How the Other Half Lives Jacob Riis, 2011 *Capital as Power* Jonathan Nitzan, Shimshon Bichler, 2009-06-02

Conventional theories of capitalism are mired in a deep crisis after centuries of debate they are still unable to tell us what capital is Liberals and Marxists both think of capital as an economic entity that they count in universal units of utility or abstract labour respectively But these units are totally fictitious Nobody has ever been able to observe or measure them and for a good reason they don't exist Since liberalism and Marxism depend on these non-existing units their theories hang in suspension They cannot explain the process that matters most the accumulation of capital This book offers a radical alternative According to the authors capital is not a narrow economic entity but a symbolic quantification of power It has little to do with utility or abstract labour and it extends far beyond machines and production lines Capital the authors claim represents the organized power of dominant capital groups to reshape or reorder their society Written in simple language accessible to lay readers and experts alike the book develops a novel political economy It takes the reader through the history assumptions and limitations of mainstream economics and its associated theories of politics It examines the evolution of Marxist thinking on accumulation and the state And it articulates an innovative theory of capital as power and a new history of the capitalist mode of power

Segregation by Design Jessica Trounstein, 2018-11-15 Segregation by Design draws on more than 100 years of quantitative and qualitative data from thousands of American cities to explore how local governments generate race and class segregation Starting in the early twentieth century cities have used their power of land use control to determine the location and availability of housing amenities such as parks and negative land uses such as garbage dumps The result has been segregation first within cities and more recently between them Documenting changing patterns of segregation and their political mechanisms Trounstein argues that city governments have pursued these policies to enhance the wealth and resources of white property owners at the expense of people of color and the poor Contrary to leading theories of urban politics local democracy has not functioned to represent all residents The result is unequal access to fundamental local services from schools to safe neighborhoods to clean water

An Engine, Not a Camera Donald MacKenzie, 2008-08-29 In *An Engine Not a Camera* Donald MacKenzie argues that the emergence of modern economic theories of finance affected financial markets in fundamental ways These new Nobel Prize winning theories based on elegant mathematical models of markets were not simply external analyses but intrinsic parts of economic processes Paraphrasing Milton Friedman MacKenzie says that economic models are an engine of inquiry rather than a camera to reproduce empirical facts More than that the emergence of an authoritative theory of financial markets altered those markets fundamentally For example in 1970 there was almost no trading in financial derivatives such as futures By June of 2004 derivatives contracts totaling 273 trillion were outstanding worldwide MacKenzie suggests that this growth could never have happened without the development of theories that gave derivatives legitimacy and explained their complexities MacKenzie examines the role

played by finance theory in the two most serious crises to hit the world's financial markets in recent years the stock market crash of 1987 and the market turmoil that engulfed the hedge fund Long Term Capital Management in 1998 He also looks at finance theory that is somewhat beyond the mainstream chaos theorist Benoit Mandelbrot's model of wild randomness MacKenzie's pioneering work in the social studies of finance will interest anyone who wants to understand how America's financial markets have grown into their current form [The Albumen & Salted Paper Book](#) James M.
