Uncovering the Territorial Dimension of European Union Cohesion Policy Sep 08 2023 Despite the non-territorialised strategic goals of the EU 2020 Strategy, the long-term aim of EU Cohesion Policy to promote harmonious development of the European territory – social, economic, and ‘territorial cohesion’ – remains a central goal of achieving a more cohesive EU territory. This book examines the ‘territorial dimension’ of EU Cohesion Policy, specifically assessing territorial impacts at the various spatial levels, engaging theoretically and empirically with the notion and role of the ‘territorial dimension’ within a strongly fragmented EU policymaking process, and examining more generally EU Cohesion Policy, as the main driver of the EU territorial development process. It provides an updated and fresh theoretical discussion on the precise meaning of the ‘territorial dimension’ of policies and the relatively recent EU policy evaluation technique, known as ‘Territorial Impact Assessment’ (TIA). Assessing the history, relevance, efficiency and effectiveness of these procedures, it presents several empirical findings on the implementation of specific territorial-focus and place-based financial instruments, as part of the Territorial Agendas and the EU goal of achieving a more integrated, territorial approach. This text will be of key interest to scholars, students and practitioners of spatial planning and cohesion policy, European sector policies and European spatial planning, and more broadly to European and EU studies/politics, regional economic geography and public policy.

Process and Procedure in EU Administration Aug 15 2021 This book is about the administrative

procedures of the European Union, which we see as the 'super glue' holding in place the sprawling structures of the EU governance system. The early chapters deal with the structures expansively defined, the diverse functions of administrative procedures in the EU and the values that underpin them, concentrating on the respective contributions of the legislature and administration. A separate chapter deals with the important procedural function of rights protection through the two Community Courts and the contribution of the European Ombudsman. We then turn to 'horizontal' or general procedures, dealing with executive law-making, transparency and the regulation of government contracting. A study of Commission enforcement procedure ends the section. 'Vertical' or sector-specific studies in significant areas of EU administration follow, including competition policy, cohesion policy (structural funds) and financial services regulation. Separate chapters deal with policing cooperation through Europol and with the interplay of international and EU institutions in the fields of environmental procedure and human rights. The final chapter contains the authors' reflections on current proposals for codification but ends with a general evaluation of the role and contribution of administrative procedure in the construction of the EU.

Devolution and Localism in England Mar 10 2021 Combining historical and policy study with empirical research from a qualitative study of regional elites this book offers an original and timely insight into the progress of devolution of governance in England. With particular interest in how governments have tried and continue to engage English people in sub-national democratic processes while dealing with the realities of governance it uses in-depth interviews with key figures from three English regions to get the 'inside view' of how these processes are seen by the regional and local political, administrative, business and voluntary sector elites who have to make policies work in practice. Tracing the development of decentralisation policies through regional policies up to and including the general election in 2010 and the radical shift away from regionalism to localism by the new Coalition Government thereafter the authors look in detail at some of the key policies of the incumbent Coalition Government such as City Regions and Localism and their implementation. Finally they consider the implications of the existing situation and speculate on possible issues for the future.

Cohesion and Growth Apr 22 2022 To combat economic disparity and low growth, the European Union has established an integrated policy system that pursues increased cohesion and smart, sustainable, and inclusive growth. This integrated approach is realized through thousands of development projects and takes up more than a third of the total budget of the European Union. Despite its significance, the policy is subject to many misunderstandings and there is a lot of controversy surrounding its effectiveness. *Cohesion and Growth* seeks to bring clarity to these issues. It presents both the theoretical and practical aspects of EU intervention, a critical contribution to the understanding of the anatomy of the problems and the way to apply effective solutions to them, and a systematic view of the issues at each of the subsequent stages of the whole policy cycle. Offering an authoritative analysis of the problems and debates involved, this book is essential reading for students, policy makers, project promoters and researchers concerned with this key area of European policy making.

Introduction to Software Project Management Sep 15 2021 Although software development is one of the most complex activities carried out by man, sound development processes and proper project management can help ensure your software projects are delivered on time and under budget. Providing the know-how to manage software projects effectively, *Introduction to Software Project Management* supplies an accessible introduction to software project management. The book begins with an overview of the fundamental techniques of project management and the technical aspects of software development. This section supplies the understanding of the techniques required to mitigate uncertainty in projects and better control the complexity of software development projects. The second part illustrates the technical activities of software development in a coherent process—describing how to customize this process to fit a wide range of software development scenarios. Examines project management frameworks and software development standards, including ESA and NASA guidelines, PRINCE2®, and PMBOK® Addresses open source development practices and tools so readers can adopt best practices and get started with tools that are available for free Explains how to tailor the development process to different kinds of products and formalities, including the development of web applications Includes access to additional material for both practitioners and teachers at www.spmbook.com Supplying an analysis of existing development and management frameworks, the book describes how to set up an open-source tool infrastructure to manage projects. Since practitioners must be able to mix traditional and agile techniques effectively, the book covers both and explains how to use traditional techniques for planning and developing software components alongside agile methodologies. It does so in a manner that will help you to foster freedom and creativity in assembling the processes that will best serve your needs.

Resource Management in Mobile Computing Environments Oct 17 2021 This book reports the latest advances on the design and development of mobile computing systems, describing their applications in the context of modeling, analysis and efficient resource management. It explores the challenges on mobile computing and resource management paradigms, including research efforts and approaches recently carried out in response to them to address future open-ended issues. The book includes 26 rigorously refereed chapters written by leading international researchers, providing the readers with technical and scientific information about various aspects of mobile computing, from basic concepts to advanced findings, reporting the state-of-the-art on resource management in such environments. It is mainly intended as a reference guide for researchers and practitioners involved in the design, development and applications of mobile computing systems, seeking solutions to related issues. It also represents a useful textbook for advanced undergraduate and graduate courses, addressing special topics such as: mobile and ad-hoc wireless networks; peer-to-peer systems for mobile computing; novel resource management techniques in cognitive radio networks; and power management in mobile computing systems.

Preventing Chemical Weapons Feb 01 2023 The life and chemical sciences are in the midst of a period of rapid and revolutionary transformation that will undoubtedly bring societal benefits but also have potentially malign applications, notably in the development of chemical weapons. Such concerns are exacerbated by the unstable international security environment and the changing nature of armed conflict, which could fuel a desire by certain States to retain and use existing chemical weapons, as well as increase State interest in creating new weapons; whilst a broader range of actors may seek to employ diverse toxic chemicals as improvised weapons. Stark

indications of the multi-faceted dangers we face can be seen in the chemical weapons attacks against civilians and combatants in Iraq and Syria, and also in more targeted chemical assassination operations in Malaysia and the UK. Using a multi-disciplinary approach, and drawing upon an international group of experts, this book analyses current and likely near-future advances in relevant science and technology, assessing the risks of their misuse. The book examines the current capabilities, limitations and failures of the existing international arms control and disarmament architecture – notably the Chemical Weapons Convention – in preventing the development and use of chemical weapons. Through the employment of a novel Holistic Arms Control methodology, the authors also look beyond the bounds of such treaties, to explore the full range of international law, international agreements and regulatory mechanisms potentially applicable to weapons employing toxic chemical agents, in order to develop recommendations for more effective routes to combat their proliferation and misuse. A particular emphasis is given to the roles that chemical and life scientists, health professionals and wider informed activist civil society can play in protecting the prohibition against poison and chemical weapons; and in working with States to build effective and responsive measures to ensure that the rapid scientific and technological advances are safeguarded from hostile use and are instead employed for the benefit of us all.

Paper Trails Mar 22 2022 Across the globe, states have long aimed to control the movement of people, identify their citizens, and restrict noncitizens' rights through official identification documents. Although states are now less likely to grant permanent legal status, they are increasingly issuing new temporary and provisional legal statuses to migrants. Meanwhile, the need for migrants to apply for frequent renewals subjects them to more intensive state surveillance. The contributors to *Paper Trails* examine how these new developments change migrants' relationship to state, local, and foreign bureaucracies. The contributors analyze, among other topics, immigration policies in the United Kingdom, the issuing of driver's licenses in Arizona and New Mexico, the Deferred Action for Childhood Arrivals program, and community know-your-rights campaigns. By demonstrating how migrants are inscribed into official bureaucratic systems through the issuance of identification documents, the contributors open up new ways to understand how states exert their power and how migrants must navigate new systems of governance. Sustainability in high performance sport Oct 09 2023 Success in high performance sport is highly valued in today's world, with lucrative contracts, sponsorship deals, and opportunities for celebrity status balanced against substantial investments of time and energy, and high chances of failure. With pressure mounting on athletes and coaches to make the most of athletic investments, the temptation to make health-related or ethical compromises is growing. *Sustainability in High Performance Sport* examines the pressures faced by coaches and athletes, and considers how sustainable science can offer alternative pathways to sporting excellence. By applying principles relating to carrying capacities, complexity and uncertainty, production and consumption, and ethics, this unique book provides new ways of thinking about both enduring and emerging challenges. With a scope that includes themes such as coaching practices, coach-athlete relationships, over-training and injuries, the development of sporting expertise, and doping, *Sustainability in High Performance Sport* is the most comprehensive exploration of sustainability in elite sport available. It is an invaluable resource for anybody with an interest in achieving long-term success in high performance sport. This book was originally published as a special issue of *Reflective Practice*.

Reforming European Data Protection Law Mar 02 2023 This book on privacy and data protection offers readers conceptual analysis as well as thoughtful discussion of issues, practices, and solutions. It features results of the seventh annual International Conference on Computers, Privacy, and Data Protection, CPDP 2014, held in Brussels January 2014. The book first examines profiling, a persistent core issue of data protection and privacy. It covers the emergence of profiling technologies, on-line behavioral tracking, and the impact of profiling on fundamental rights and values. Next, the book looks at preventing privacy risks and harms through impact assessments. It contains discussions on the tools and methodologies for impact assessments as well as case studies. The book then goes on to cover the purported trade-off between privacy and security, ways to support privacy and data protection, and the controversial right to be forgotten, which offers individuals a means to oppose the often persistent digital memory of the web. Written during the process of the fundamental revision of the current EU data protection law by the Data Protection Package proposed by the European Commission, this interdisciplinary book presents both daring and prospective approaches. It will serve as an insightful resource for readers with an interest in privacy and data protection.

Capacity Mechanisms in EU Energy Law May 16 2024 Many states – including European Union (EU) Member States – subsidise energy producers in order to guarantee the uninterrupted availability of affordable electricity. This book presents the first in-depth examination of how these so-called capacity mechanisms are addressed in EU law and how they affect the functioning of the EU energy markets. Focusing on the existing legal framework as well as the new provisions of the Clean Energy for All Europeans package for capacity mechanisms, the author addresses and analyses such aspects as the following: the structure and functioning of the EU electricity markets; EU's competence to address security of supply and Member States' margin of discretion; sector-specific rules for security of supply; legal conditions for subsidising generation adequacy; capacity remuneration under the EU State aid regime; free movement rules that address generation adequacy measures; balancing different interests of EU energy law in the context of generation adequacy; and the requirement of proportionality in State intervention to ensure generation adequacy. The analysis draws on relevant sources of EU law (treaties, regulations and directives) as well as the case law of the European Court of Justice and the General Court, together with soft law instruments such as Commission guidelines. Scholarly sources include not only legal literature but also work on energy policy, energy engineering and energy economics. As a detailed analysis of how capacity mechanisms address issues arising in the context of the energy transition – and how the system of EU law applicable to capacity mechanisms should be interpreted to further the objectives of EU energy law – the book will help policymakers and legislators in Member States to understand the changing legal setting for capacity mechanisms. Lawyers, academics and other professionals who deal with EU electricity markets in the EU and beyond are sure to welcome its

detailed description and analysis.

Toward a New Climate Agreement Nov 10 2023 Climate change is one of the most pressing problems facing the global community. Although most states agree that climate change is occurring and is at least partly the result of humans' reliance on fossil fuels, managing a changing global climate is a formidable challenge. Underlying this challenge is the fact that states are sovereign, governed by their own laws and regulations. Sovereignty requires that states address global problems such as climate change on a voluntary basis, by negotiating international agreements. Despite a consensus on the need for global action, many questions remain concerning how a meaningful international climate agreement can be realized. This book brings together leading experts to speak to such questions and to offer promising ideas for the path toward a new climate agreement. Organized in three main parts, it examines the potential for meaningful climate cooperation. Part 1 explores sources of conflict that lead to barriers to an effective climate agreement. Part 2 investigates how different processes influence states' prospects of resolving their differences and of reaching a climate agreement that is more effective than the current Kyoto Protocol. Finally, part 3 focuses on governance issues, including lessons learned from existing institutional structures. The book is unique in that it brings together the voices of experts from many disciplines, such as economics, political science, international law, and natural science. The authors are academics, practitioners, consultants and advisors. Contributions draw on a variety of methods, and include both theoretical and empirical studies. The book should be of interest to scholars and graduate students in the fields of economics, political science, environmental law, natural resources, earth sciences, sustainability, and many others. It is directly relevant for policy makers, stakeholders and climate change negotiators, offering insights into the role of uncertainty, fairness, policy linkage, burden sharing and alternative institutional designs.

Securing Development Oct 29 2022 *Securing Development: Public Finance and the Security Sector* highlights the role of public finance in the delivery of security and criminal justice services. This book offers a framework for analyzing public financial management, financial transparency, and oversight, as well as expenditure policy issues that determine how to most appropriately manage security and justice services. The interplay among security, justice, and public finance is still a relatively unexplored area of development. Such a perspective can help security actors provide more professional, effective, and efficient security and justice services for citizens, while also strengthening systems for accountability. The book is the result of a project undertaken jointly by staff from the World Bank and the United Nations, integrating the disciplines where each institution holds a comparative advantage and a core mandate. The primary audience includes government officials bearing both security and financial responsibilities, staff of international organizations working on public expenditure management and security sector issues, academics, and development practitioners working in an advisory capacity.

The Last Elephants May 12 2021 Amazing photographs of elephants accompany narratives from researchers, scientists, and conservationists celebrating elephants and calling for their preservation African savanna elephants--among the most magnificent and beloved of our fellow mammals--are an extraordinary, social, and intelligent species. The Last Elephants, an homage to these animals and a clarion call for their preservation, is based upon a shocking finding: savanna elephant populations across Africa are being decimated, with two to three murdered every hour for their ivory. Without action, these elephants soon will vanish from our world. They are a species in imminent danger of extinction, and it is up to us to save them. Featuring more than 250 full-color photos of the breathtaking animals by some of the world's top wildlife photographers, The Last Elephants was inspired by the devastating results of the continent-wide Great Elephant Census of 2016, undertaken by Elephants without Borders in tandem with the world's most prominent conservation groups. The book joins together the voices and vision of scientists, lawmakers, rangers, conservationists, and on-the-ground researchers to speak out against elephant killings, to close loopholes in international law that allow the ivory trade to continue, and to pay tribute to the thousands who work to protect the animals, including African communities who have elected to preserve and protect their elephant neighbors. Offering both profiles of preservation plans that work and hope for elephants' future, this is a must-read for everyone concerned for the future of one of Earth's most captivating species.

The Last Mile in Ending Extreme Poverty Jun 17 2024 Viewed from a global scale, steady progress has been made in reducing extreme poverty—defined by the \$1.25-a-day poverty line—over the

past three decades. This success has sparked renewed enthusiasm about the possibility of eradicating extreme poverty within a generation. However, progress is expected to become more difficult, and slower, over time. This book will examine three central changes that need to be overcome in traveling the last mile: breaking cycles of conflict, supporting inclusive growth, and managing shocks and risks. By uncovering new evidence and identifying new ideas and solutions for spurring peace, jobs, and resilience in poor countries, *The Last Mile in Ending Extreme Poverty* will outline an agenda to inform poverty reduction strategies for governments, donors, charities, and foundations around the world. Contents Part I: Peace: Breaking the Cycle of Conflict External finance for state and peace building, Marcus Manuel and Alistair McKechnie, Overseas Development Institute Reforming international cooperation to improve the sustainability of peace, Bruce Jones, Brookings and New York University Bridging state and local communities through livelihood improvements, Ryutaro Murotani, JICA, and Yoichi Mine, JICA-RI and Doshisha University Postconflict trajectories and the potential for poverty reduction, Gary Milante, SIPRI Part II: Jobs: Supporting Inclusive Growth Structural change and Africa's poverty puzzle, John Page, Brookings Public goods for private jobs: lessons from the Pacific, Shane Evans, Michael Carnahan and Alice Steele, Department of Foreign Affairs and Trade, Government of Australia Strategies for inclusive development in agrarian Sub-Saharan countries, Akio Hosono, JICA-RI The role of agriculture in poverty reduction, John McArthur, Brookings, UN Foundation, and Fung Global Institute

Private Equity Dec 31 2022 During the past few decades, private equity (PE) has attracted considerable attention from investors, practitioners, and academicians. In fact, a substantial literature on PE has emerged. PE offers benefits for institutional and private wealth management clients including diversification and enhancement of risk-adjusted returns. However, the lack of transparency, regulatory restrictions, and liquidity concerns that exist for some PE options limit their attractiveness for some investors. *Private Equity: Opportunities and Risks* offers a synthesis of the theoretical and empirical literature on PE in both emerging and developed markets. The book examines PE and provides important insights about topics such as major types of PE (venture capital, leveraged, buyouts, mezzanine capital, and distressed debt investments), how PE works, performance and measurement, uses and structure, and trends. Readers can gain an in-depth understanding about PE from academics and practitioners from around the world. *Private Equity: Opportunities and Risks* provides a fresh look at the intriguing yet complex subject of PE. A group of renowned experts take readers through the core topics and issues of PE, and also examine the latest trends and cutting-edge developments in the field. Additionally, discussion of research on PE permeates the book. The coverage extends from discussing basic concepts and their application to increasingly complex and real-world situations. Thus, this volume spans the gamut from theoretical to practical, while offering a useful balance of detailed and user-friendly coverage. This fresh and intriguing examination of PE is essential reading for anyone hoping to gain a better understanding of PE, from seasoned professionals to those aspiring to enter the demanding world of finance.

Changing Cultures of Ageing and Spirituality Apr 15 2024 This book addresses important issues of ageing and spirituality and reflects on the impact of culture on both constructs. The papers are contemporary in that they include excerpts of cultural impact on spirituality from New Zealand, Singapore, India, United Kingdom, Australia and the United States. This book marks almost 20 years of international conferences on ageing and spirituality that commenced in January 2000. It opens the conversation to all who were part of this journey of ageing, including older people, practitioners in ageing and aged care, researchers, and those who reflect on the process of growing older. Chapters feature diverse perspectives, highlighting the need for inclusivity in conversations that surround ageing and recognize how development of cultures is influenced by the society where they emerge, and by minority groups within larger society. Chapters also note the occurrence of subcultures of ageing and aged care. The conference was held shortly before the onset of the COVID-19 pandemic, with the chapters being written often during times of lockdown. Their content reflects the importance of spirituality in times of isolation and can show ways of reaching out to vulnerable older people, of various faiths and cultures, whatever their situations. *Changing Cultures of Ageing and Spirituality* will be a key resource for academics, researchers, and advanced students of Theology, Divinity and Religious Studies, Gerontology, Sociology, Psychology, Mental Health, and Nursing. The chapters included in this book were originally published as a special issue of *Journal of Religion, Spirituality & Aging*.

Is the Planet Full? Aug 07 2023 What are the impacts of population growth? Can our planet support the demands of the ten billion people anticipated to be the world's population by the middle of this century? While it is common to hear about the problems of overpopulation, might there be unexplored benefits of increasing numbers of people in the world? How can we both consider and harness the potential benefits brought by a healthier, wealthier and larger population? May more people mean more scientists to discover how our world works, more inventors and thinkers to help solve the world's problems, more skilled people to put these ideas into practice? In this book, leading academics with a wide range of expertise in demography, philosophy, biology, climate science, economics and environmental sustainability explore the contexts, costs and benefits of a burgeoning population on our economic, social and environmental systems.

Higher Education and Capacity Building in Africa Mar 14 2024 Higher education has recently been recognized as a key driver for societal growth in the Global South and capacity building of African universities is now widely included in donor policies. The question is; how do capacity building projects affect African universities, researchers and students? Universities and their scientific knowledges are often seen to have universal qualities; therefore, capacity building may appear straight forward. Higher Education and Capacity Building in Africa contests such universalistic notions. Inspired by ideas about the 'geography of scientific knowledge' it explores what role specific places and relationships have in knowledge production, and analyses how cultural experiences are included and excluded in teaching and research. Thus, the different chapters show how what constitutes legitimate scientific knowledge is negotiated and contested. In doing so, the chapters draw on discussions about the hegemony of Western thought in education and knowledge production. The authors' own experiences with higher education capacity building and knowledge production are discussed and used to contribute to the reflexive turn and rise of auto-ethnography. This book is a valuable resource for researchers and postgraduate students in education, development studies, African studies and human geography, as well as anthropology and history.

Global Energy Supply and Emissions Jan 12 2024 This book offers an authoritative analysis of the state-of-the art in energy and climate research and policy. It starts by describing the current status of technologies that are expected to have an influence on the energy systems of the future. For an adequate evaluation, it presents the latest findings on the effects of energy supply and consumption as well as of the emissions on both the environment and people's health. This is followed by an extensive discussion of the economic and social problems related to climate change, the need for energy transitions, and other issues that may require public investment and international agreements. The book reviews the problem of energy policy from a global perspective, providing readers with the technical, political, economic and ethical background needed to understand the current situation and work at better solutions for a sustainable, just and prospering world.

The Uses of Social Investment Jul 06 2023 The Uses of Social Investment provides the first study of the welfare state, under the new post-crisis austerity context and associated crisis management

politics, to take stock of the limits and potential of social investment. It surveys the emergence, diffusion, limits, merits, and politics of social investment as the welfare policy paradigm for the 21st century, seen through the lens of the life-course contingencies of the competitive knowledge economy and modern family-hood. Featuring contributions from leading scholars in the field, the volume revisits the intellectual roots and normative foundations of social investment, surveys the criticisms that have leveled against the social investment perspective in theory and policy practice, and presents empirical evidence of social investment progress together with novel research methodologies for assessing socioeconomic "rates of return" on social investment. Given the progressive, admittedly uneven, diffusion of the social investment policy priorities across the globe, the volume seeks to address the pressing political question as to whether the social investment turn is able to withstand the fiscal austerity backlash that has re-emerged in the aftermath of the global financial crisis.
