The Contingent Relationship Between Context and Process in Strategic Management Mar 18 2023
Strategy Jul 22 2023

Content Everywhere Nov 01 2021 Care about content? Better copy isn't enough. As devices and channels multiply—and as users expect to relate, share, and shift information quickly—we need content that can go more places, more easily. *Content Everywhere* will help you stop creating fixed, single-purpose content and start making it more future-ready, flexible, reusable, manageable, and meaningful wherever it needs to go.
Teaching in a Digital Age Mar 25 2021

Operations Management in Context Apr 18 2023 *Operations Management in Context* provides students with excellent grounding in the theory and practice of operations management and its role within organizations. Structured in a clear and logical manner, it gradually leads newcomers to this subject through each topic area, highlighting key issues, and using practical case study material and examples to contextualize learning. Each chapter is structured logically and concludes with summary material to aid revision. Exercises and self-assessment questions are included to reinforce learning and maintain variety, with answers included at the end of the text.

Understanding by Design Dec 03 2021 What is understanding and how does it differ from knowledge? How can we determine the big ideas worth understanding? Why is understanding an important teaching goal, and how do we know when students have attained it? How can we create a rigorous and engaging curriculum that focuses on understanding and leads to improved student performance in today's high-stakes, standards-based environment? Authors Grant Wiggins and Jay McTighe answer these and many other questions in this second edition of *Understanding by Design*. Drawing on feedback from thousands of educators around the world who have used the UbD framework since its introduction in 1998, the authors have greatly revised and expanded their original work to guide educators across the K-16 spectrum in the design of curriculum, assessment, and instruction. With an improved UbD Template at its core, the book explains the rationale of backward design and explores in greater depth the meaning of such key ideas as essential questions and transfer tasks. Readers will learn why the familiar coverage- and activity-based approaches to curriculum design fall short, and how a focus on the six facets of understanding can enrich student learning. With an expanded array of practical strategies, tools, and examples from all subject areas, the book demonstrates how the research-based principles of *Understanding by Design* apply to district frameworks as well as to individual units of curriculum. Combining provocative ideas, thoughtful analysis, and tested approaches, this new edition of *Understanding by Design* offers teacher-designers a clear path to the creation of curriculum that ensures better learning and a more stimulating experience for students and teachers alike.

Practice Teaching Sep 23 2023 Written for language teachers in training, this book surveys issues and procedures in conducting practice teaching. Written for language teachers in training at the diploma, undergraduate, or graduate level, *Practice Teaching, A Reflective Approach* surveys issues and procedures in conducting practice teaching. The book adopts a reflective approach to practice teaching and shows student teachers how to explore and reflect on the nature of language teaching and their own approaches to teaching through their experience of practice teaching.

How Learning Works Jun 28 2021 Praise for *How Learning Works* "How Learning Works is the perfect title for this excellent book. Drawing upon new research in psychology, education, and cognitive science, the authors have demystified a complex topic into clear explanations of seven powerful learning principles. Full of great ideas and practical suggestions, all based on solid research evidence, this book is essential reading for instructors at all levels who wish to improve their students' learning." —Barbara Gross Davis, assistant vice chancellor for educational development, University of California, Berkeley, and author, *Tools for Teaching* "This book is a must-read for every instructor, new or experienced. Although I have been teaching for almost thirty years, as I read this book I found myself resonating with many of its ideas, and I discovered new ways of thinking about teaching." —Eugenia T. Paulus, professor of chemistry, North Hennepin Community College, and 2008 U.S. Community Colleges Professor of the Year from The Carnegie Foundation for the Advancement of Teaching and the Council for Advancement and Support of Education "Thank you Carnegie Mellon for making accessible what has previously been inaccessible to those of us who are not learning scientists. Your focus on the essence of learning combined with concrete examples of the daily challenges of teaching and clear tactical strategies for faculty to consider is a welcome work. I will recommend this book to all my colleagues." —Catherine M. Casserly, senior partner, The Carnegie Foundation for the Advancement of Teaching "As you read about each of the seven basic learning principles in this book, you will find advice that is grounded in learning theory, based on research evidence, relevant to college teaching, and easy to understand. The authors have extensive knowledge and experience in applying the science of learning to college teaching, and they graciously share it with you in this organized and readable book." —From the Foreword by Richard E. Mayer, professor of psychology, University of California, Santa Barbara; coauthor, *e-Learning and the Science of Instruction*; and author, *Multimedia Learning*

International Strategy Aug 11 2022 **THE COMPREHENSIVE GUIDE TO MANAGING AND LEADING COMPANIES THAT COMPETE INTERNATIONALLY** Drawing on the course material developed at the Harvard Business School and Yale School of Management by David Collis, *International Strategy* provides theoretical insight and pragmatic tools that address the decisions facing senior managers in multinational corporations. *International Strategy* explores the critical differences between domestic and international competition: the heterogeneity of markets in which companies are involved; the volatility of economic conditions that firms face; and the increased scale of activities fostered by global participation. The text examines how these phenomena create tensions and tradeoffs for executives concerning which product to offer around the world, which countries to compete in, where to locate various activities, and how to organize the firm worldwide. Making those choices in an integrated fashion, it is explained, requires pursuit of a coherent strategy that builds an international advantage. Filled with illustrative examples from a wide range of international companies, *International Strategy*, offers an accessible guide to help managers navigate the myriad decisions they must make in order to create value from their foreign operations and outperform competitors in an increasingly integrated world.

How People Learn II Oct 25 2023 There are many reasons to be curious about the way people learn, and the past several decades have seen an explosion of research that has important implications for individual learning, schooling, workforce training, and policy. In 2000, *How People Learn: Brain, Mind, Experience, and School: Expanded Edition* was published and its influence has been wide and deep. The report summarized insights on the nature of learning in school-aged children; described principles for the design of effective learning environments; and provided examples of how that could be implemented in the classroom. Since then, researchers have continued to investigate the nature of learning and have generated new findings related to the neurological processes involved in learning, individual and cultural variability related to learning, and educational technologies. In addition to expanding scientific understanding of the mechanisms of learning and how the brain adapts throughout the lifespan, there have been important discoveries about influences on learning, particularly sociocultural factors and the structure of learning environments. How

People Learn II: Learners, Contexts, and Cultures provides a much-needed update incorporating insights gained from this research over the past decade. The book expands on the foundation laid out in the 2000 report and takes an in-depth look at the constellation of influences that affect individual learning. How People Learn II will become an indispensable resource to understand learning throughout the lifespan for educators of students and adults.

Understanding Context May 20 2023 To make sense of the world, we're always trying to place things in context, whether our environment is physical, cultural, or something else altogether. Now that we live among digital, always-networked products, apps, and places, context is more complicated than ever—starting with "where" and "who" we are. This practical, insightful book provides a powerful toolset to help information architects, UX professionals, and web and app designers understand and solve the many challenges of contextual ambiguity in the products and services they create. You'll discover not only how to design for a given context, but also how design participates in making context. Learn how people perceive context when touching and navigating digital environments See how labels, relationships, and rules work as building blocks for context Find out how to make better sense of cross-channel, multi-device products or services Discover how language creates infrastructure in organizations, software, and the Internet of Things Learn models for figuring out the contextual angles of any user experience

Event Processing in Action Oct 01 2021 Unlike traditional information systems which work by issuing requests and waiting for responses, event-driven systems are designed to process events as they occur, allowing the system to observe, react dynamically, and issue personalized data depending on the recipient and situation. Event Processing in Action introduces the major concepts of event-driven architectures and shows how to use, design, and build event processing systems and applications. Written for working software architects and developers, the book looks at practical examples and provides an in-depth explanation of their architecture and implementation. Since patterns connect the events that occur in any system, the book also presents common event-driven patterns and explains how to detect and implement them. Throughout the book, readers follow a comprehensive use case that incorporates all event processing programming styles in practice today. Purchase of the print book comes with an offer of a free PDF, ePub, and Kindle eBook from Manning. Also available is all code from the book.

The Space Between Jul 30 2021 The papers in this book focus on many different aspects of the therapeutic relationship, including the self of the therapist, working cross-culturally and with language difference, impasse, risk taking, the place of research, and the influence of theory. Clinical examples illustrate successful as well as less successful outcomes in therapy, and these clinical explorations make the book accessible to both systemic and non-systemic practitioners alike. Part of the Systemic Thinking and Practice Series. Contributors: Rhonda Brown; John Burnham; John Byng-Hall; Alan Carr; Carmel Flaskas; Jo Howard; Alfred Hurst; Ellie Kavner; Sebastian Kraemer; Inga-Britt Krause; Rabia Malik; Maeve Malley; Michael Maltby; Barry Mason; Sue McNab; Amaryll Perlesz; David Pocock; Hitesh Raval; Justin Schlicht; and Lennox K. Thomas.

International Manufacturing Strategies Jan 04 2022 Over the last twenty years, there has been an increasing number of factors that have placed the manufacturing strategies of companies and countries in a global context. This book reviews and addresses the global manufacturing strategy area through research in the four major economic areas of the world: Europe, North America, Latin America and Asia. International Manufacturing Strategies: Context, Content and Change is the result of a single major research project undertaken in twenty countries, focusing on the manufacturing strategies and practices in each, and uses research data to focus on factors specific to industrial countries or regions and those which are common across the group of countries or the entire sample The core of this book is a set of chapters reviewing individual countries. Each country is reviewed in a format with an overall common approach: the socio-economic background; the distinctive results for that country from the research and the link between the two. Most will be illustrated by a small case study of a company. Following this is an integrating review of the findings from various countries, the different trajectories followed, and the impact on external variables and the socioeconomic context on those. The final part of the book is devoted to new ideas and developments in functional areas and in manufacturing strategy that have been developed from the analysis conducted during the research.

Openness to Organizational Change Jan 16 2023

A History of the Work Concept Jul 10 2022 This book traces the history of the concept of work from its

earliest stages and shows that its further formalization leads to equilibrium principle and to the principle of virtual works, and so pointing the way ahead for future research and applications. The idea that something remains constant in a machine operation is very old and has been expressed by many mathematicians and philosophers such as, for instance, Aristotle. Thus, a concept of energy developed. Another important idea in machine operation is Archimedes' lever principle. In modern times the concept of work is analyzed in the context of applied mechanics mainly in Lazare Carnot mechanics and the mechanics of the new generation of polytechnical engineers like Navier, Coriolis and Poncelet. In this context the word "work" is finally adopted. These engineers are also responsible for the incorporation of the concept of work into the discipline of economics when they endeavoured to combine the study of the work of machines and men together.

The Context Marketing Revolution Mar 06 2022 In a world of limitless media noise, how can businesses break through to customers? Context. We are in the midst of a massive media revolution. For the first time in history, ordinary people around the world have the ability to create, distribute, and consume content instantly, from anywhere, using connected devices. The massive increase in media "noise" created by these consumers and devices creates an entirely new situation that makes conventional marketing models obsolete. And yet countless companies and marketing organizations continue to rely on traditional models, assuming that their "campaigns" will sway customers. They couldn't be more wrong. In this provocative and practical book, Salesforce marketing maven Mathew Sweezey boldly outlines this new "infinite media" environment and poses a profound question: In a transformed world where customers shape their own experience, what is the key to breaking through and motivating them to buy? It is context--the close linkage between an individual's immediate desires and the experiences a brand creates to fulfill them. Drawing on new research and new insights into current consumer psychology, Sweezey defines the five key elements of context. Customer experiences must be: Available: Helping people achieve the value they seek in the moment Permissioned: Giving people what they've asked for, on their terms Personal: Going beyond how personal it is to how personally you can deliver it Authentic: Combining voice, empathy, and brand congruence simultaneously Purposeful: Creating a deeper connection to the brand, beyond the product Sweezey uses vivid examples to highlight a new marketing model used by high-performing brands big and small. The final part of the book shifts to execution, providing a new rule book for context-based marketing. The Context Marketing Revolution will change forever how you think about the purpose and practice of marketing.

Strategy Feb 27 2024

Context in Action and How to Study It May 27 2021 Context is a central concept in organization and management studies, yet it is often used in a generalized, unspecific manner. This book offers an interactionist view on context as a dynamic, relational, and socially enacted phenomenon. It explores context in action and the theoretical, methodological, and analytical consequences of this approach through a collection of reflections and research experiences from the dynamic field of health care. In the opening chapters, the editors present their framework for studying context in action and outline three main approaches, centered on the following questions: What constitutes context for a phenomenon or an event? How do actors understand, experience, and engage with context? How do contexts change and what is the role of actors in such processes? Context and action are then explored through a range of topics such as enactment and organizational change, policy implementation, executive work, strategic change, materiality, technology, patients and relatives' perspectives, integrated care, quality improvement, and health care support work. Relevant to both management researchers and practitioners, this volume provides a definition of context as theoretical construct based on interactionist and process based perspectives, and a practical framework for studying context in action which the reader can use in their own work.

Strategy : process, content, context ; an international perspective. Teaching guide with teaching transparency masters to accompany: Strategy ... Apr 30 2024

Becoming a Teacher through Action Research Feb 14 2023 Becoming a Teacher through Action Research, Third Edition skillfully interweaves the stories of pre-service teaching with the process of action research. This engaging text focuses specifically on the needs of pre-service teachers by providing assistance for all stages of the research experience, including guidance on how to select an area of focus, design a culturally-proficient study, collect and interpret data, and communicate findings. With an updated introduction and two new chapters, this revised edition fully develops a convincing response to the framing question of the book, "Why pre-service teacher action research?" The new edition continues to focus on elements of trustworthy pre-service teacher action research, and provides a more robust overview of research

methodology. Using additional activities, charts, and examples, this book offers support during the steps of writing a critical question, data collection, data analysis and the use of analytic memos. New Features in the Third Edition include: New chapters on ongoing data analysis and final data interpretation, which include practice scenarios and examples to give readers a deeper understanding of doing the work of action research processes; An expanded chapter on action research methodology, which includes scaffolds for making methodological decisions, additional practice scenarios, and a revised action research design template; New end-of-chapter Content and Process Questions to encourage deeper understanding; New examples throughout, expanded additional glossary terms, enhanced literature review guidance, and updated templates to support action research projects; An updated companion website with downloadable templates and additional instructor resources; A revised interior text design to increase the accessibility of the text. This one-of-a-kind guide continues to offer invaluable support for teacher-education students during a critical phase of their professional—and personal—lives.

The Relationships Among Contexts, Processes, Contents, and Outcomes in Strategic Management Dec 27 2023

Strategy Process Feb 22 2021 This book provides an overarching framework for cumulating the knowledge in the strategy process field. Provides an overarching framework within which to review the strategy process field. Identifies useful areas in which new research contributions can be made. Helps in the appropriate design of this research. Includes ten papers written by both North American and European scholars. Part of the Strategic Management Society series.

Acceptance and Change Nov 25 2023 The result of the Nevada Conference on Acceptance and Change, held at the University of Nevada in January of 1993, this book explores the results of clinical empirical investigations into acceptance-based psychotherapeutic treatment methods. Until the last few decades, nearly all empirical psychological investigations focused only on direct, change-oriented techniques. Now more current research has applied the same research methods to acceptance-based approaches, and the leaders in the field report some of their findings in this volume. Here are accounts of new basic analyses, treatment techniques, assessment methods, and therapy manuals relating to a range of clinical practice areas. These findings are essential readings for scholars and clinicians interested in acceptance-based treatments.

Contextual Design Aug 23 2023 This is the only book that describes a complete approach to customer-centered design, from customer data to system design. Readers will be able to develop the work models that represent all aspects of customer work practices.

Technology Strategy Patterns Apr 06 2022 Technologists who want their ideas heard, understood, and funded are often told to speak the language of business—without really knowing what that is. This book's toolkit provides architects, product managers, technology managers, and executives with a shared language—in the form of repeatable, practical patterns and templates—to produce great technology strategies. Author Eben Hewitt developed 39 patterns over the course of a decade in his work as CTO, CIO, and chief architect for several global tech companies. With these proven tools, you can define, create, elaborate, refine, and communicate your architecture goals, plans, and approach in a way that executives can readily understand, approve, and execute. This book covers: Architecture and strategy: Adopt a strategic architectural mindset to make a meaningful material impact Creating your strategy: Define the components of your technology strategy using proven patterns Communicating the strategy: Convey your technology strategy in a compelling way to a variety of audiences Bringing it all together: Employ patterns individually or in clusters for specific problems; use the complete framework for a comprehensive strategy

Context in the System and Process of Language Jun 20 2023 The concept "context of situation" introduced by Malinowski some eighty years ago has now become an essential element of the vocabulary of any linguistic theory whose aim is to reveal the nature of language. With the abandonment of the spurious distinction between competence and performance, the process of language, i.e., language use, has claimed its rightful place in the study of language. The chapters of this book focus on the relations of context and text, conceptualising the latter as language operative in some recognizable social context. It is argued that context is not simply a backdrop for the occurrence of words; rather, it is an active element which on the one hand plays a crucial role in the progression of human discourse and on the other enters into and shapes the very nature of language as process and as system, furnishing the foundation for functionality in language. Acting as the interface between language and society, context analysis reveals the power of language for creating, maintaining and changing human relationships.

Category Theory in Context Feb 02 2022 Introduction to concepts of category theory — categories, functors, natural transformations, the Yoneda lemma, limits and colimits, adjunctions, monads — revisits a broad range of mathematical examples from the categorical perspective. 2016 edition.

American Criminal Courts Sep 11 2022 American Criminal Courts: Legal Process and Social Context provides a complete picture of both the theory and day-to-day reality of criminal courts in the United States. The book begins by exploring how democratic processes affect criminal law, the documents that define law, the organizational structure of courts at the federal and state levels, the overlapping authority of the appeals process, and the effect of legal processes such as precedent, jurisdiction, and the underlying philosophies of various types of courts. In practice, criminal courts are staffed by people who represent different perspectives, occupational pressures, and organizational goals. Thus, this book includes chapters on actors in the traditional courtroom workgroup (judges, prosecutors, and defense attorneys, etc.) as well as those outside the court who seek to influence it, including advocacy groups, the media, and politicians. It is the interplay between the court's legal processes and the social actors in the courtroom that makes the application of criminal law fascinating. By focusing on the tension between the law and the actors inside of it, American Criminal Courts: Legal Process and Social Context demonstrates how the courts are a product of "law in action" and presents content in a way that enables you to understand not only the "how" of the U.S. criminal court system, but also the "why." Clearly explains both the principles underlying the development of criminal law and the practical reality of the court system in action A complete picture of the criminal justice continuum, including prosecution, defense, judges, juries, sentencing, and pre-trial and appeals processes Feature boxes look at how courts are portrayed in the media; identify landmark due-process cases; illustrate the pros and cons of the courts' discretionary decision-making; examine procedures and the goals of justice; and highlight the various types of careers available within the criminal courts

Strategy Jul 02 2024 Bob De Wit and Ron Meyer's innovative and extremely successful strategy text encourages critical and creative strategic thinking. By introducing articles from key strategists to present differing perspectives on each strategic issue covered, the authors stress and contrast the diversity of views in the subject without endorsing any one approach.

Strategy Jan 28 2024 In this book, the fundamental differences of opinion within strategic management are not ignored or smoothed over. The authors carefully guide the students through the many, often conflicting, perspectives in the field of strategy, in order to help them become true strategic thinkers.

Strategy Jun 01 2024

Strategy Mar 30 2024 Bob De Wit and Ron Meyer's innovative and extremely successful strategy text encourages critical and creative strategic thinking. By introducing articles from key strategists to present differing perspectives on each strategic issue covered, the authors stress and contrast the diversity of views in the subject without endorsing any one approach.

Context in Computing Aug 30 2021 This volume explores how context has been and can be used in computing to model human behaviors, actions and communications as well as to manage data and knowledge. It addresses context management and exploitation of context for sharing experience across domains. The book serves as a user-centric guide for readers wishing to develop context-based applications, as well as an intellectual reference on the concept of context. It provides a broad yet deep treatment of context in computing and related areas that depend heavily on computing. The coverage is broad because of its cross-disciplinary nature but treats topics at a sufficient depth to permit a reader to implement context in his/her computational endeavors. The volume addresses how context can be integrated in software and systems and how it can be used in a computing environment. Furthermore, the use of context to represent the human dimension, individually as well as collectively is explained. Contributions also include descriptions of how context has been represented in formal as well as non-formal, structured approaches. The last section describes several human behavior representation paradigms based on the concept of context as its central representational element. The depth and breadth of this content is certain to provide useful as well as intellectually enriching information to readers of diverse backgrounds who have an interest in or are intrigued by using context to assist in their representation of the real world.

Improving Organizational Interventions for Stress and Well-being Apr 26 2021 This book brings together a number of experts in the field of organizational interventions for stress and well-being, and discusses the importance of process and context issues to the success or failure of such interventions. The book explores how context and process can be incorporated into program evaluation, providing examples of

how this can be done, and offers insights that aim to improve working life. Although there is a substantial body of research supporting a causal relationship between working conditions and employee stress and well-being, information on how to develop effective strategies to reduce or eliminate psychosocial risks in the workplace is much more scarce, ambiguous and inconclusive. Indeed, researchers in this field have so far attempted to evaluate the effectiveness of organizational interventions to improve workers' health and well-being, but little attention has been paid to the strategies and processes likely to enhance or undermine interventions. The focus of this volume will help to overcome this qualitative-quantitative divide. This book discusses conceptual developments, practical applications, and methodological issues in the field. As such it is suitable for students, practitioners and researchers in the fields of organizational psychology and clinical psychology, as well as human resources management, health & safety, medicine, occupational health, risk management and public health.

Formal Aspects of Context Dec 15 2022 We welcome Volume 20, Formal Aspects of Context. Context has always been recognised as strongly relevant to models in language, philosophy, logic and artificial intelligence. In recent years theoretical advances in these areas and especially in logic have accelerated the study of context in the international community. An annual conference is held and many researchers have come to realise that many of the old puzzles should be reconsidered with proper attention to context. The volume editors and contributors are from among the most active front-line researchers in the area and the contents shows how wide and vigorous this area is. There are strong scientific connections with earlier volumes in the series. I am confident that the appearance of this book in our series will help secure the study of context as an important area of applied logic. D.M.Gabbay INTRODUCTION This book is a result of the First International and Interdisciplinary Conference on Modelling and Using Context, which was organised in Rio de Janeiro in January 1997, and contains a selection of the papers presented there, refereed and revised through a process of anonymous peer review. The treatment of contexts as bona-fide objects of logical formalisation has gained wide acceptance in recent years, following the seminal impetus by McCarthy in his Turing award address.

Literacy in Context (LinC) Oct 13 2022 "Teachers and students studying to be teachers want strategies that they can use in the classroom and this book definitely delivered...The reader is hooked from the first page."--- Amy MacKenzie, Manhattanville College, Purchase, NY --

Encyclopedia of the Sciences of Learning Nov 13 2022 Over the past century, educational psychologists and researchers have posited many theories to explain how individuals learn, i.e. how they acquire, organize and deploy knowledge and skills. The 20th century can be considered the century of psychology on learning and related fields of interest (such as motivation, cognition, metacognition etc.) and it is fascinating to see the various mainstreams of learning, remembered and forgotten over the 20th century and note that basic assumptions of early theories survived several paradigm shifts of psychology and epistemology. Beyond folk psychology and its naïve theories of learning, psychological learning theories can be grouped into some basic categories, such as behaviorist learning theories, connectionist learning theories, cognitive learning theories, constructivist learning theories, and social learning theories. Learning theories are not limited to psychology and related fields of interest but rather we can find the topic of learning in various disciplines, such as philosophy and epistemology, education, information science, biology, and – as a result of the emergence of computer technologies – especially also in the field of computer sciences and artificial intelligence. As a consequence, machine learning struck a chord in the 1980s and became an important field of the learning sciences in general. As the learning sciences became more specialized and complex, the various fields of interest were widely spread and separated from each other; as a consequence, even presently, there is no comprehensive overview of the sciences of learning or the central theoretical concepts and vocabulary on which researchers rely. The Encyclopedia of the Sciences of Learning provides an up-to-date, broad and authoritative coverage of the specific terms mostly used in the sciences of learning and its related fields, including relevant areas of instruction, pedagogy, cognitive sciences, and especially machine learning and knowledge engineering. This modern compendium will be an indispensable source of information for scientists, educators, engineers, and technical staff active in all fields of learning. More specifically, the Encyclopedia provides fast access to the most relevant theoretical terms provides up-to-date, broad and authoritative coverage of the most important theories within the various fields of the learning sciences and adjacent sciences and communication technologies; supplies clear and precise explanations of the theoretical terms, cross-references to related entries and up-to-date references to important research and publications.

The Encyclopedia also contains biographical entries of individuals who have substantially contributed to the sciences of learning; the entries are written by a distinguished panel of researchers in the various fields of the learning sciences.

Text, Role and Context May 08 2022 This text explores fundamental issues relating to student literacies and instructor roles and practices within academic contexts. It offers a brief history of literacy theories and argues for "socioliterate" approaches to teaching and learning in which texts are viewed as primarily socially constructed. Central to socioliteracy, the concepts "genre" and "discourse community," are presented in detail. The author argues for roles for literacy practitioners in which they and their students conduct research and are involved in joint pedagogical endeavors. The final chapters are devoted to outlining how the views presented can be applied to a variety of classroom texts. Core curricular design principles are outlined, and three types of portfolio-based academic literacy classrooms are described.

Educational Leadership Jun 08 2022 Drawing together current thinking and research by leading writers in the field, this Reader will help you to understand and critically analyse key strategic aspects of educational leadership, including: - leadership perspectives and values - external and internal contexts - autonomy and accountability - partnership and collaboration - leading strategy and change. The book explores major challenges for educational leaders in managing the increasingly permeable boundary between educational organisations and their external contexts and reconciling environmental expectations and internal priorities. The Reader will encourage you to positively problematize the field and reflect on current debates and issues. This book will be an essential resource for providers and students of postgraduate level courses in educational leadership and management, as well as those involved in undertaking professional development programmes. It will also serve the reflective practitioner as personal reference when occupying or aspiring towards leadership roles in schools, colleges and other educational organisations. Dr Maggie Preedy, Professor Nigel Bennett and Dr Christine Wise have taught, researched and published widely in the field of educational leadership and management. Maggie Preedy and Christine Wise are Senior Lecturers in the Faculty of Education and Language Studies at The Open University, UK. Nigel Bennett is Emeritus Professor of Leadership and Management in Education at The Open University.
