People Forced to Flee United Nations High Commissioner for Refugees, 2022-02-16

People in danger have received protection in communities beyond their own from the earliest times of recorded history. The causes war, conflict, violence, persecution, natural disasters, and climate change are as familiar to readers of the news as to students of the past. It is 70 years since nations in the wake of World War II drew up the landmark 1951 Convention relating to the Status of Refugees. *People Forced to Flee* marks this milestone. It is the latest in a long line of publications stretching back to 1993 that were previously entitled *The State of the World's Refugees*. The book traces the historic path that led to the 1951 Convention, showing how history was made by taking the centuries-old ideals of safety and solutions for refugees to global practice. It maps its progress during which international protection has reached a much broader group of people than initially envisaged. It examines international responses to forced displacement within borders as well as beyond them and the protection principles that apply to both. It reviews where they have been used with consistency and success and where they have not. At times the strength and resolve of the international community seems strong, yet solutions and meaningful solidarity are often elusive. Taking stock today at this important anniversary is all the more crucial as the world faces increasing forced displacement. Most is experienced in low and middle income countries and persists for generations. People forced to flee face barriers to improving their lives, contributing to the communities in which they live, and realizing solutions. Everywhere an effective response depends on the commitment to international cooperation set down in the 1951 Convention, a vision often compromised by efforts to minimize responsibilities. There is growing recognition that doing better is a global imperative. Humanitarian and development action has the potential to be transformational, especially when grounded in the local context. *People Forced to Flee* examines how and where increased development investments in education, health, and economic inclusion are helping to improve socioeconomic opportunities both for forcibly displaced persons and their hosts. In 2018 the international community reached a Global Compact on Refugees for more equitable and sustainable responses. It is receiving deeper support. *People Forced to Flee* looks at whether that is enough for what could and should help define the next 70 years.

A Stake in the Outcome Jack Stack, Bo Burlingham, 2003-09-16 The First Management Classic of the New Millennium A bold experiment is taking place these days as leading edge companies turn upside down the management paradigm that has dominated corporate thinking for more than one hundred years Southwest Airlines is perhaps the most visible practitioner soaring through economic downturns while its competitors slash their budgets and order massive layoffs but you can find other pioneers of the new approach in almost every industry and market niche Their secret a culture of ownership that allows them to tap into the most underutilized resource in business today namely the enthusiasm intelligence and creativity of working people everywhere No one knows more about building a culture of ownership than CEO Jack Stack who's been working on one for the past twenty years with his colleagues at SRC Holdings Corporation formerly Springfield ReManufacturing Corporation Along the way they've turned their company into what Business Week has called a management Mecca attracting thousands of people representing hundreds of businesses to SRC's home in Springfield Missouri There the visitors learn how to incorporate the ideals and values of SRC's remarkable corporate culture into their own organizations and then they go back and do it Now in A Stake in the Outcome Stack offers a master class on creating a culture of ownership presenting the hard won lessons of his own twenty year journey and explaining what it really takes to build for long term success The pioneer of open book management described in the best selling classic The Great Game of Business Stack and twelve other managers began their journey in 1982 when they purchased their factory from its struggling parent company SRC grew 15 percent a year while adding almost a thousand new jobs and the company's stock price rocketed from 10 cents to 81.60 per share In the process Stack discovered that long term success required constant innovation and that building a culture of ownership involved much more than paying bonuses handing out stock options or setting up an employee stock ownership plan In a successful ownership culture every employee had to take the fate of the company as personally as an individual owner would Achieving that level of commitment was extraordinarily difficult but Stack realized that the payoff would be enormous a company that was consistently able to outperform the market A Stake in the Outcome isn't about theory it's about practice Stack draws from his own successes and failures at SRC to show how any company can teach its employees to think and act like owners including how to implement an effective equity sharing program how to promote continuous learning at every level of the organization how to fire up employees competitive juices how to broaden the concept of leadership and delegate responsibility for the business and how to build a workforce that is fast on its feet and ready to take advantage of every opportunity You'll also learn about other companies that have succeeded in building cultures of ownership and the lessons they can teach the rest of us Written in Jack Stack's straightforward witty no beating around the bush style A Stake in the Outcome is like having a one on one session with a master entrepreneur and business innovator It shows managers and executives of companies both large and small how to build a ferociously motivated workforce that is energized and committed to meeting and overcoming the most daunting challenges a company can face
