A World Without Time Palle Yourgrau,2009-03-04 It is a widely known but little considered fact that Albert Einstein and Kurt Godel were best friends for the last decade and a half of Einstein's life The two walked home together from Princeton's Institute for Advanced Study every day they shared ideas about physics philosophy politics and the lost world of German science in which they had grown up By 1949 Godel had produced a remarkable proof In any universe described by the Theory of Relativity time cannot exist Einstein endorsed this result reluctantly since it decisively overthrew the classical world view to which he was committed But he could find no way to refute it and in the half century since then neither has anyone else Even more remarkable than this stunning discovery however was what happened afterward nothing Cosmologists and philosophers alike have proceeded with their work as if Godel's proof never existed one of the greatest scandals of modern intellectual history A World Without Time is a sweeping ambitious book and yet poignant and intimate It tells the story of two magnificent minds put on the shelf by the scientific fashions of their day and attempts to rescue from undeserved obscurity the brilliant work they did together
