A Flash of Green tells the gripping story of small-town corruption and two people brave enough to fight back, featuring many of the themes John D. MacDonald explored better than anyone in his legendary career as a leading crime novelist. Introduction by Dean Koontz The opportunists have taken over Palm City.

Silent and deadly, like the snakes that infest the nearby swamps, they lay hidden from view, waiting for the right moment to strike. Political subterfuge has already eased the residents toward selling out. All that's left now is to silence a few stubborn holdouts. James Wing is only trying to help a friend's widow. At least that's what he tells himself after warning Kat Hubble that the beautiful bay she and her neighbors have struggled to save is going to be sold to developers. He knows that he shouldn't have told her anything. He's a reporter, trained to reveal nothing. But he's falling in love with her. Now cutthroats have set their sights on Kat—and they'll do anything, use anyone, to stop her from interfering in their plans. Praise for John D. MacDonald "John D. MacDonald was the great entertainer of our age, and a mesmerizing storyteller."—Stephen King "The first modern writer to nail Florida dead-center, to capture all its languid sleaze, racy sense of promise, and breath-grabbing beauty."—Carl Hiaasen "To diggers a thousand years from now, the works of John D. MacDonald would be a treasure on the order of the tomb of Tutankhamen."—Kurt Vonnegut Nobel laureate poet Czeslaw Milosz personal selection of 300 of the world's greatest poems written throughout the ages and around the world. "The highest achievers share some of their lowest moments, and there is much wisdom to be gained

from those struggles. Captivating, thought-provoking." —David Faber, CNBC The path to success is rarely easy or direct, and good mentors are hard to find. In *Getting There*, thirty leaders in diverse fields share their secrets to navigating the rocky road to the top. In an honest, direct, and engaging way, these role models describe the obstacles they faced, the setbacks they endured, and the vital lessons they learned. They dispense not only essential and practical career advice, but also priceless wisdom applicable to life in general. *Getting There* is for everyone—from students contemplating their futures to the vast majority of us facing challenges or seeking to reach our potential. "Kudos to Gillian Zoe Segal for assembling this remarkable group of visionaries and helping them all tell their stories without filters or false bravado. *Getting There* is both empowering and illuminating." —Piper Kerman, New York Times bestselling author of *Orange Is the New Black* "Life-changing, real-world advice." —Vanity Fair "Reading *Getting There* is like having an intimate, one-on-one talk with some of the world's most fascinating and accomplished people. You will be taken aback by their honesty, entertained by their anecdotes, and, most of all, learn invaluable lessons about both business and life. This book is fantastic—you will not be able to put it down!"—JJ Ramberg, bestselling author of *It's Your Business* "Somehow, Gillian Zoe Segal has gotten

these leaders to share their stories in a unique, authentic, and revealing way." —Robert Steven Kaplan, former president and CEO of the Federal Reserve Bank of Dallas *Developing a Spiritual Warfare Mentality in the Midst of the Valley* is a revolutionary look at *Spiritual Warfare* from a practical point of view. This book is designed to challenge your thinking so that you can function accurately in the midst of any situation that life presents. Hidden in the midst of every valley is the purpose waiting to be discovered. When you learn to think differently, you will discover the wonderful treasure of purpose, which will ultimately bring fulfillment to your life. In this landmark work, Stanley Saunders uses the analogy of two valleys (valley of bad decision and valley of destiny) to stir change in the heart of people. Regardless of what valley you find yourself in this book teaches you how to respond so that you can find meaning and significance to life. Most people are tired of going through the same battles and struggles over and over. Therefore, it's time to break that trend by applying the life-changing principles of God's Word. Are you ready for victory in every area of your life? A Brain Pickings Best Children's Book of the Year "An embarrassment of riches." —The New York Times An expansive collection of love letters to books, libraries, and reading, from a wonderfully eclectic array of thinkers and creators. In these pages, some of today's most wonderful culture-

makers—writers, artists, scientists, entrepreneurs, and philosophers—reflect on the joys of reading, how books broaden and deepen human experience, and the ways in which the written word has formed their own character. On the page facing each letter, an illustration by a celebrated illustrator or graphic artist presents that artist's visual response. Among the diverse contributions are letters from Jane Goodall, Neil Gaiman, Jerome Bruner, Shonda Rhimes, Ursula K. Le Guin, Yo-Yo Ma, Judy Blume, Lena Dunham, Elizabeth Gilbert, and Jacqueline Woodson, as well as a ninety-eight-year-old Holocaust survivor, a pioneering oceanographer, and Italy's first woman in space. Some of the illustrators, cartoonists, and graphic designers involved are Marianne Dubuc, Sean Qualls, Oliver Jeffers, Maira Kalman, Mo Willems, Isabelle Arsenault, Chris Ware, Liniers, Shaun Tan, Tomi Ungerer, and Art Spiegelman. This project is woven entirely of goodwill, generosity of spirit, and a shared love of books. Everyone involved has donated their time, and all profits will go to the New York Public Library systems. This stunning 272-page hardcover volume features a lay-flat binding to allow for greater ease of reading. You can use this book to design a house for yourself with your family; you can use it to work with your neighbors to improve your town and neighborhood; you can use it to design an office, or a workshop, or a public building.

And you can use it to guide you in the actual process of construction. After a ten-year silence, Christopher Alexander and his colleagues at the Center for Environmental Structure are now publishing a major statement in the form of three books which will, in their words, "lay the basis for an entirely new approach to architecture, building and planning, which will we hope replace existing ideas and practices entirely." The three books are *The Timeless Way of Building*, *The Oregon Experiment*, and this book, *A Pattern Language*. At the core of these books is the idea that people should design for themselves their own houses, streets, and communities. This idea may be radical (it implies a radical transformation of the architectural profession) but it comes simply from the observation that most of the wonderful places of the world were not made by architects but by the people. At the core of the books, too, is the point that in designing their environments people always rely on certain "languages," which, like the languages we speak, allow them to articulate and communicate an infinite variety of designs within a forma system which gives them coherence. This book provides a language of this kind. It will enable a person to make a design for almost any kind of building, or any part of the built environment. "Patterns," the units of this language, are answers to design problems (How high should a window sill be? How many stories should a building have? How much

space in a neighborhood should be devoted to grass and trees?). More than 250 of the patterns in this pattern language are given: each consists of a problem statement, a discussion of the problem with an illustration, and a solution. As the authors say in their introduction, many of the patterns are archetypal, so deeply rooted in the nature of things that it seems likely that they will be a part of human nature, and human action, as much in five hundred years as they are today. This *Guide to the Study and Use of Military History* is designed to foster an appreciation of the value of military history and explain its uses and the resources available for its study. It is not a work to be read and lightly tossed aside, but one the career soldier should read again or use as a reference at those times during his career when necessity or leisure turns him to the contemplation of the military past. Philosophy as a Way of Life This unique collection of essays on the late Pierre Hadot's revolutionary methodological approach to studying and practicing philosophy explores Hadot's primary conviction that philosophy itself goes beyond solving puzzles and analyzing abstract arguments. Hadot believed that philosophy is a key part of humanity's search for happiness, that it can transform our perception of the world, and thus can alter our very mode of being. His argument that the goal of philosophy is to shift our focus away from our habitual

obsession with individuality, and to embrace universality and objectivity, has resonated with thinkers across the Academy – and outside it. Offering genuinely interdisciplinary analysis of Hadot's work and philosophical practice, this volume includes papers written from a gamut of philosophical, historical, and geographical perspectives. Articles address issues in the history of philosophy from Pythagoras to Descartes, by way of Islamic thought, thus corresponding to Hadot's view of the importance of philologically based analysis of ancient texts and historical contexts. Others study the presence of ideas related to, or influenced by, Hadot in contemporary thought, from Wittgenstein to Leonard Nelson, analytic philosophy, and French postmodernism. The result is a wide-ranging publication pointing to an additional "third way" alongside the traditional approaches of Continental and analytic philosophy, one that expands our horizons with secular spiritual exercises designed to enable us to be in a fuller, more authentic way. This volume sets out to provide a comprehensive description of the grammar of Gooniyandi, a non-Pama-Nyungan language of the southern-central Kimberley region of Western Australia. It covers phonetics and phonology, word phrase and clause structure, and the semantics of closed-class grammatical items. The major focus is, however, on meaning: how do Gooniyandi speakers mean with and in their

language. To this end, the theoretical framework of systemic functional grammar, particularly as elaborated in Halliday's recent work, is adopted. Certain refinements to the theory are proposed in order to better account for the Gooniyandi evidence. Of obvious importance to those studying Australian aboriginal languages, this work has an importance to a wider audience for its effective presentation of theory justification. Provides unique synthesis of various modeling methodologies used to aid planning and operational decision making, for academic researchers and professionals. Probability theory is one branch of mathematics that is simultaneously deep and immediately applicable in diverse areas of human endeavor. It is as fundamental as calculus. Calculus explains the external world, and probability theory helps predict a lot of it. In addition, problems in probability theory have an innate appeal, and the answers are often structured and strikingly beautiful. A solid background in probability theory and probability models will become increasingly more useful in the twenty-first century, as difficult new problems emerge, that will require more sophisticated models and analysis. This is a text on the fundamentals of the theory of probability at an undergraduate or first-year graduate level for students in science, engineering, and economics. The only mathematical background required is knowledge of univariate and multivariate

calculus and basic linear algebra. The book covers all of the standard topics in basic probability, such as combinatorial probability, discrete and continuous distributions, moment generating functions, fundamental probability inequalities, the central limit theorem, and joint and conditional distributions of discrete and continuous random variables. But it also has some unique features and a forward-looking feel. Gerald and Piggie discover the joy of being read. But what will happen when the book ends? BEST OF THE YEAR The New York Times · Booklist Top of the List · World Kid Lit What letter does the word bee start with? If you said "B" you're right – in English! But in many, many languages, it actually starts with A. Bee is Anū in Igbo, Aamoo in Ojibwe, Abelha in Portuguese. And Arı in Turkish. Come and explore the gorgeous variations in the ways we talk about familiar things, unified and illuminated through Ellen Heck's eye-catching, graphic scratchboard details and hidden letterforms.
