

REAR WHEELS

Farmall 806 Tractors

DUAL REAR WHEELS

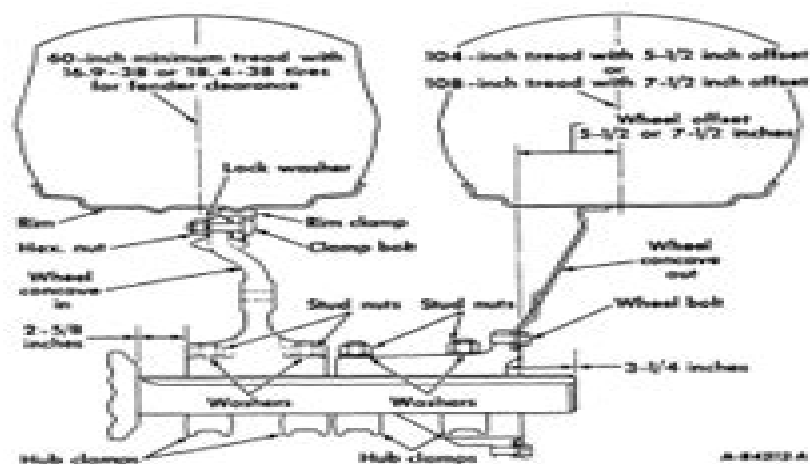

The use of dual rear tires substantially increases ground contact area, which becomes particularly important when operating in loose or sandy soils, or under wet field conditions where traction is difficult. Improved tractor performance can be realized under such conditions, with less soil compaction, because of better flotation or less soil displacement under the tires.

Disc-type wheels and longer rear axles are available on Farmall 806 Tractors to provide dual tire equipment with various tire sizes. The disc wheel and tire assemblies are removable from the hubs, when duals are not required. The wheel and hub settings on the 100-inch rear axles for proper tire clearance and spacing are shown in Illustr. 96 to 96B. The wheel treads available with dual wheel axles, when the outer wheels and hubs are removed, are shown in Illustr. 94.
