and behavior? The answers vary, but the consensus is that the opportunity to examine certain kinds of social phenomena in depth enables social scientists to advance greatly our empirical understanding of social life. The contributors are Leon Anderson, Howard M. Bahr, Theodore Caplow, Joe R. Feagin, Gilbert Geis, Gerald Handel, Anthony M. Orum, Andree F. Sjoberg, Gideon Sjoberg, David A. Snow, Ted R. Vaughan, R. Stephen Warner, Christine L. Williams, and Norma Williams. Tremendous changes have occurred over the past decade in the provision of services to students with disabilities. Federal mandates continue to define requirements for a free appropriate public education (FAPE) in the least restrictive environment. Additionally, there has been an increase in the number of lawsuits filed against school districts regarding the provision of educational services for students with disabilities. Case studies are a helpful way to understand these difficult issues. The case studies presented here are actual students eligible for special education and related services. The case studies are represented not to tell districts and parents that this is the only way questions about special education law can be answered, but to provide likely answers along with commentary for analysis. The cases were developed to help new (and experienced) special education leaders and supervisors survive the pressures of working with students with disabilities while working to provide appropriate services and prevent litigation. The guide all MBAs and executive students need. If you're enrolled in an MBA or executive education program, you've probably encountered a powerful learning tool: the business case. But if you're like many people, you may find interpreting and writing about cases mystifying and time-consuming. In *The Case Study Handbook, Revised Edition*, William Ellet presents a potent new approach for efficiently analyzing, discussing, and writing about cases. Early chapters show how to classify cases according to the analytical task they require (making a decision, performing an evaluation, or diagnosing a problem) and quickly establish a base of knowledge about a case. Strategies and templates, in addition to several sample Harvard Business School cases, help you apply the author's framework. This book is intended to aid the student studying case study for the National Certification Commission for Acupuncture and Oriental Medicine (NCCAOM) in Foundation of Chinese Medicine Licensing Examination. It is highly recommended to be used to combine with my other two books which are Review and Pretest for NCCAOM and California Exams in TCM Foundation and Handouts for NCCAOM Board Preparation Course in Foundation Module. I have been teaching NCCAOM Board Review class since 2009 in Acupuncture college in the United States. This book is the result of my teaching materials and experience. It includes most common types of the case study in Chinese Medicine and is intended to help the student prepare for a general class exam and Board licensing exam. The material is organized and divided into three parts. The first part covers general introduction regarding how to use three-steps methods and tips to solve case study questions. The second part covers case study

practice questions by types. The last part includes four comprehensive case study exams. All these questions can be used as a pretest to identify areas of weakness or as a post-test to determine mastery. The practice tests can reflect the content and format of Chinese medicine class test and Board licensing examination. This book blends classroom training with actual practice. It provides case studies for the students of Management, Commerce, Chartered Accountancy, and Cost and Work Accountancy. It contains case studies pertaining to Indian conditions and their suggestions.
