Advanced Calculus (Revised Edition) Lynn Harold Loomis, Shlomo Zvi Sternberg, 2014-02-26 An authorized reissue of the long out of print classic textbook Advanced Calculus by the late Dr Lynn Loomis and Dr Shlomo Sternberg both of Harvard University has been a revered but hard to find textbook for the advanced calculus course for decades This book is based on an honors course in advanced calculus that the authors gave in the 1960's

The foundational material presented in the unstarred sections of Chapters 1 through 11 was normally covered but different applications of this basic material were stressed from year to year and the book therefore contains more material than was covered in any one year It can accordingly be used with omissions as a text for a year s course in advanced calculus or as a text for a three semester introduction to analysis The prerequisites are a good grounding in the calculus of one variable from a mathematically rigorous point of view together with some acquaintance with linear algebra The reader should be familiar with limit and continuity type arguments and have a certain amount of mathematical sophistication As possible introductory texts we mention Differential and Integral Calculus by R Courant Calculus by T Apostol Calculus by M Spivak and Pure Mathematics by G Hardy The reader should also have some experience with partial derivatives In overall plan the book divides roughly into a first half which develops the calculus principally the differential calculus in the setting of normed vector spaces and a second half which deals with the calculus of differentiable manifolds

**Calculus in Context** James Callahan,1995 For courses currently engaged or leaning toward calculus reform Callahan fully embraces the calculus reform movement in technology and pedagogy while taking it a step further with a unique organization and applications to real world problems *Calculus* Morris Kline,2013-05-09 Application oriented introduction relates the subject as closely as possible to science with explorations of the derivative differentiation and integration of the powers of x theorems on differentiation antidifferentiation the chain rule trigonometric functions more Examples 1967 edition Calculus Gilbert Strang,Edwin Prine Herman,2016-03-07 Published by OpenStax College Calculus is designed for the typical two or three semester general calculus course incorporating innovative features to enhance student learning The book guides students through the core concepts of calculus and helps them understand how those concepts apply to their lives and the world around them Due to the comprehensive nature of the material we are offering the book in three volumes for flexibility and efficiency Volume 2 covers integration differential equations sequences and series and parametric equations and polar coordinates BC Campus website

**Calculus Volume 3** Edwin Herman,Gilbert Strang,2016-03-30 Calculus is designed for the typical two or three semester general calculus course incorporating innovative features to enhance student learning The book guides students through the core concepts of calculus and helps them understand how those concepts apply to their lives and the world around them Due to the comprehensive nature of the material we are offering the book in three volumes for flexibility and efficiency Volume 3 covers parametric equations and polar coordinates vectors functions of several variables multiple integration and second order differential equations
