Graphics Work, Organizations, and Technological Change Gerhard Mensch, Richard J. Niehaus, 2012-12-06 This volume is the proceedings of the Symposium entitled Work Organizations and Technological Change which was held in Garmisch Partenkirchen West Germany 14-19 June 1981. The meeting was sponsored by the Special Panel on Systems Sciences of the NATO Scientific Affairs Division. In proposing this meeting, the Symposium Directors built upon several preceding NATO conferences in the general area of personnel systems, manpower modelling and organization. The most recent NATO Conference entitled Manpower Planning and Organization Design was held in Stresa, Italy, in 1977. That meeting was organized to foster research on the interrelationships between programmatic approaches to personnel planning within organizations and behavioral science approaches to organization design. From that context of corporate planning, the total internal organizational perspective was the MACRO view and the selection, assignment, care and feeding of the people was the MICRO view. Conceptually, this meant that an integrated approach was needed if all the dimensions of such problems within private and public organizations were to come out correctly.
