Transports students beyond the classroom on an exciting journey through the diverse Spanish-speaking world. The perfect blend of culture, instruction and interaction enables and motivates students to succeed. Units are built around countries and cities. Relevant instruction is based on multi-tiered differentiation in presentation, practice, and assessments. A Spanish language curriculum that teaches language proficiency within a culturally sensitive atmosphere. Bob Blitzer has inspired thousands of students with his engaging approach to mathematics, making this beloved series the #1 in the market. Blitzer draws on his unique background in mathematics and behavioral science to present the full scope of mathematics with vivid applications in real-life situations. Students stay engaged because Blitzer often uses pop-culture and up-to-date references to connect math to students'

lives, showing that their world is profoundly mathematical. Presents the text of Alice Walker's story "Everyday Use"; contains background essays that provide insight into the story; and features a selection of critical response. Includes a chronology and an interview with the author. Author of the critically acclaimed *May B.* returns with a stirring novel in verse. Alis and her parents make the long journey from England to settle the New World. But it doesn't go as planned and Alis, her parents, and the others of their small community soon find themselves at odds with the Roanoke tribe. As tensions rise between the settlers and the Native peoples, twelve-year-old Alis forms an impossible friendship with a Roanoke named Kimi. Despite language barriers, the two become as close as sisters, risking their lives for one another until Alis makes a decision that will change her life forever. "An excellent historical offering and belongs on public and school library shelves."—VOYA "With two compelling main characters and an abundance of rich historical detail, Rose's latest novel offers much to discuss and much to appreciate."—School Library Journal

Transports students beyond the classroom on an exciting journey through the diverse Spanish-speaking world. The perfect blend of culture, instruction and interaction enables and motivates students to succeed. Units are built around countries and cities. Relevant instruction is based on multi-tiered differentiation in presentation, practice, and assessments. Uses authentic spoken Spanish to teach Spanish at beginning and intermediate levels. Guides include teaching suggestions, activity masters and video scripts. Glencoe Physical Science provides students with accurate and comprehensive content coverage of the three fundamental science disciplines. The concepts covered are explained in a clear, concise manner that can be easily understood by students. This strong content coverage is integrated with a wide range of hands-on experiences, critical-thinking opportunities, real-world applications, and connections to other sciences and non-science areas of the curriculum. *A People's Curriculum for the Earth* is a collection of articles, role plays, simulations, stories, poems, and graphics to help breathe life into teaching about the environmental crisis. The book features some of the best articles from *Rethinking Schools* magazine alongside classroom-friendly readings on climate change, energy, water, food, and pollution—as well as on people who are working to make things better. *A People's Curriculum for the Earth* has the breadth and depth of *Rethinking Globalization: Teaching for Justice in an Unjust World*, one of the most popular books we've published. At a time when it's becoming

increasingly obvious that life on Earth is at risk, here is a resource that helps students see what's wrong and imagine solutions. Praise for A People's Curriculum for the Earth "To really confront the climate crisis, we need to think differently, build differently, and teach differently. A People's Curriculum for the Earth is an educator's toolkit for our times." — Naomi Klein, author of *The Shock Doctrine* and *This Changes Everything: Capitalism vs. the Climate* "This volume is a marvelous example of justice in ALL facets of our lives—civil, social, educational, economic, and yes, environmental. Bravo to the Rethinking Schools team for pulling this collection together and making us think more holistically about what we mean when we talk about justice." — Gloria Ladson-Billings, Kellner Family Chair in Urban Education, University of Wisconsin-Madison "Bigelow and Swinehart have created a critical resource for today's young people about humanity's responsibility for the Earth. This book can engender the shift in perspective so needed at this point on the clock of the universe." — Gregory Smith, Professor of Education, Lewis & Clark College, co-author with David Sobel of *Place- and Community-based Education in Schools*
