**Industrial Gas Turbines** A M Y Razak,2007-10-31 *Industrial Gas Turbines Performance and Operability* explains important aspects of gas turbine performance such as performance deterioration service life and engine emissions Traditionally gas turbine performance has been taught from a design perspective with insufficient attention paid to the operational issues of a specific site Operators are not always sufficiently familiar with engine performance issues to resolve operational problems and optimise performance *Industrial Gas Turbines Performance and Operability* discusses the key factors determining the performance of compressors turbines combustion and engine controls An accompanying engine simulator CD illustrates gas turbine performance from the perspective of the operator building on the concepts discussed in the text The simulator is effectively a virtual engine and can be subjected to operating conditions that would be dangerous

and damaging to an engine in real life conditions It also deals with issues of engine deterioration emissions and turbine life The combined use of text and simulators is designed to allow the reader to better understand and optimise gas turbine operation Discusses the key factors in determining the performance of compressors turbines combustion and engine controls Explains important aspects of gas and turbine performance such as service life and engine emissions Accompanied by CD illustrating gas turbine performance building on the concepts discussed in the text Kompass ,1994 *China Economic News* ,1998 Artificial Cilia Jaap MJ den Toonder,Patrick R Onck,2013-05-31 Cilia are tiny hairs covering biological cells to generate and sense fluid flow Millions of years of evolution have inspired a novel technology which is barely a decade old Artificial cilia have been developed to control and sense fluid flow in microscopic systems presenting new and interesting options for flow control in lab on a chip devices This appealing link between nature and technology has seen rapid development in the last few years and this book presents a review of the state of the art in the form of a professional reference book The editors have pioneered the field having initiated a major European project on this topic soon after its inception Active researchers in academia and industry will benefit from the comprehensive nature of this book while postgraduates and those new to the field will gain a clear understanding of the theory techniques and applications of artificial cilia **Triboelectric Nanogenerators** Zhong Lin Wang,Long Lin,Jun Chen,Simiao Niu,Yunlong Zi,2016-08-17 This book introduces an innovative and high efficiency technology for mechanical energy harvesting The book covers the history and development of triboelectric nanogenerators basic structures working principles performance characterization and potential applications It is divided into three parts Part A illustrates the fundamental working modes of triboelectric nanogenerators with their prototype structures and theoretical analysis Part B and Part C introduce two categories of applications namely self powered systems and self powered active sensors The book will be an ideal guide to scientists and engineers beginning to study triboelectric nanogenerators or wishing to deepen their knowledge of the field Readers will be able to place the technical details about this technology in context and acquire the necessary skills to reproduce the experimental setups for fabrication and measurement *Summary of World Broadcasts* ,1971 *Seismic Design of Industrial Facilities* Sven Klinkel,Christoph Butenweg,Gao Lin,Britta Holtschoppen,2013-09-04 Seismic Design of Industrial Facilities demands a deep knowledge on the seismic behaviour of the individual structural and non structural components of the facility possible interactions and last but not least the individual hazard potential of primary and secondary damages From 26 27 September 2013 the International Conference on Seismic Design of Industrial Facilities firstly addresses this broad field of work and research in one specialized conference It brings together academics researchers and professional engineers in order to discuss the challenges of seismic design for new and existing industrial facilities and to compile innovative current research This volume contains 50 contributions to the SeDIF Conference covering the following topics with respect to the specific conditions of plant design International building codes and guidelines on the seismic design of

industrial facilities Seismic design of non structural components Seismic design of silos and liquid filled tanks Soil structure interaction effects Seismic safety evaluation uncertainties and reliability analysis Innovative seismic protection systems Retrofitting The SeDIF Conference is hosted by the Chair of Structural Statics and Dynamics of RWTH Aachen University Germany in cooperation with the Institute for Earthquake Engineering of the Dalian University of Technology China

**Random-Like Multiple Objective Decision Making** Jiuping Xu, Liming Yao, 2011-03-25 What are the random like phenomena that can be found everywhere in real life world When carrying out a random sampling survey on the traffic situation we often obtain some descriptive results such as approximately expedite a little crowded and so on therefore the average level should be regarded as the random fuzzy phenomenon which is one of the random like phenomena Decision makers usually need to make the decision for these problems with random like phenomena Which model should be constructed for them How should we handle these models to find the optimal strategy How can we apply these models to solve real life problems with random like phenomena In order to answer these questions this book provides an up to date methodology system 5MRP for random like multiple objective decision making which includes problem system with random like phenomena model system with random like coefficients research system with random like uncertain methods Some practical applications are also provided to illustrate the effectiveness of the proposed methodology system Researchers practitioners and students in systems science economics mathematics information engineering and MS OR will get a lot of useful references from this research monograph **The Australian Official Journal of Trademarks**, 1906

**Superconducting Accelerator Magnets** Karl-hubert Mess, Peter Schmueser, Siegfried Wolff, 1996-08-30 The main topic of the book are the superconducting dipole and quadrupole magnets needed in high energy accelerators and storage rings for protons antiprotons or heavy ions The basic principles of low temperature superconductivity are outlined with special emphasis on the effects which are relevant for accelerator magnets Properties and fabrication methods of practical superconductors are described Analytical methods for field calculation and multipole expansion are presented for coils without and with iron yoke The effect of yoke saturation and geometric distortions on field quality is studied Persistent magnetization currents in the superconductor and eddy currents the copper part of the cable are analyzed in detail and their influence on field quality and magnet performance is investigated Superconductor stability quench origins and propagation and magnet protection are addressed Some important concepts of accelerator physics are introduced which are needed to appreciate the demanding requirements on field quality in large storage rings The operational experience with the superconducting HERA collider serves as an illustration Finally superconducting correction coils and practical construction and fabrication methods of accelerator magnets are discussed The physical and technical principles described in the book are substantiated with a wealth of experimental data on multipoles persistent and eddy current effects quench performance and much more *The Centre of City: Urban Central Structure* Beixiang Shi, Junyan Yang, Yi Zheng, 2021-02-08 This book
