Mathematics Teachers Engaging with Representations of Practice Feb 19 2023 This book presents innovative approaches and state-of-the-art empirical studies on mathematics teacher learning. It highlights the advantages and challenges of such tools as classroom videos, concept cartoons, simulations, and scenarios. The book details how representations of practice encourage and afford professional development, and describes how these tools help to investigate aspects of teacher expertise, beliefs, and conceptions. In addition, the book identifies the methodological challenges that can emerge and the obstacles educators might encounter when using representations of practice. The book examines the nature of these challenges and provides suggestions for solving them. It offers a variety of different approaches that can help educators to develop professional learning activities for prospective and in-service teachers.

Our Class is a Family Mar 23 2023 "Family isn't always your relatives. It's the ones who accept you for who you are. The ones who would do anything to see you smile, and who love you no matter what." -Unknown Teachers do so much more than just teach academics. They build a sense of community within their classrooms, creating a home away from home where they make their students feel safe, included, and loved. With its heartfelt message and colorfully whimsical illustrations, "Our

Class is a Family'' is a book that will help build and strengthen that class community. Kids learn that their classroom is a place where it's safe to be themselves, it's okay to make mistakes, and it's important to be a friend to others. When hearing this story being read aloud by their teacher, students are sure to feel like they are part of a special family. And currently, during such an unprecedented time when many teachers and students are not physically IN the classroom due to COVID-19 school closures, it's more important than it's ever been to give kids the message that their class is a family. Even at a distance, they still stick together.

*Differentiated Instructional Strategies Aug 16 2022 In this fascinating book, the author of *The Hinge Factor* and *The Weather Factor* surveys revolutions across the centuries, vividly portraying the people and events that brought wrenching, often enduring and always bloody change to countries and societies almost overnight. Durschmied begins with the French Revolution and goes on to examine the revolutions of Mexico in 1910, Russia in 1917, and Japan in 1945, as well as the failed putsch against Hitler in 1944. His account of the Cuban Revolution is peppered with personal anecdotes for he was the first foreign correspondent to meet Castro when the future leader was still in the Sierra Maestra. He concludes with the*

Iranian Revolution that ousted the Shah in 1979 another that he personally covered and, in a new preface, extends his analysis to the Arab Spring. Each revolution, Durschmied contends, has its own dynamic and memorable cast of characters, but all too often the end result is the same: mayhem, betrayal, glory, and death. Unlike the American Revolution, which is the counterexample, few revolutions are spared the harsh reality that most devour their own children. Durschmied is a supremely gifted reporter who has transformed the media he works in. Newsweek A] light and lively narrative that serves as a useful introduction for the general reader. Library Journal Red Sep 16 2022 A blue crayon mistakenly labeled as "red" suffers an identity crisis in this picture book by the New York Times–bestselling creator of My Heart Is Like a Zoo. This funny, heartwarming, colorful picture book about finding the courage to be true to your inner self can be read on multiple levels, and it offers something for everyone. Funny, insightful, and colorful, Red: A Crayon's Story is about being true to your inner self and following your own path despite obstacles that may come your way. Red will appeal to fans of Lois Ehlert, Eric Carle, and The Day the Crayons Quit, and makes a great gift for readers of any age! Red has a bright red label, but he is, in fact, blue. His teacher tries to help him be red (let's draw strawberries!), his mother tries to help him be red by sending him out on a playdate with a yellow classmate (go draw a nice orange!), and the scissors try to help him be red by snipping his label so that he has room to breathe. But Red is miserable. He just can't be red, no matter how hard he tries! Finally, a brand-new friend offers a brand-new perspective, and Red discovers

what readers have known all along. He's blue!

Developing Early Literacy Feb 27 2021 The National Assessment of Educational Progress reveals that 37 percent of U.S. fourth graders fail to achieve basic levels of reading achievement. In 1997, the U.S. Congress asked that a review of research be conducted to determine what could be done to improve reading and writing achievement. The resulting "Report of the National Reading Panel: Teaching Children to Read" (NICHD, 2000) has been influential in helping to guide reading-education policy and practice in the United States. However, that report did not examine the implications of instructional practices used with children from birth through age 5. To address this gap in the knowledge base, the National Early Literacy Panel (NELP) was convened. The panel was asked to apply a similar methodological review process to that used by the National Reading Panel (NRP) to issues of instructional practices for young children so that parents and teachers could better support their emerging literacy skills. The NELP report represents a systematic and extensive synthesis of the published research literature concerning children's early literacy skills. It provides educators and policymakers with important information about the early skills that are implicated in later literacy learning, as well as information about the type of instruction that can enhance these skills. The results also identify areas in which additional research is needed. The meta-analyses conducted by the panel showed that a wide range of interventions had a positive impact on children's early literacy learning.

Motivational Interviewing, Second Edition Jan 01 2024 This

bestselling work has introduced hundreds of thousands of professionals and students to motivational interviewing (MI), a proven approach to helping people overcome ambivalence that gets in the way of change. William R. Miller and Stephen Rollnick explain current thinking on the process of behavior change, present the principles of MI, and provide detailed guidelines for putting it into practice. Case examples illustrate key points and demonstrate the benefits of MI in addictions treatment and other clinical contexts. The authors also discuss the process of learning MI. The volume's final section brings together an array of leading MI practitioners to present their work in diverse settings.

The Cambridge Handbook of Motivation and Learning May 25 2023 Written by leading researchers in educational and social psychology, learning science, and neuroscience, this edited volume is suitable for a wide-academic readership. It gives definitions of key terms related to motivation and learning alongside developed explanations of significant findings in the field. It also presents cohesive descriptions concerning how motivation relates to learning, and produces a novel and insightful combination of issues and findings from studies of motivation and/or learning across the authors' collective range of scientific fields. The authors provide a variety of perspectives on motivational constructs and their measurement, which can be used by multiple and distinct scientific communities, both basic and applied.

Discovery in the Cave Oct 06 2021 This amazing true adventure story about the discovery of the Lascaux Cave will have young readers feeling that they've discovered something pretty special,

too! In 1940, four teenage boys and a dog dropped themselves into a hole in the forest floor. Using a flaming grease gun as a torch, they ventured deep underground, eventually coming to a huge cave, the walls of which were covered with life-size paintings of animals. Whole herds of horses! Deer with horns as big as tree branches! Giant bison! The boys were amazed by their discovery. They'd stumbled upon the world's finest examples of prehistoric painting! Perfect for classroom use, this Step 4 Step into Reading book is realistically illustrated by award-winning artist Bryn Barnard.

A Taxonomy for Learning, Teaching, and Assessing Dec 20 2022 This revision of Bloom's taxonomy is designed to help teachers understand and implement standards-based curriculums. Cognitive psychologists, curriculum specialists, teacher educators, and researchers have developed a two-dimensional framework, focusing on knowledge and cognitive processes. In combination, these two define what students are expected to learn in school. It explores curriculums from three unique perspectives-cognitive psychologists (learning emphasis), curriculum specialists and teacher educators (C & I emphasis), and measurement and assessment experts (assessment emphasis). This revisited framework allows you to connect learning in all areas of curriculum. Educators, or others interested in educational psychology or educational methods for grades K-12.

Humanizing the Classroom Nov 30 2023 There is a growing trend in education for educators to support students in the development of social and emotional skills. SEL mandates are now part of many state assessments and national initiatives, and

there are countless curriculum from which principals and teachers may choose. However, many of these curricular materials fail to address the question of pedagogy, or what is the best method for teaching social and emotional skills?

Humanizing the Classroom: Using Role Plays to Teach Social and Emotional Skills in Middle and High School answers this question by presenting the pedagogical basis for using role plays to teach social and emotional skills, creating a clear link between SEL and the need for culturally relevant teaching, and providing over 45 model lessons that can be delivered in middle and high school classrooms. A rich resource for principals seeking advisory curriculum materials, classroom teachers interested in integrating SEL into their classroom practice, and educational theater and drama teachers, Humanizing the Classroom addresses the how, why and what of teaching social and emotional skills in our diverse society.

Crawling Behind: America's Child Care Crisis and How to Fix It Jan 09 2022 “I’ve totally washed away the dream of having one more child.” “I had never intended to be a stay-at-home-parent, but the cost of child care turned me into one.” “We had to pull our toddler out of his program because we couldn’t afford to have two kids in high-quality care.” These are not the voices of those down on their luck, but the voices of America’s middle class. The lack of affordable, available, high-quality childcare is a boulder on the backs of all but the most affluent. Millions of hard-working families are left gasping for air while the next generation misses out on a strong start. To date, we’ve been fighting this five-alarm fire with the policy equivalent of beach toy water buckets. It’s time for a bold investment in

America's families and America's future. There's only one viable solution: Childcare should be free.

Learning in the Cloud Jul 15 2022 This comprehensive and cutting-edge book portrays a vision of how digital media can help transform schools, and what kinds of curriculum pedagogy, assessment, infrastructure, and learning environments are necessary for the transformation to take place. The author and his research team spent thousands of hours observing classes and interviewing teachers and students in both successful and unsuccessful technology-rich schools throughout the United States and other countries. Featuring lessons learned as well as analysis of the most up-to-date research, they offer a welcome response to simplistic approaches that either deny the potential of technology or exaggerate its ability to reform education simply by its presence in schools. Challenging conventional wisdom about technology and education, Learning in the Cloud: critically examines concepts such as the "digital divide," "21st-century skills," and "guide on the side" for assessing and guiding efforts to improve schools; combines a compelling vision of technology's potential to transform learning with an insightful analysis of the curricular challenges required for meaningful change; and discusses the most recent trends in media and learning, such as the potential of tablets and e-reading.

English Plus, Issues in Bilingual Education May 01 2021 This volume presents background information, research reports, and

case studies of exemplary programs in bilingual education in the United States. The title is taken from a recent study of the National Coalition of Advocates for Students on the problems faced by immigrant children who are entitled to education but fail to find the support and services inside the school. The authors argue that business as usual in English-only is not enough, but additional language support is essential for equality of educational opportunity. Three case studies exemplify the diversity in language use in the United States and in educational programs that fit that diversity. There is diversity in the communities served: recent immigrant, established language minority, or indigenous Native American; diversity in what special resources, especially teachers and texts, are created and used; and diversity in the use of language or languages in instruction. ISSN 0002-7162: \$12.00 (pbk.).

Teaching Problem Students May 13 2022 Focuses on how teachers and school practitioners can improve the academic skills, attitudes, and coping abilities of students with behavior and adjustment problems. Presented are findings from the Classroom Strategy Study, which identifies widely used classroom management strategies that work-and those that don't work-for addressing a wide range of specific challenges in the elementary and middle grades.

Our Favorite Day of the Year Mar 03 2024 "Gorgeously

inviting illustrations and a joyful theme...the consummate first day read.” —Shelf Awareness (starred review) A heartwarming picture book following a group of boys from different backgrounds throughout the school year as they become the best of friends. Musa’s feeling nervous about his first day of school. He’s not used to being away from home and he doesn’t know any of the other kids in his class. And when he meets classmates Moisés, Mo, and Kevin, Musa isn’t sure they’ll have much in common. But over the course of the year, the four boys learn more about each other, the holidays they celebrate, their favorite foods, and what they like about school. The more they share with each other, the closer they become, until Musa can’t imagine any better friends. In this charming story of friendship and celebrating differences, young readers can discover how entering a new friendship with an open mind and sharing parts of yourself brings people together. And the calendar of holidays at the end of the book will delight children as they identify special events they can celebrate with friends throughout the year.

A Family Is a Family Is a Family Nov 18 2022 When a teacher asks her class to think about what makes their families special, the answers are all different, but the same in one important way ... When a teacher asks the children in her class to think about what makes their families special, the answers are all different in many ways — but the same in the one way that matters most of all. One child is worried that her family is just too different to explain, but listens as her classmates talk about what makes their families special. One is raised by a grandmother, and another has two dads. One has many stepsiblings, and another has a new baby in the family. As her classmates describe who they live with and who loves them — family of every shape, size

and every kind of relation — the child realizes that as long as her family is full of caring people, it is special. A warm and whimsical look at many types of families, written by award-winning author Sara O’Leary, with quirky and sweet illustrations by Qin Leng. Designing Teacher Evaluation Systems Jun 25 2023 WHAT IS EFFECTIVE TEACHING? It's not enough to say "I know it when I see it" – not when we're expecting so much more from students and teachers than in the past. To help teachers achieve greater success with their students we need new and better ways to identify and develop effective teaching. The Measures of Effective Teaching (MET) project represents a groundbreaking effort to find out what works in the classroom. With funding by the Bill & Melinda Gates Foundation, the MET project brought together leading academics, education groups, and 3,000 teachers to study teaching and learning from every angle. Its reports on student surveys, observations, and other measures have shaped policy and practice at multiple levels. This book shares the latest lessons from the MET project. With 15 original studies, some of the field's most preeminent experts tap the MET project's unprecedented collection of data to offer new insights on evaluation methods and the current state of teaching in our schools. As feedback and evaluation methods evolve rapidly across the country, Designing Teacher Evaluation Systems is a must read and timely resource for those working on this critical task. PRAISE FOR DESIGNING TEACHER EVALUATION SYSTEMS "This book brings together an all-star team to provide true data-driven, policy-relevant guidance for improving teaching and learning. From student achievement to student perceptions, from teacher knowledge to teacher

practices, the authors address key issues surrounding the elements of a comprehensive teacher evaluation and improvement system. Highly recommended for anyone seriously interested in reform.” —PETE GOLDSCHMIDT, Assistant Secretary, New Mexico Public Education Department “This book is an invaluable resource for district and state leaders who are looking to develop growth and performance systems that capture the complexity of teaching and provide educators with the feedback needed to develop in their profession.” —TOM BOASBERG, Superintendent, Denver Public Schools “A rare example of practical questions driving top quality research and a must read for anyone interested in improving the quality of teaching.” —ROBERT C. GRANGER, Former President (Ret.), The William T. Grant Foundation “This will be the ‘go to’ source in years to come for those involved in rethinking how teachers will be evaluated and how evaluation can and should be used to increase teacher effectiveness. The superb panel of contributors to this book presents work that is incisive, informative, and accessible, providing a real service to the national efforts around teacher evaluation reform.” —JOHN H. TYLER, Professor of Education, Brown University
