and an elderly retired couple The remote tropical island that sheltered them was lush and gorgeous but it also held a deadly secret And their old enemy Bryce Spencer was in hot pursuit Could Mac and Connors keep their four unlikely companions alive and escape the mysterious island before Spencer killed them all Excerpt Mac Mariah stared in blank horror as the plane's shattered nose sank beneath the choppy storm darkened waves leaving behind only a trail of shimmering bubbles Mac Someone was holding her back pleading with her clutching her arms in a fierce paralyzing grip Let me go she yelled wrenching free despite the blazing pain in her shoulder He's my partner Saltwater stung her lacerated forehead as she plunged headfirst into the churning waves She barely even noticed Mac where are you she shouted awkwardly treading water Mac The bubbles were slowly fading away She had to act now or it would be too late She dove kicking hard following the plane's lazy descent Icy darkness enveloped her Her lungs began to ache and fiery spots danced before her eyes yet still she struggled deeper She couldn't give up she just couldn't More rising air bubbles suddenly exploded in her face blinding her Then her groping fingers brushed against something slippery Mac's leather jacket One last frantic surge of energy moved her weakening legs propelling her upward again dragging his heavy weight behind her She couldn't give up she couldn't Please Mac don't die Cold rain suddenly lashed against her upturned face Sputtering she sucked in deep breaths of precious air Lightning flared overhead painfully bright against her dilated eyes The iron bands constricting her chest slowly eased as she fought to keep Mac's sagging head above the waves Over here Reuben's lilting voice cut through the howling wind and she caught a brief glimpse of his pale face through the churning spray We're over here Hurry Thunder rumbled in her ears as the heavy waves knocked her back and forth Frigid water cascaded over her head and she resurfaced with a strangled cough Fresh pain lanced through her shoulder as she clumsily splashed toward the heaving orange raft Her legs were going numb from the bitter cold and she was so tired but she had to keep trying Mac's life depended on her Something hard stung her flailing hand A rope She wrapped stiffening fingers around it and felt the waves tug harder in protest as the raft suddenly jolted closer New energy surged through her aching frame when Reuben's fingers locked around Mac's limp arm and pulled hard Hurry she shouted He's not breathing Esther leaned out perilously far to help and slowly they hauled his long body into the raft Then it was Connors' turn and she wanted to sob with relief as the ocean reluctantly loosened its death grip on her thrashing legs Mac was sprawled face down in the sloshing raft Help me roll him over she gasped clutching her throbbing arm with bleeding fingers Oh God his lips were blue and his open eyes were glazed He can't die not yet Esther braced herself against the rolling waves and pressed shaking fingers against his cold throat He still has a pulse she shouted It's slow but he's still alive Both teenagers looked shell shocked too dazed to react Connors ignored them and focused on her partner's deathly pale face Come on Mac come on she chanted thrusting hard against his inert diaphragm Breathe Helpful hands steadied her as she bent to force air down his windpipe Again And again Breathe thrust Breathe thrust Breathe thrust Suddenly his limp body convulsed and a gush of salty water erupted from his open mouth Connors tilted his head to one side

and let the water drain Breathe Mac she ordered pushing hard against his ribs one last time Come on damn it Breathe He jerked again and this time she heard the sweet rush of air filling his lungs His chest began to rise and fall in a slow rhythmic cadence as his taut muscles relaxed Slowly his eyes flickered open and he focused on her tear streaked face Hey His pale lips twitched into a faint teasing grin as they formed soundless words You weren't worried about me were you For one crazy moment she didn't know whether to hit him or kiss him Regulations be damned this was a moment when she needed to touch him just to reassure herself that he was still alive Jesus Mac I thought I'd lost you Don't you ever do that to me again Lightning flashed overhead He tried to push himself up on one elbow but she laid a restraining hand on his chest Lie still You need rest Another huge wave crashed into the raft drenching them with icy spray Reuben wrapped his fingers tighter around the support rope and leaned close enough to shout in her ear How long will this storm last His aging face was drawn with fear The raft is filling up with water fast Emergency rafts are built to handle a lot of water she yelled back Just hang on Suddenly the black clouds and shrieking winds vanished For one ageless nauseating moment the entire world seemed to whirl in dizzying spirals Then a soft warm rain began to patter down around them Mac She bolted upright and stared wildly around What the hell I don't know It was impossible Fierce squalls didn't just appear and then disappear in the blink of an eye But the violent electrical storm was gone The gigantic crashing waves were gone And as they watched in stunned disbelief the hazy gray clouds overhead simply melted away and the golden sun began to shine down from a perfectly clear blue sky The ocean around them was calm gentle and empty The other life raft was nowhere to be seen

**Remote Sensing for Geoscientists** Gary L. Prost, 2013-12-13 This third edition of the bestselling Remote Sensing for Geologists A Guide to Image Interpretation is now titled Remote Sensing for Geoscientists Image Analysis and Integration The title change reflects that this edition applies to a broad spectrum of geosciences not just geology stresses that remote sensing has become more than photointerpretation and emphasizes integration of multiple remote sensing technologies to solve Earth science problems The text reviews systems and applications explains what to look for when analyzing imagery and provides abundant case histories to illustrate the integration and application of these tools See What's New in the Second Edition Broader coverage to include integration of multiple remote sensing technologies Expanded with significant new illustrations in color and reviews of new satellites and sensors Analysis of imagery for geobotanical remote sensing remote geochemistry modern analogs to ancient environments and astrogeology The book covers how to initiate a project including determining the objective choosing the right tools and selecting imagery It describes techniques used in geologic mapping and mineral and hydrocarbon exploration image analysis used in mine development and petroleum exploitation site evaluation groundwater development surface water monitoring geothermal resource exploitation and logistics It also demonstrates how imagery is used to establish environmental baselines monitor land air and water quality map hazards and determine the effects of global warming The many examples of geologic

mapping on other planets and the moon highlight how to analyze planetary surface processes map stratigraphy and locate resources The book then examines remote sensing and the public geographic information systems and Google Earth and how imagery is used by the media in the legal system in public relations and by individuals Readers should come away with a good understanding of what is involved in image analysis and interpretation and should be able to recognize and identify geologic features of interest Having read this book they should be able to effectively use imagery in petroleum mining groundwater surface water engineering and environmental projects

[Comprehensive Biophysics](#), 2012-04-12 Biophysics is a rapidly evolving interdisciplinary science that applies theories and methods of the physical sciences to questions of biology Biophysics encompasses many disciplines including physics chemistry mathematics biology biochemistry medicine pharmacology physiology and neuroscience and it is essential that scientists working in these varied fields are able to understand each other's research *Comprehensive Biophysics Nine Volume Set* will help bridge that communication gap Written by a team of researchers at the forefront of their respective fields under the guidance of Chief Editor Edward Egelman *Comprehensive Biophysics Nine Volume Set* provides definitive introductions to a broad array of topics uniting different areas of biophysics research from the physical techniques for studying macromolecular structure to protein folding muscle and molecular motors cell biophysics bioenergetics and more The result is this comprehensive scientific resource a valuable tool both for helping researchers come to grips quickly with material from related biophysics fields outside their areas of expertise and for reinforcing their existing knowledge Biophysical research today encompasses many areas of

biology These studies do not necessarily share a unique identifying factor This work unites the different areas of research and allows users regardless of their background to navigate through the most essential concepts with ease saving them time and vastly improving their understanding The field of biophysics counts several journals that are directly and indirectly concerned with the field There is no reference work that encompasses the entire field and unites the different areas of research through deep foundational reviews Comprehensive Biophysics fills this vacuum being a definitive work on biophysics It will help users apply context to the diverse journal literature offering and aid them in identifying areas for further research Chief Editor Edward Egelman E I C Biophysical Journal has assembled an impressive world class team of Volume Editors and Contributing Authors Each chapter has been painstakingly reviewed and checked for consistent high quality The result is an authoritative overview which ties the literature together and provides the user with a reliable background information and citation resource
