such older networks as railroad tracks sewer lines and television circuits He describes key moments in the prehistory of the cloud from the game Spacewar as exemplar of time sharing computers to Cold War bunkers that were later reused as data centers Countering the popular perception of a new cloudlike political power that is dispersed and immaterial Hu argues that the cloud grafts digital technologies onto older ways of exerting power over a population But because we invest the cloud with cultural fantasies about security and participation we fail to recognize its militarized origins and ideology Moving between the materiality of the technology itself and its cultural rhetoric Hu s account offers a set of new tools for rethinking the contemporary digital environment
