**The Strange Life of Objects** Annette Lemieux, Lelia Amalfitano, Judith Hoos Fox, 2010 The Strange Life of Objects provides the first critical overview of Annette Lemieux's dynamic and varied career. She first garnered attention on the newly global art scene of the 1980s. Since that time she has continued to produce work that grows in depth and resonance, proving herself an artist of lasting significance. Lemieux's early use of traditional techniques—painting, printing, casting, and photography—expanded to include found materials laden with cultural meanings and evocative of personal memories. Whatever the material, Lemieux masters and invents techniques and processes that correlate with states of mind. Major themes she returns to within our shifting political and cultural climate include the horror of war, the nature of time, the elusive truth of memory, the nature of ideas and art making, and the relationship between personal experience and cultural history. A teacher and prolific artist, she lives and works in Boston where she is professor of the practice in studio arts at Harvard University.

**Dirty Little Secrets of the Record Business** Hank Bordowitz, 2007 For disgruntled music fans wondering why music played on the radio is not only worse now than in the past but also not nearly as revelatory as it once was, this book presents a detailed discussion of how the record business fouled its own livelihood. This insightful dissection covers numerous aspects of the industry's failures and shortcomings, including why stockholders play an important role, how radio went from an art to a science, and what was lost in that change. How the record companies alienated their core audience, why file sharing might not be the bogeyman that the record industry would have people think, technology's effects on what and how music is heard, and dozens of other reasons that add up to the record industry's current financial and artistic woes. With eye-opening observations culled from extensive interviews, this exposé offers insights into how this multi-billion-dollar industry is run and why it's losing so much money.
