Becoming a New Teaching Hospital Association of American Medical Colleges,2012 This guide is designed to assist hospitals that are thinking of becoming new teaching hospitals and medical schools seeking to develop education partnerships with non teaching hospitals to understand the basic principles of the Medicare payments available to support the added costs associated with being a teaching hospital Publisher s note *Federal Contract Compliance Manual* United States. Office of Federal Contract Compliance Programs,1990 *Conditions of Participation for Hospitals* United States. Social Security Administration,1966 *Improving Diagnosis in Health Care* National Academies of Sciences, Engineering, and Medicine,Institute of Medicine,Board on Health Care Services,Committee on Diagnostic Error in Health Care,2015-12-29 Getting the right diagnosis is a key aspect of health care it provides an explanation of a patient s health problem and informs subsequent health care decisions The diagnostic process is a complex collaborative activity that involves clinical reasoning and information gathering to determine a patient s health problem According to *Improving Diagnosis in Health Care* diagnostic errors inaccurate or delayed diagnoses persist throughout all settings of care and continue to harm an unacceptable number of patients It is likely that most people will experience at least one diagnostic error in their lifetime sometimes with devastating consequences Diagnostic errors may cause harm to patients by preventing or delaying appropriate treatment providing unnecessary or harmful treatment or resulting in psychological or financial repercussions The committee concluded that improving the diagnostic process is not only possible but also represents a moral professional and public health imperative *Improving Diagnosis in Health Care* a continuation of the landmark Institute of Medicine reports *To Err Is Human* 2000 and *Crossing the Quality Chasm* 2001 finds that diagnosis and in particular the occurrence of diagnostic errors has been largely unappreciated in efforts to improve the quality and safety of health care Without a dedicated focus on improving diagnosis diagnostic errors will likely worsen as the delivery of health care and the diagnostic process continue to increase in complexity Just as the diagnostic process is a collaborative activity improving diagnosis will require collaboration and a widespread commitment to change among health care professionals health care organizations patients and their families researchers and policy makers The recommendations of *Improving Diagnosis in Health Care* contribute to the growing momentum for change in this crucial area of health care quality and safety *Medical Fee Schedule* ,1995 **Registries for Evaluating Patient Outcomes** Agency for Healthcare Research and Quality/AHRQ,2014-04-01 This User s Guide is intended to support the design implementation analysis interpretation and quality evaluation of registries created to increase understanding of patient outcomes For the purposes of this guide a patient registry is an organized system that uses observational study methods to collect uniform data clinical and other to evaluate specified outcomes for a population defined by a particular disease condition or exposure and that serves one or
